FROM NOW ON, YOU ARE PART OF GENESIS HISTORY TOO!

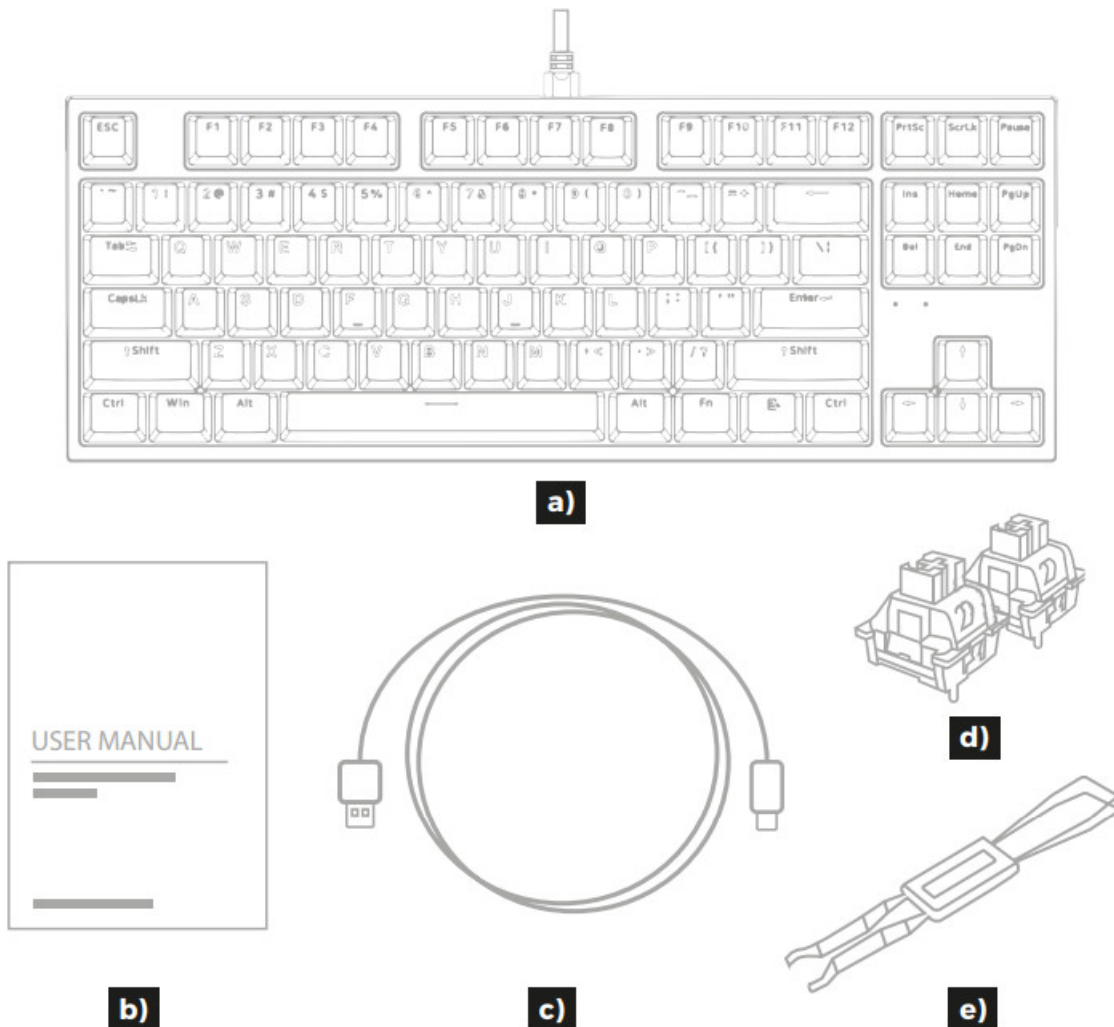

Starting our adventure with Genesis, we knew very well, that creating hardware for gamers is a big responsibility. As enthusiasts of virtual gaming, from the very beginning, we wanted to create devices that would meet the expectations not only of ourselves but all fans of gaming around the world.

Each of the suggestions, comments, and feedback we constantly receive from you – our engaged community – has contributed to the development of many products. The best proof of it is the keyboard that is just resting in your hands – Genesis Thor 404 TKL, in the development of which a key role was taken by the community of enthusiasts gathered around „EnvyTech”.

We hope that it will deliver you many hours of fun and help you to break your own limits in gaming passion, which connects all of us.

REQUIREMENTS

PC or compatible device with a USB port

INSTALLATION

- Connect the cable to a free USB port on your computer, it is necessary to wait about 15 seconds for the first connection until the drivers are fully installed.
- The keyboard includes software that allows you to set up advanced features, if you want to use these features, you need to download and install the software from our website www.genesis-zone.com
- Open the installation folder and then double-click the setup.exe file.
- Follow the instruction to install the program.
- After a successful installation, the software icon appears on the main bottom panel. Double-clicking the icon opens the settings interface.

1. REPLACING SWITCHES

- Remove the keycap by pulling up vertically
- Install a metal clamp under the switch body in place showed on the figure
- Push the clamp arms to the switch body and simultaneously pull up vertically
- Insert vertically replacement switch into the holes on the PCB board and gently push down
- Insert the keycap and connect the keyboard to the computer

Note: If the switch does not work after replacement, check if the legs of switch are installed correctly in the

holes on the PCB board or have not been bent.

2. DIRECTION OF BACKLIGHT EFFECTS

Press the keys Fn + End to change direction of backlight effects.

3. BACKLIGHT BRIGHTNESS

To change the backlight brightness level press keys Fn + Arrow Up/Down.

4. SPEED OF BACKLIGHT EFFECTS

To change the speed of backlight effects, press keys Fn + Arrow Left/Right

5. BACKLIGHT COLOR CHANGE

To change the backlight color, press keys Fn + Del

6. BACKLIGHT MODE CHANGE

Press the keys Fn + Home to change between 18 backlight modes.

7. STATIC BACKLIGHT MODE

Press the keys Fn + Ins to activate static backlight mode.

8. GAME BACKLIGHT MODE

Press the keys Fn + 8/9/0 to change between 3 game backlight modes.

9. CUSTOM BACKLIGHT MODE

Custom mode allows to set the individual illumination of each key.

- Select 1 of 2 available custom modes by pressing Fn + +/-
- Press Fn + Backspace to start recording. Led indicator will start flashing
- Press any keys you want to backlight (for each key you can choose 1 of 8 predefined colors by pressing same key in loop)
- Press Fn + Backspace to finish recording and save settings. Led indicator will stop flashing

Note: During recording you can adjust brightness of illumination by pressing Fn + Arrow Up/Down.

10. RESTORE FACTORY SETTINGS

All saved settings can be easily restored to default settings by pressing the keys [FN+ESC].

To restore factory settings, hold the keys [FN+ESC] for 5 seconds.

EU Declaration of Conformity – Hereby, IMPAKT S.A. declares that the equipment type NKG-2069, NKG-2070, NKG-2071, NKG-2072 are in compliance with Directives 2014/30/EU, 2011/65/EU and 2015/863/EU.
