SIDEWINDER SLIDE

SLIDING HEAD FIRST IS STRONGLY DISCOURAGED AND HIGHLY DANGEROUS

Traumatic Brain Injury and/or spinal injuries can commonly result from sliding head first down a slide into shallow areas of pools. These injuries could have long-term effects or even permanent damage. It is vital to slide down with the slider in a seated position, facing forward with feet first.

Safety Compliance

Global Pool Product slides are 3rd Party Tested & Verified by St. Louis Testing Laboratories. Global Pool Product slides fully conform to the U.S. Consumer Product & Safety Commission Safety Standards for swimming pool slides (16 CFR Part 1207).

CLEANING INSTRUCTIONS

Use nonabrasive soap and water as often as possible.

The Side Winder is a polyethylene surface. Before using any cleaner, always review the label instructions to make sure that it is safe to be used. We strongly suggest that a test spot is used before using a cleaner on a large area of the slide. This will deter any chances of damage or discoloration to the slide.

Keep clear of any abrasive or harsh cleaners, chemicals, and/or disinfectants that could damage the slide.
