2. **AC Power:** Connect one end of the AC power cord to the product's jack and the other end to a 110-120V outlet.
3. Note: Only use the specified voltage for AC power supply.

FAQ

- **Q: How do I switch between different modes on the device?**

- A: Use the FUNC button to toggle between various modes such as CD, MP3, Bluetooth, etc.

- **Q: What should I do if the CD player stops working suddenly?**

- A: Check the power source, ensure the batteries are not depleted, or verify the AC power connection.

User Manual

PORTABLE CD PLAYER WITH CASSETTE RECORDER

CD-X2A

Thank you for purchasing our personal audio products. High-quality CD player is an electronic acoustic technology product carefully designed by our company. To obtain the perfect use effect and prolong the service life of this product, correct use and maintenance are very important, please read this manual carefully before use it.

VERY IMPORTANT TIPS

- When using this product, please follow the prescribed steps, otherwise you may be exposed to harmful radiation. This CD player is a CLASS 1 LASER product.

- When the CD cover is opened or carelessly closed, an invisible laser will be generated.

- Please do not touch the bald head at will, otherwise it will affect the playback performance.

- The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated "hazardous voltage" within product's enclosure, which may be sufficient to induce a risk of electric shock to persons.

FUNCTION DESCRIPTION

1. Antenna
2. Handle
3. CD Door Switch

REMOTE CONTROL DESCRIPTION

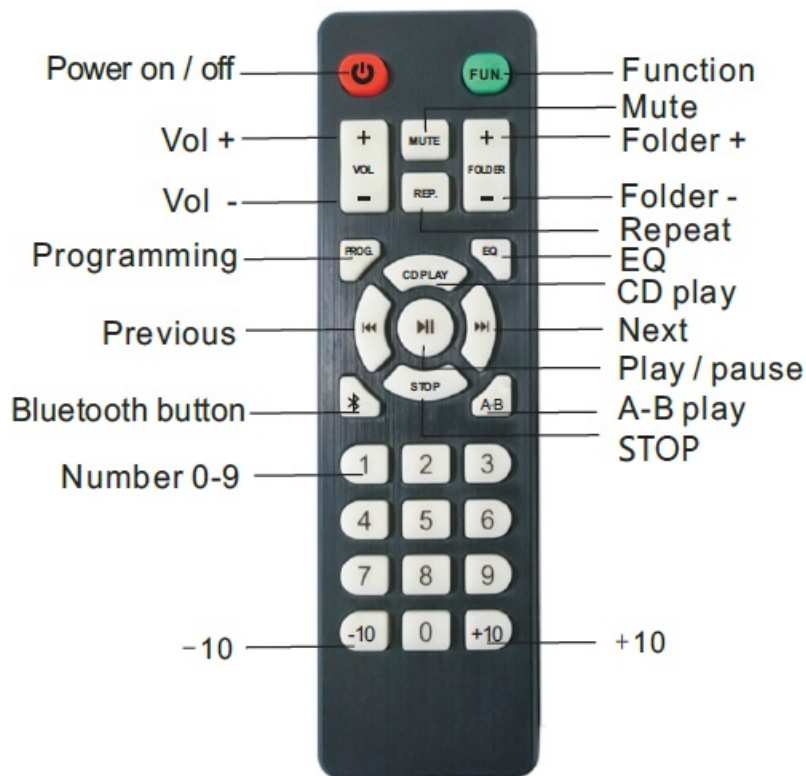

Figure 1

Figure 2

1. **Power on / off**: product on / off button.
2. **Vol + / -**: volume increase / decrease.

SAFETY INSTRUCTIONS

Use Environment

1. Do not expose the machine to rain or damp places, and place and use the machine away from bathtubs, washing boxes, swimming pools, etc
2. Do not put any source of danger on the device (for example, objects filled with liquid, lighted candles).
3. Do not use the machine near heat sources, including radiator pipes, heaters or other appliances that generate heat.
4. Put the machine on a flat surface to use.
5. The machine should be placed in a location with sufficient ventilation
 5. The machine should be placed in a location with sufficient ventilation space around it, and there should be 5-10 cm of space around the front and rear of the machine, so that the machine can have enough space for ventilation.
 - Do not place the machine on a bed, blanket or similar surface to prevent the vents of the machine from being blocked, and do not cover the machine with tablecloths, paper, etc.
6. Be careful not to let solids or liquids enter the body from the radio.
7. Water vapor may condense on the laser lens under the following conditions:
 - When the unit is moved from a cold place to a warm place;
 - When the heating system has just opened;
 - When the machine is used in a very humid room;
 - When the unit is cooled by the air conditioning system.
 - When condensation occurs in the unit, the system cannot operate normally. If this happens, you can temporarily stop using the unit for a few hours before operating it again.
8. The machine should not be exposed to water droplets or splashes, and objects filled with liquids such as vases should not be placed on the equipment.

Precautions

1. In the event of a thunderstorm and you will not use the machine for a long time, you should unplug the AC power plug from the socket or take out the battery to prevent battery fluid from leaking and damaging the machine.

2. Different types of batteries, old and new batteries cannot be mixed, and the batteries must not be charged or heated. When removing the exhausted battery, if the battery leaks, remove the battery and wipe the liquid thoroughly. Waste batteries should be placed in officially designated recycling locations to avoid environmental pollution.
3. When playing, the battery life is limited, please use AC power as much as possible.
4. When using a battery to supply power, the AC power cord must be removed from the unit. When the volume is reduced or the sound is distorted, please replace the battery.
5. The battery (battery pack or battery pack) should not be used in an overheated environment (such as direct sunlight, open flames or similar environments) .

Maintenance

Please place the machine in a well-ventilated place, not in the sun or other places that generate high temperature and humidity. During maintenance, please use a soft cloth moistened with a thinner detergent to wipe the body. Do not use strong solvents such as alcohol, stupid or thinner.

WARRANTY

- This CD boombox has full 12-month warranty against manufacturing defects.
- The warranty period begins form the date of purchase.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
