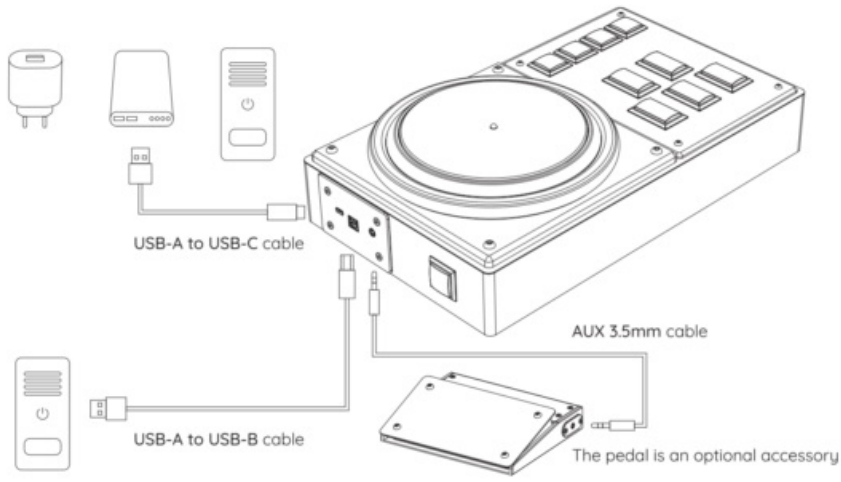
- Firmware Upgrade

- Adjust ring light brightness and button light brightness
- Switch ring light modes and customize ring light colors
- Set turntable dead zones

Please visit: dj-dao.com/en/support to download and consult the user manual.

Connection

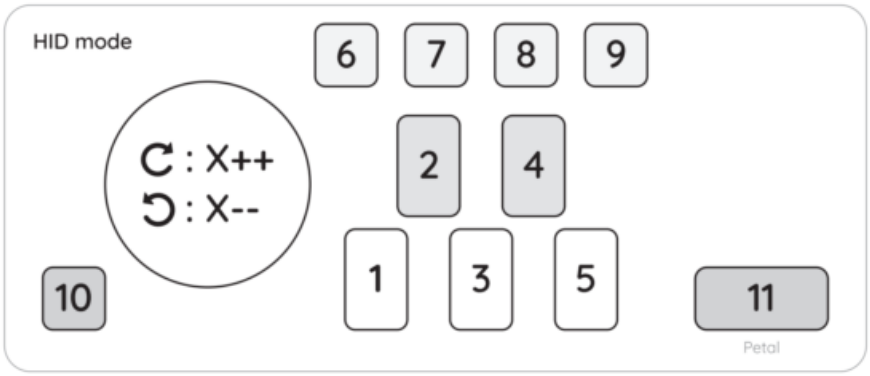


Caution ! ! !

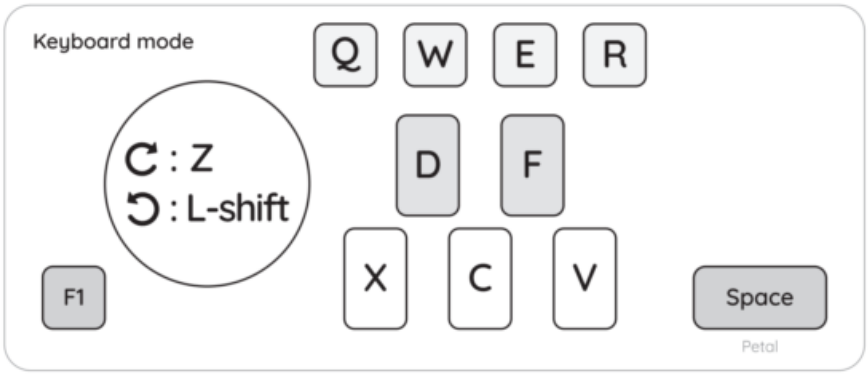
- If the device is not functioning properly, please connect the **USB-C** cable to the **USB** port on the back of the **PC** motherboard to ensure sufficient current supply.
- If a **USB 3.0** port is available, please connect the **USB-B** cable to the **USB 3.0** port.
- It is not recommended to use **USB-HUB**. If necessary, please use a **USB-HUB** with independent power supply.
- Connecting to the **USB-C** port can increase the brightness of the turntable lights. If turntable brightness is not a concern, connecting solely to the **USB-B** port is OK.

For the latest firmware updates, please follow us on **Twitter @GamoTwo.**

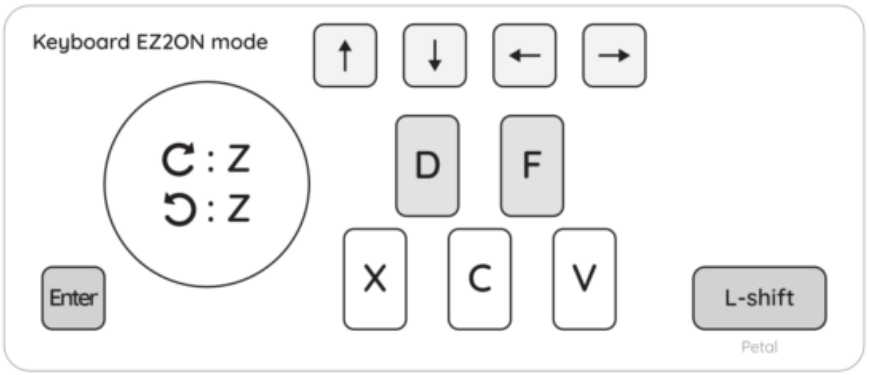
Modes and key values



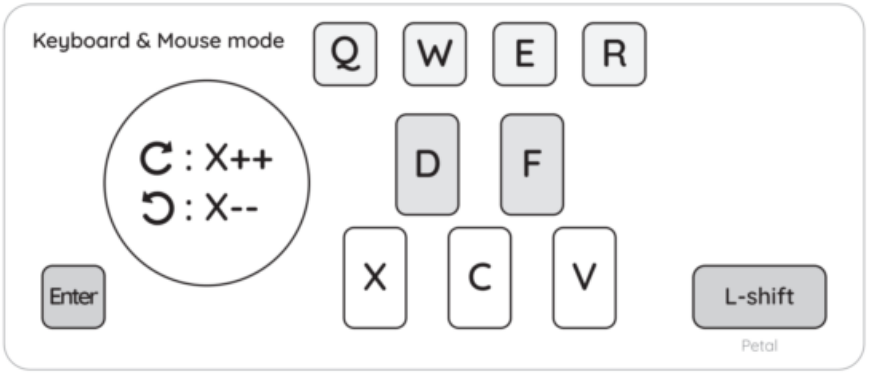
The turntable is analog and supports setting lights **output.**



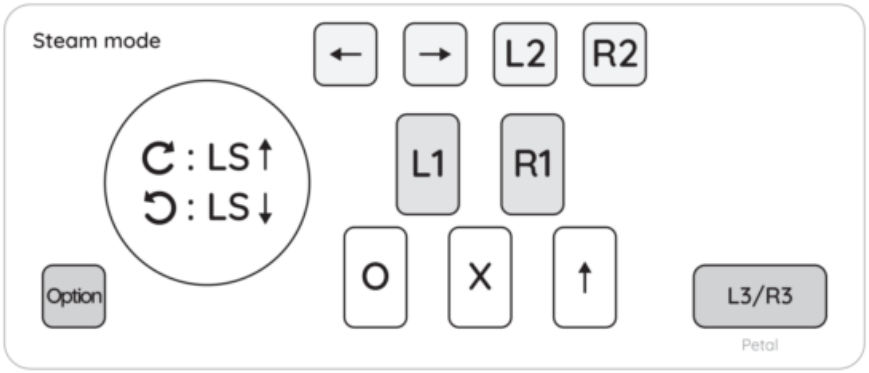
The key values can be customized according to personal needs.
The clockwise and counterclockwise rotations of the turntable can be set to the same key value or different key values.



The default layout for EZ20N, but can also be customized according to personal needs.
The clockwise and counterclockwise rotations of the turntable can be set to the same key value or different key values.



The turntable is analog, suitable for games that support analog input.



When connecting to **Steam,** the controller will be recognized as a **DS4** controller. You can set any key value according to your own needs.
The turntable can be set as a joystick analog or as a standard button.
