Global Sources KW269B Smart Watch

How to connect to BT call feature

1. For Android phones, after the APP and the watch are successfully bound, it will automatically prompt whether to pair with KW269B. You can pair directly.
2. For IOS phones and some Android phones, after the APP and the watch are successfully bound, when using the phone function, you need to manually enter the phone settings-Bluetooth-search KW269B, click pair KW269B, and the phone function can be used normally after the pairing is successful.

Tips:

1. Please upgrade the APP to the latest version to get a better experience.
2. The system requires Android 5.0 or IOS 9.0 or above.
3. For the first time connection with iphone, "Pair" reminder will pop-up, click to pair, then incoming calls and instant messages will be pushed.
4. For the first time connection with android, "Permissions" reminder will pop-up, please follow up the guidance

and allow permissions to ensure all functions working properly

5. To connect successfully, please turn on mobile phone's bluetooth, GPS and network.
6. If the device cannot be found during the device adding process , or the device cannot be connected during use, please try to turn the device off and then on again , or select factory restore in the watch system operation interface , and then add the device again.

FCC Warning Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirements.

FAQ

- **Q: What should I do if I want to make changes or modifications to the device?**

A: Any changes or modifications not explicitly approved by the manufacturer could void your authority to operate the equipment. Contact the manufacturer for guidance.

- **Q: Is the device compliant with FCC regulations?**

A: Yes, the device complies with part 15 of the FCC Rules.

- **Q: How should I handle interference issues with the device?**

- A: The device must accept any interference received, including interference that may cause undesired operation. Ensure proper placement and operation to minimize interference.
