Music: After connecting to the APP, the watch can control the phone's music player to play/pause/previous/ next song. This function must be opened on the phone before it can be controlled on the watch. (Note that this function needs to be connected to the mobile phone and open the message push permission)

Installation and Connection of Watch App

This product is a Bluetooth product. Many functions can be used normally only after the supporting App has been connected. For example, Watch Time, Call Reminder, WeChat Reminder, etc. can be used normally only when the App is connected at all times. **(For a mobile phone using the Android operating system, never connect or pair the watch in the Bluetooth on the mobile phone.)** Scan the following QR code with the mobile phone and select a version suitable for its operating system or enter a major App marketplace to download and install "Glory Fit".

https://app.help-document.com/gloryfit/download/index.html

Device Linking

Turn on the downloaded App to set the connection. The Bluetooth on the mobile phone needs to be on. Android phone users should turn on the GPS positioning function on the mobile phone and support the App to have the authority to read mobile phone positioning. To use the device for the first time, you need to register an account with an email address, use a third-

party sign-on system or click Skip to log in as visitor. The use of an account number or third-party sign-on system is recommended to avoid impacting the user experience. The watch is connected as follows:

Turn on the App and finish the setup by following the prompts

Click [Select Device] to search

Select and search the Bluetooth name: P32

The connection is successful

Note: A mobile phone using the Android operating system must allow the App to obtain the authority and run in the background, otherwise, the user experience may be impacted.

App Operating Instructions

1. Enter the homepage of the App and view the current synchronized data of the watch. Slide the screen down to refresh the synchronized data manually. Click the [Step Count lcon] to view the sports data and history on the watch. Click the weather icon on the top left corner to obtain and view the local weather conditions or enter a city name manually to position and obtain weather.

2. Click the Heart Rate, Blood Pressure, and Sleep Record modules to view the heart rate record of the whole day (the automatic heart rate monitoring function needs to be enabled), blood pressure measurement record, and yesterday's sleep record and analysis. Click the calendar icon on the top right corner to view the history.

3. On the Sports interface, you can add you're preferred frequently used sports. Click "Start Exercise" to switch and view the state of motion and motion trail. (You need to carry the mobile phone when exercising and the GPS on the mobile phone needs to be enabled.) Click "Pause" or long-press "End" to stop the sport.
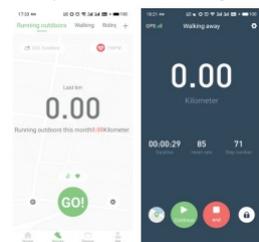

4. Click the "Device" and "My" pages to set the Watch Dial, Heart Rate Monitoring, App Reminder, "Shake to Take Pictures" in More Reminders, etc. respectively. On the "My" page, you can set Personal Information, Exercise Goal, etc.

Attention

1. Do not charge in the condition of water stains.
2. This product is an electronic monitoring product, which is not used as medical treatment. The data is for reference only.
3. Don't wear this device when bathing or swimming for a long time.
4. Use the matching charging cable for charging.

FAQs

1. **Why the watch cannot be searched in the App?**
   A: a. When the Bluetooth on the watch is not searched by the mobile phone during Bluetooth broadcast, the Bluetooth on the watch will sleep. Please turn off the Bluetooth on the watch and that on the mobile phone and search and connect the Bluetooth again about one minute later.
   b. The GPS positioning function on the mobile phone must be turned on. In "Setup" on the mobile phone using the Android operating system, be sure to allow the App to obtain the positioning authority.
2. **Why the watch cannot receive reminders?**
   A: To use the App for the first time, on the "Device" page, click "App Reminder" and the message reminder notification authority will pop up automatically. Please select " **Glory Fit**" to allow reading. Click the auxiliary function again to enable the Glory Fit message notification function and, in the App, enable the corresponding third-party reminder notification function.
3. **Why no reminders are received after the reminder function has been enabled?**
   A: If the message notification function and the corresponding notification authority have been enabled, the Bluetooth on the mobile phone should be kept on and connected to the watch at all times. For example, only when WeChat or QQ has not been logged in on other clients will the message reminder function on the watch be available when any message pops up on the mobile phone. A mobile phone using the Android operating system must allow the App town in the background and set white lists.
