Product Usage Instructions

1. Installation and Setup:

Follow the manufacturer's instructions to set up the cutting plotter in your workspace. Ensure the device is placed on a stable surface with enough space for media handling.

2. Loading Media:

Insert the media into the cutting plotter according to the specified width range. Make sure it is properly aligned and secured with the push rollers.

3. Using Cutting Software:

Install the provided software such as Cutting Master 5 or Graphtec Studio 2 on your Windows or Mac computer. Use these programs to create, edit, and send cutting data to the plotter.

4. Setting Cutting Parameters:

Adjust cutting conditions like speed, force, and other settings based on the type of material you are working with. Ensure the settings are optimized for accurate cuts.

5. Initiating Cutting Process:

Select the desired design or cutting data on the software, then send the command to start the cutting process. The cutting plotter will automatically detect registration marks and begin cutting.

FAQ:

• Q: Can I use any type of media with this cutting plotter?

A: The cutting plotter supports various media types including vinyl, paper, and more. Ensure the media falls within the specified size and weight limits for optimal performance.

• Q: How do I troubleshoot if the cutting plotter encounters errors during operation?

A: Refer to the user manual for error code explanations and troubleshooting steps. Ensure the media is loaded correctly and check the cutting parameters for any inconsistencies.
