Power Saving Mode

When the keyboard is idle for 30 seconds, the backlight will enter sleep mode. After 30 minutes, the keyboard will enter deep sleep mode. To activate it, press any key and wait for 3 seconds.

Troubleshooting

If the keyboard is not working correctly, please check the following:

1. The BT function on the tablet (or other BT devices) is enabled
2. The BT keyboard is within 33 feet
3. The BT keyboard is charged

If certain keys or commands begin to fail, work sporadically or lag in response time, please restart your tablet (power on and power off).

If a problem persists, please try the following steps:

1. Press and hold  +  together, the red, green and blue indicators light up at the same time and then release, the keyboard has been restored to factory settings +
2. Delete all the BT devices on the tablet
3. Switch off the BT function on the tablet
4. Reboot the tablet (shutdown and power on)
5. Re-open the BT function on the tablet
6. Repeat the steps on page 1 to connect the keyboard

Support

If you have problems with keyboard usage or improvement opinions, please do not hesitate to contact us. We would love to get you taken care of and happy right away! **Thank you!**
