Installation

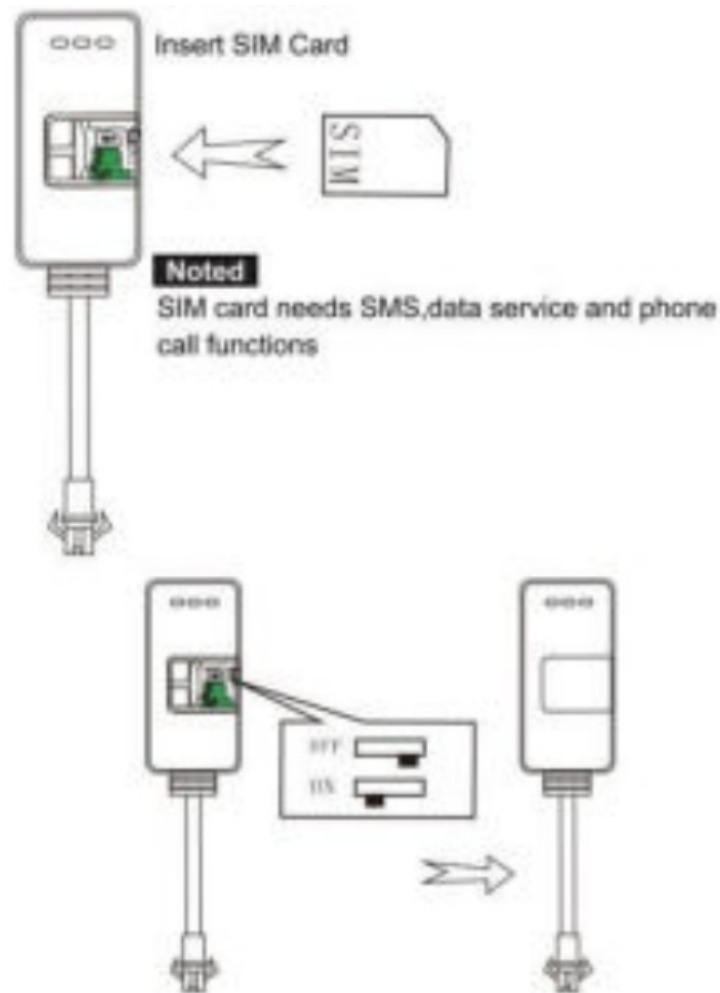

1. Red line connect battery positive pole(+) black line connect battery negative pole(-)
2. The orange line connects the ACC line.
3. Wiring for Cut-off oil function:
 1. Find the 'Speed control line'
 2. Detect the voltage of the 'Speed control line' by a millimeter.
 3. Cut the 'Speed control line' into two lines
 4. Connect "Speed control lines" with the relay's two green lines

Note:

1. Please use the correct relay, normally, car suit 12V relay. truck suit for 24V relay.
2. Open the SIM card cover, insert the SIM card, and turn on the battery supply
3. SIM cards must have GPRS data and SMS service.
4. Please make sure the LED lights up and no steel matter covers the device.
5. Please fix it by cable or tape.

Installation

Product Installation

Please find some who are experienced in GPS tracker installation

Installation Precautions

1. The device should be Installed in somewhere waterproof and easily hidden.
2. Please turn on the device battery switch before using it.
3. Ensure the device light in the front and there is no shield before installing
4. Secure with a cable tie or sponge double-sided tape

Precautions

GPS Tracker should be installed covertly, please contact the supplier for professional installation advice.

1. Hidden installation, avoid water.
2. Ensure the LED side facing the sky and no metal cover
3. Use cable or 3m tape to fix the device.

Working Description

1. After being connected to the vehicle battery, the device will be turned on automatically and the power indicator light (red) will be long bright.
2. If the device is using its backup battery, the power indicator light (red) will slowly blink after being turned on manually.
3. GSM signal light (yellow) and GPS signal light(blue) start fast-blinking
4. A few seconds later both the GSM light and GPS light will be steady and start slowly blinking: the device enters into normal working status.

Troubleshooting

Problem	Description	Solution
Failed to connect the internet	SIM card not installed	Check the sim card
	Simcard not installed properly	Install again
	No GSM network	Move the device in gsm network area
	Weak GSM network	Move the device in strong GSM network area
Location failed	SIM card has no gprs functions	Contact Sim card supplier to activate the gprs function
	Always reply "Failed to get location"	Contact the supplier
No GPS location	Some poor signal areas like basement, tunnels are not able to acquire GPS signals.	Move the device to open sky areas.

Access to Platform

1. Platform (www.wanwaygps.com)
2. Android and IOS APP(Scan the QR code to Download the app)

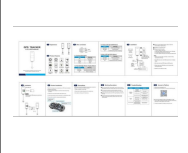

There are two methods to log in to the platform or app.

1. Login by IMEI number(the 15 digits in the back of the device), password: the last 6 digits of IMEI number.
2. Contact the supplier to create an account for you

Please read the installation instruction manual carefully before installation and use.
