GRYPHON

Gryphon 99999 Tower Super-Fast Mesh WiFi Router

The Most Powerful WiFi System to Protect Your Home's Network

Gryphon is a secure WiFi router system with an App that makes it easy for you to protect your kids and your privacy online. Manage your entire home network from anywhere. Some call it an intelligent network firewall, we call it sensible protection for your kids, your webcams, and all the "smart" devices invading our homes.

Advanced WiFi Technology

1. **Tri-band AC3000**

   Three simultaneous Wi-Fi radios for more bandwidth to every device on the network.

2. **4×4 MU-MIMO**

   Advanced WiFi with multiple streams of data for optimal throughput performance, eliminating bandwidth

   bottlenecks during concurrent device usage.

3. **WiFi Mesh Whole-Home Coverage**

   2 Gryphon mesh routers cover up to 6000 sq. ft. to eliminate dead spots in the home.*

4. **Optimize Network Health**

   Qualcomm's WiFi-SON technology self-configures and self-organizes your WiFi to enhance the overall

   performance of the network.

5. **Prioritize Device Bandwidth**

   Bandwidth priority to a select device as needed for improved quality of service (QoS).

DATA SHEET

1. **Malware and Ransomware Protection**

   Powered by ESET Technologies, Gryphon protects every single device in the home from a central location.

2. **24/7 Intelligent Intrusion Detection**

Gryphon uses machine learning to monitor all in-home devices – including smart home devices – to guard against potential hackers.

3. **Block Phishing Links**

Gryphon automatically blocks phishing scams to ensure you'll never accidentally click on a malicious link again.

Requires service agreement. Gryphon comes with a free one-year monitoring program that can be extended for a modest fee on a monthly or annual basis.

## Comprehensive Parental Controls

- **Control Content**

  Enable or disable access to popular apps like YouTube, Facebook, and Snapchat and execute real-time requests for website approvals instantly.
- **Regulate Usage Time**

  Schedule homework time, and bedtime, or simply pause the internet at any moment with a single click.
- **Filter Content Automatically**

 Gryphon automatically blocks inappropriate websites using our CrowdRanking™ algorithm.

Gryphon Hardware Setup is easy as 1, 2, 3… Initiating your Gryphon router couldn't be easier! Simply plug in hardware to power supply and ethernet and then connect securely to the mobile App via Bluetooth.

- Plugin your Gryphon router to power and ethernet connection.

- The App will find the router through a secure Bluetooth connection.
- Tap Connect and the setup will be done automatically.

Easy To Use Gryphon Connect App

Plug and Play: Your secure WiFi network will be up and running in minutes with simple, step-by-step installation and automatic software updates via the Gryphon app. Available for both iOS and Android devices.

Specifications

WiFi Features:

- 802.11bgn
- 802.11AC
- 3Gbps overall throughput
- Comprehensive WiFi security
- Simultaneous tri-band radios (one 2.4GHz, two 5GHz)
- 4×4 MU-MIMO
- Antenna beamforming
- Wireless mesh
- 6 high-power internal antennas
- Guest WiFi

Power Supply:

- 12V DC

Ports

- 1 Gigabit Ethernet WAN
- 3 Gigabit Ethernet LAN

Memory

- 512MB RAM, 4GB Flash

Package Contents

Single Pack:

- 1 Gryphon Secure WiFi Mesh Router
- 1 Power Supply
- 1 Ethernet Cable
- 1 Quick Start Guide

Mesh Double Pack:

- 2 Gryphon Secure WiFi Mesh Routers
- 2 Power Supplies
- 1 Ethernet Cable
- 1 Quick Start Guide

Physical Specifications

- **Dimensions:** 4.25 x 4.25 x 9.25 in (108 x 108 x 235 mm) each
- **Weight:** 1.8lbs (816.5g) each

FREQUENTLY ASKED QUESTIONS

What is the Gryphon 99999 Tower Super-Fast Mesh WiFi Router?

The Gryphon 99999 Tower is a high-performance mesh WiFi router designed to provide fast and reliable WiFi

coverage in larger homes or offices.

What are the key features of the Gryphon 99999 Tower Super-Fast Mesh WiFi Router?

Some key features of the Gryphon 99999 Tower include super-fast WiFi speeds, mesh networking capability, advanced parental controls, built-in security features, and an intuitive mobile app for easy management.

What is mesh networking?

Mesh networking allows multiple routers to work together as a single network, extending WiFi coverage and ensuring a seamless connection throughout the entire space.

What is the maximum WiFi speed supported by the Gryphon 99999 Tower router?

The router supports high-speed WiFi with maximum speeds of up to AC3000, providing fast and reliable connections for bandwidth-intensive activities.

Can the Gryphon 99999 Tower router be used with both wired and wireless connections?

Yes, the router offers both wired connectivity through its Ethernet ports and wireless connectivity through its powerful WiFi capabilities.

Does the Gryphon 99999 Tower router have additional security features?

Yes, the router includes built-in security features such as malware protection, ad blocking, intrusion detection, and content filtering to help safeguard your network and connected devices.

How can I manage the Gryphon 99999 Tower router?

The router can be easily managed through the Gryphon app, available for smartphones and tablets, which allows you to control and monitor your network settings from anywhere.

Can the Gryphon 99999 Tower router prioritize specific devices or applications?

Yes, the router supports Quality of Service (QoS) settings, enabling you to prioritize certain devices or applications for better performance and bandwidth allocation.

Does the Gryphon 99999 Tower router support guest networks?

Yes, the router allows you to create guest networks, allowing visitors to connect to the internet without accessing your main network and compromising security.

Can I set time limits and content filters for devices connected to the Gryphon 99999 Tower router?

Yes, the router's advanced parental control features enable you to set time limits, restrict access to certain websites or content categories, and monitor the online activities of connected devices.

What is the range of the Gryphon 99999 Tower router?

The router offers a wide coverage range, but the specific range can vary depending on factors such as the layout of your space and any potential interference.

Can I expand the Gryphon 99999 Tower router's coverage with additional units?

Yes, the Gryphon 99999 Tower supports mesh networking, allowing you to add additional Gryphon units to extend WiFi coverage and create a seamless network throughout your home or office.

Can I connect external storage devices to the Gryphon 99999 Tower router?

Yes, the router includes USB ports that allow you to connect external storage devices, such as hard drives or USB flash drives, to share and access files on your network.

Does the Gryphon 99999 Tower router support VPN connections?

Yes, the router supports VPN passthrough, allowing you to use VPN services on connected devices, but it does not typically function as a VPN server itself.

Can I control the Gryphon 99999 Tower router with voice commands?

Yes, the Gryphon router is compatible with voice assistants such as Amazon Alexa, allowing you to control certain functions and settings using voice commands.
