GROTHE

GROTHE MONTILUX 2154 Push Button

Product Information

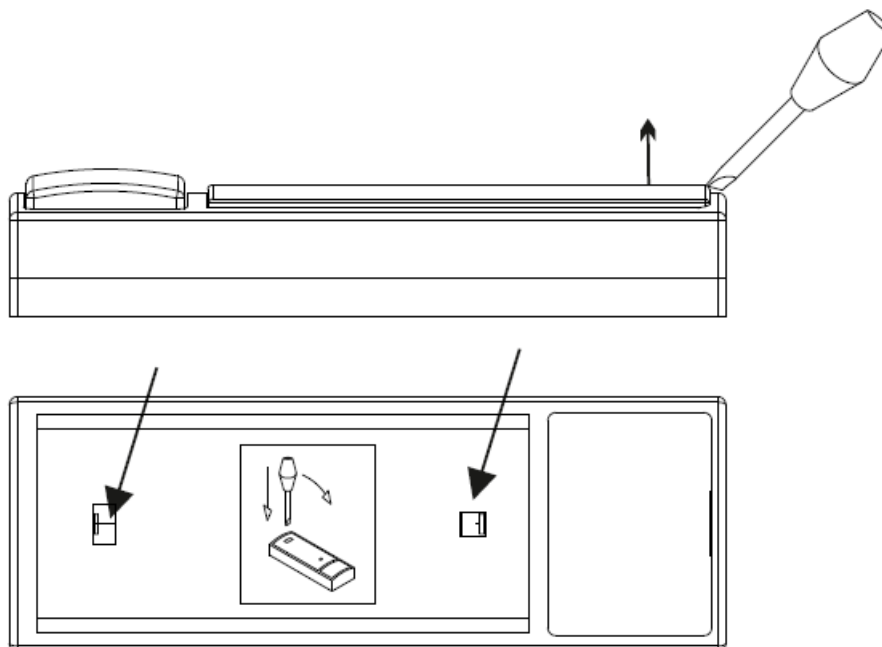

The Klingeltaster/Push button Montilux is an electronic doorbell button. It comes with a nameplate cover that can be easily removed to access the slots for installation. The push button can be connected to a power source and a LED (optional) for illumination. The installation should be performed by a qualified electrician.

Product Usage Instructions

1. Using a flat screwdriver, remove the nameplate cover to access the installation slots.
2. Insert a suitable screwdriver into the two slots and tilt them as described in the illustration.
3. Loosen the screw with a screwdriver and insert the stripped wire under the plate. Tighten the screw again.
4. If you want to connect a LED, follow the connection diagram provided in the manual.
5. The installation must be carried out in a de-energized state by a qualified electrician.

Installation

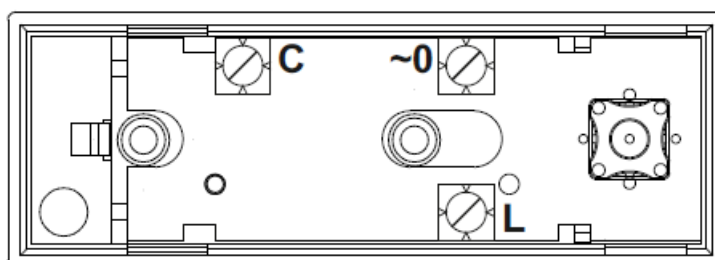

Opening the housing

- To open the housing, remove the nameplate cover with a flat screwdriver.
- Two slots appear under the nameplate. Use a suitable screwdriver to pierce these two slots and tilt them as described in the illustration.

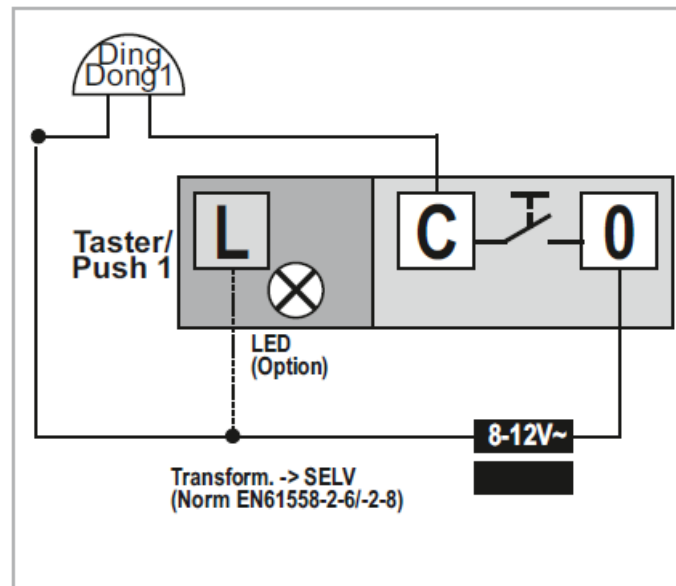

Connection of the push button

Connect the wires as follows:

- Loosen the screw with a screwdriver. Insert the stripped wire under the plate and tighten the screw again.

Connection diagram

- Installation must be carried out in de-energized condition by an electrical!
