GlocalMe GLMT24A01 Key Tracker For Pet

Specifications

- **Brand:** GlocalMe
- **Model No.:** GLMT24A01
- **Dimensions:** 55*33*18.5mm
- **Battery Capacity:** 600mAh (TYP)
- **Charging Port:** Magnet port
- **Size** 55*33*18.5mm
- **Positioning Technology** GPS BDS GLONASS Wi Fi Bluetooth LBS Active Radar
- **LTE FDD** B1/2/3/4/5/7/8/12/13/17/18/19/20/25/26/28/66
- **LTE TDD** B38/B41
- **Power** 600mAh(TYP)
- **Power Input** DC5V 500ma
- **Port:** Magnet port Input

Product Information

Function Introduction

1. Power on: Press the power button for 3 seconds.
2. Power off: Press the power button for 3 seconds.

Download the GlocalMe App

Download and install the GlocalMe app on your mobile phone.

Create a GlocalMe Account (In App)

- Click Login - Register
- Follow the steps to register an account (You can register with an email or a mobile phone number)

Link Device with GlocalMe App

- Open GlocalMe App and click Device - Add a device by QR code
- Scan the device QR code on the back of the device model

Turn On Device

Press and hold the power button for 3 seconds . (If you cannot turn on the new device, please charge the device and wait for the device to be fully charged.)

Note: Screens and settings in this user manual may vary by software version.

How to Wear

1. Put the pet collar through the silicone strap
2. Securely fasten the strap to the device's hooks
3. Put the collar on the pet and adjust

Note: The width of the pet collar should not exceed 3 CM.

How To Use GlocalMe Life Service?

For comprehensive details about the GlocalMe Life service, including usage instructions and feature introductions, kindly refer to the user guide for Device located in the product manual section at the bottom of webpage via the link below or by scanning the QR code.

Warning

Specific Absorption Rate (SAR) refers to the rate at which the body absorbs RF energy. The SAR limit is 1.6 watts per kilogram in countries that set the limit averaged over 1 gram of tissue and 2.0 watts per kilogram in countries that set the limit averaged over 10 grams of tissue. During testing, the devices are set to their highest transmission levels in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value.

EU Regulatory conformance

- The device complies with RF specifications and when used with an accessory that contains no metal and that positions the device a minimum of 0.5 cm from the body.
- The SAR limit adopted is 2.0W/kg averaged over 10 grams of tissue. The highest SAR value reported for the device when properly worn on the body complies with the limit. Hereby, HONG KONG U-CLOUDLINK NETWORK
- TECHNOLOGY LIMITED declares that this device complies with the essential requirements and

FCC Regulatory conformance

- For body-worn operation, the device complies with FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the device a minimum of 0.5 cm from the body. The SAR limit adopted by the
- FCC is 1.6W/kg averaged over 1 gram of tissue. The highest SAR value reported for the device when properly worn on the body complies with the limit.
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
 1. This device may not cause harmful interference, and
 2. This device must accept any interference received, including interference that may be caused.
- Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and complies with the limits for a Class B digital device, under part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used according to the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur during installation. If the device does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is advised to try to correct the interference by the following measures:

- Reorient or relocate the receiving antenna.
- Increase the distance between the equipment and the receiver.
- Connect the equipment to an outlet on a different circuit from the receiver.
- Consult the manufacturer or an experienced radio/TV technician for help.

Information on the disposal and recycling of the device

- This symbol (with or without a solid bar) on the device, batteries (if included), and/or the packaging indicates that the device and its electrical accessories (for example, a headset, adapter, or cable) and batteries should not be disposed of as household garbage.
- These items should not be disposed of as unsorted municipal waste and should be taken to a certified collection point for recycling or proper disposal.
- For detailed information about device or battery recycling, contact your local city office, household waste disposal service, or retail store. Disposal of the device and batteries (if included) is subject to WEEE.
- Directive Recast (Directive 2012/19/EU) and Battery Directive (Directive 2006/66/EC). The purpose of separating WEEE and batteries from other waste is to minimise the potential environmental impacts and human health risks of any hazardous substances that may be present.
- Do not disassemble or modify, do not short-circuit, do not dispose of in fire, do not expose to high temperature, be disabled after soaking. Do not squeeze or bump the battery. Do not continue to use if serious.
- **CAUTION:** Risk of explosion if the battery is replaced by an incorrect type disposal of

a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion; leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; a battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.
