Battery settings

This allows you to change the battery settings on your inverter.

- **GoSolr managed (recommended)**

  The rules on battery usage will change dynamically depending on the load shedding situation.

- **Max Safety**

  Battery is kept at 95% full at any given time. Suitable for load shed ding days level 4 or above.

- **Balanced**

  Best of both worlds. Gives you as much value from the system as possible while still giving you protection
  against load shedding.

- **Economical**

 Maximises production from your solar system at all times.

  Just remember that it won't give you protection against load shedding.

- **Custom settings**

  You choose your personal preference of settings.

System performance

This provides a live view of your system's performance.

- **Battery**

  Battery percentage (how much battery capacity you have available).

- **Current production**

  How much your system is currently producing.

- **Daily production**

  Your daily solar production

- **Daily consumption**

  Your daily consumption

Support

We're always happy to assist.
Reach out to us if you need system help.

Here's how:

- Choose your request type
- Choose your preferred contact method
- Add subject
- Add description

Referral code

Share the sunshine with others and we'll reward you! Get R500 off your next GoSolr invoice for each successful referral (limited to R1500 per month).

View subscriptions

The property page gives you an overview of your active subscriptions.

It shows:

You can trace your once-off and monthly payments here.

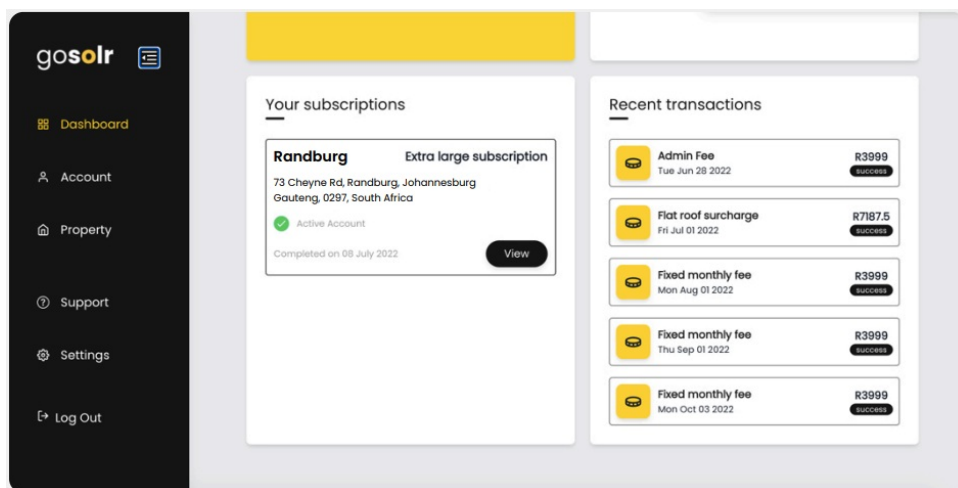

Sidebar menu

This allows you to navigate between the different pages on the webapp.

These include:

- Dashboard
- Account
- Property
- Support
- Settings

Account

The account overview shows the customer details registered on your GoSolr user profile.
If you need to update your banking details, just press "Edit" and a request will be sent to our support department.

Settings

Update your name, email address, phone number and profile picture for your webapp profile on Account settings

**Add webapp to your phone home screen**
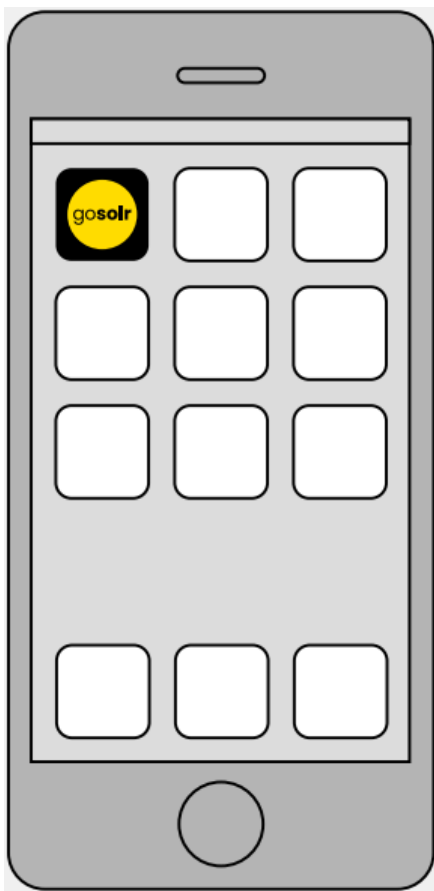

- Open **https://app.gosolr.co.za** on your phone
- Click the actions icon
- Choose "add to home screen"
- Your GoSolr shortcut is created and ready for use

Sit back and enjoy.
The sun is on your side.
