Hello,

Due to the new upgrade of the original Xbox, now our third-party controller must install the upgrade package if it wants to be compatible with Xbox.

Regarding the upgrade package, since it is a compressed package we cannot send it directly to you, so we have used a website to turn the upgrade package into a link, so that you can open the link and successfully download the upgrade package. Please be assured it is safe.

1. Copy this link to the website to open and download the upgrade package and download the video to watch the upgrade steps: <https://we.tl/t-307iMtu5dq>

You can first watch our upgrade package operation video or the graphic steps in the attachment, and you will find that the operation is very simple.

If you have any questions, please contact me in time and I will help you solve the problem Have a good day!

If you don't need to connect to your Xbox, ignore this message, thank you!
