Machines in Motion Building Set Instruction Manual

Instruction Guide

Make way for the construction crew! This collection of kinetic construction pieces will keep kids busy building, improving, and putting engineering plans into action. **GEARS! GEARS! GEARS! Machines in Motion®** engages STEM skills at every step: through play, kids will learn how gears turn, pulleys lift, and real-world-inspired machines work, generating a sense of wonder as the pieces fall into place. Follow the building steps pictured in this guide to build 3 different machines, or design and build unique machines of your own. Mix-and-match pieces are completely customizable, assembling in nearly endless configurations! When you build with gears, there are no limits, only the possibilities powered by imagination. Where will yours take you?
