REQUIREMENTS

- PC or compatible device with a USB port
- Windows® 7/8/10/11, Android

INSTALLATION

- Connect the cable to a free USB port on your computer, it is necessary to wait about 15 seconds for the first connection until the drivers are fully installed.
- The keyboard includes software that allows you to set up advanced features, if you want to use these features, you need to download and install the software from our website **www.genesis-zone.com**
- Open the installation folder and then double-click the setup.exe file.
- Follow the instructions to install the program.
- After a successful installation, the software icon appears on the main bottom panel. Double-clicking the icon opens the settings interface.

REPLACING SWITCHES
- Remove the keycap by pulling it up vertically
- Install a metal clamp under the switch body in place showed on the figure
- Push the clamp arms to the switch body and simultaneously pull up vertically
- Insert vertically replacement switch into the holes on the PCB board and gently push down
- Insert the keycap and connect the keyboard to the computer

Note: If the switch does not work after replacement, check if the legs of the switch are installed correctly in the holes on the PCB board or have not been bent.
