Gefolly SL-01 Radar Sensor Remote Control User Manual

Radar Sensor Remote Control Manual

Contents
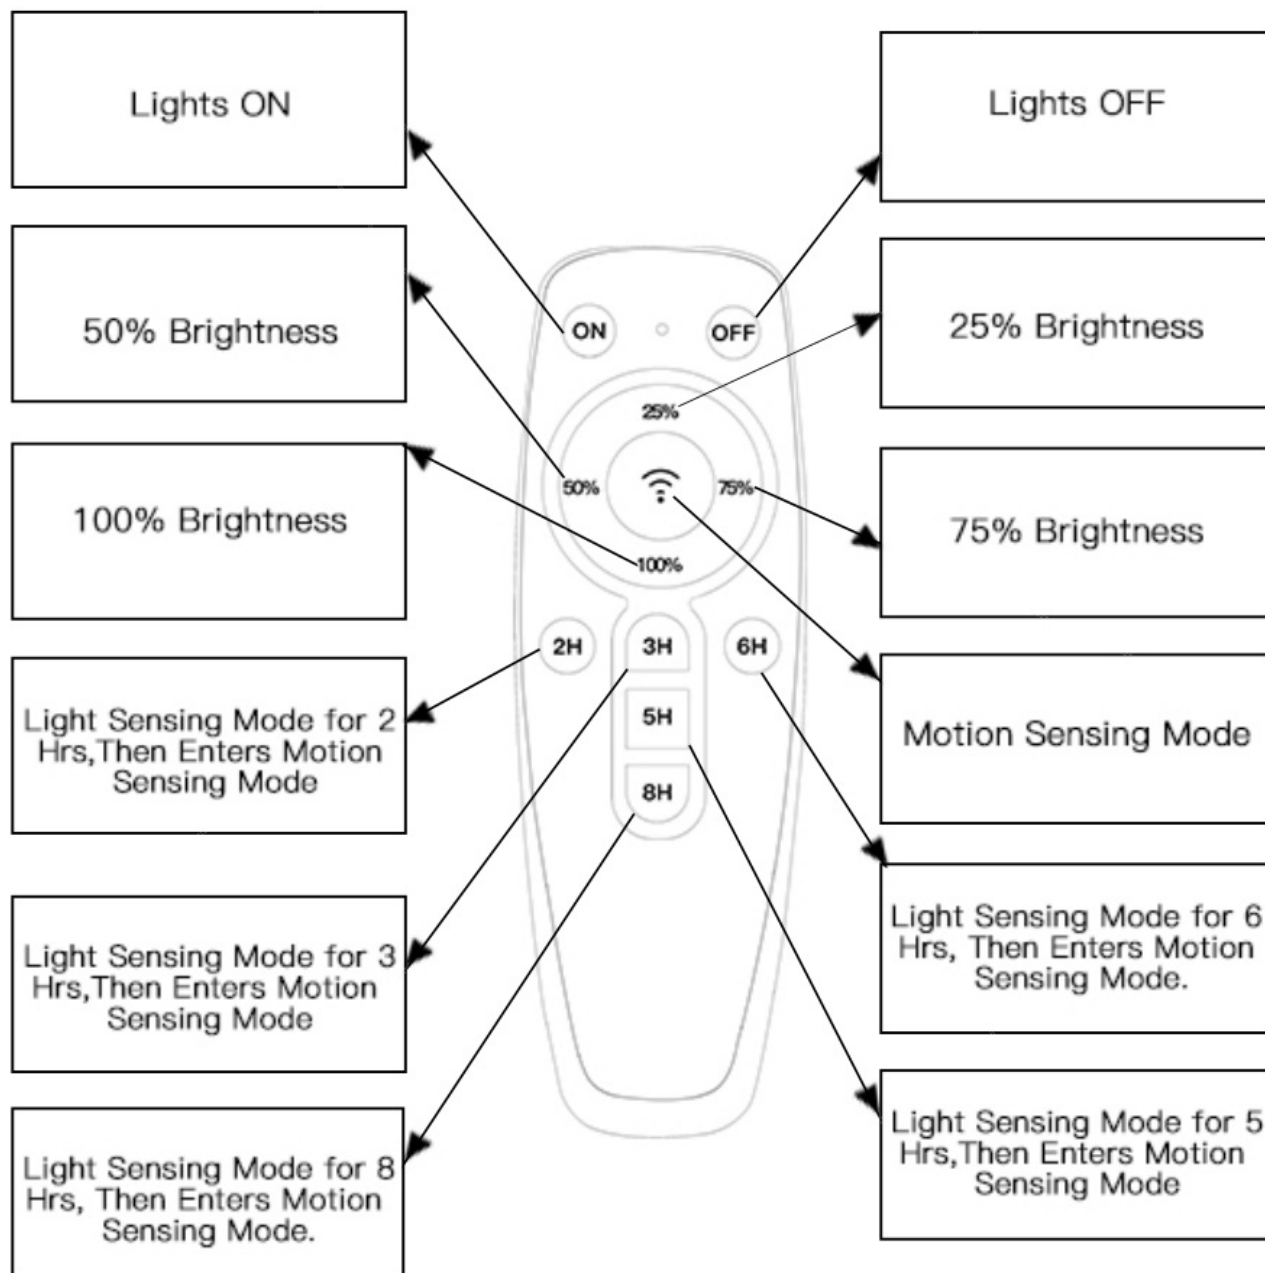

FEATURES OF THE REMOTE CONTROL

- Remote Control Method: Send an infrared signal through a silica gel button.
- Transmission Distance: Linear transmission distance of 35 ft.
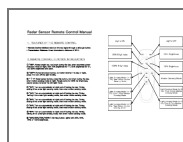

REMOTE CONTROL FUNCTION INTRODUCTION

1. **"ON":** Always bright key, not bright during the day, enter automatic power reduction mode at night, with 75% brightness for 1 H, 50% brightness for 3H, and 25% brightness until dawn.
2. **"OFF":** Forced shutdown button, no matter whether it is day or night, press it to turn off the light forcibly.
3. " 📶 " Radar sensor button, press this button, not bright during the day, enter motion sensing mode at night. People come to 100% full brightness, people leaves and enter the dim light mode.
4. **"2H":** Turn on automatically at night and off during the day. Timing setting 2 hrs under light sensing mode, then enter motion sensing mode.
5. **"3H"**: Turn on automatically at night and off during the day. Timing setting 3 hrs under light sensing mode, then enter motion sensing mode.
6. **"5H":** Turn on automatically at night and off during the day. Timing setting 5 hrs under light sensing mode, then enter motion sensing mode.
7. **"6H":** Turn on automatically at night and off during the day. Timing setting 6 hrs under light sensing mode, then

enter motion sensing mode.

8. **"8H"**: Turn on automatically at night and off during the day. Timing setting 8 hrs under light sensing mode, then enter motion sensing mode.

9. "**25%/50%/75%/100%**": Dimming button, lights with 25%, 50%, 75% or 100% brightness.

Lights ON		Lights OFF
50% Brightness		25% Brightness
100% Brightness		75% Brightness
Light Sensing Mode for 2 Hrs,Then Enters Motion Sensing Mode		Motion Sensing Mode
Light Sensing Mode for 3 Hrs,Then Enters Motion Sensing Mode		Light Sensing Mode for 6 Hrs, Then Enters Motion Sensing Mode.
Light Sensing Mode for 8 Hrs, Then Enters Motion Sensing Mode.		Light Sensing Mode for 5 Hrs,Then Enters Motion Sensing Mode

Remote control buttons: ON, OFF, 25%, 50%, 75%, 100%, 2H, 3H, 6H, 5H, 8H
