Gsmart X7 Smart Monitoring Camera

Product Information

Specifications

- Model: Gsmart Cam
- Compliance: Part 15 of FCC Rules
- Radiation Exposure Limits: FCC approved for uncontrolled environment
- Minimum Distance: 20cm between radiator and body

Quick Start Guide

Monitoring Camera SMART

Please read the Quick Start Guide carefully before using and retain it for future reference. The background server App is updated regularly. If there is any discrepancy, please refer to the actual operation

Download and Install the APP

Method 1: Scan the QR code for quick download

IOS

Android

Scan QR code to download

Method 2: Search for "Gsmart Cam" in your mobile app store, download and install

To ensure the normal use of the APP functions, please grant and accept all permissions for the "Gsmart Cam " APP during installation.

Register an Account and Log In

Open the APP. If you don't have an account yet, click " Create New Account" (Figure 1) to enter the registration interface and enter your phone number to register an account. After registering, log in to the APP.

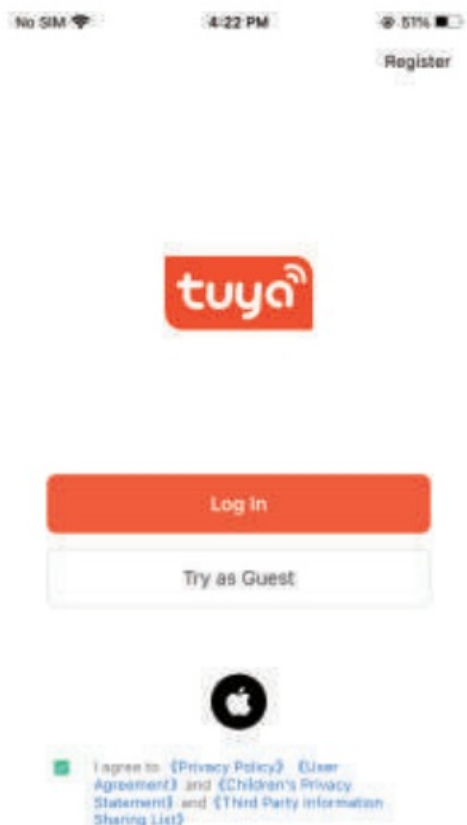

Figure 1

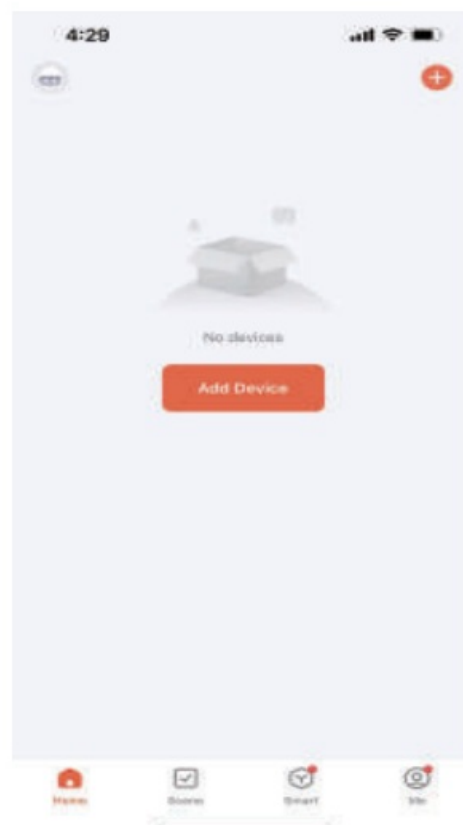

Figure 2

Add Device

Connect the device to the power source and switch it to the ON position. When the device emits a “beep-beep” sound, click “Add Device” on the APP home page or the “+” in the top right corner. Choose “Camera/Lock” → Smart Camera (WiFi) → Next → Enter WiFi password → Scan the QR code on your phone with the device’s camera lens — Wait for the “ding” sound → Hear the prompt tone → Done. The device installation is now complete.

View Live Video

Click on the device to enter the camera control preview interface (Figure 3). The interface displays live video and allows you to switch resolution and perform full-screen operations. The bottom menu provides options for taking photos, two-way talk, recording, video playback, photo album, and alarm settings. Click the device button in the top right corner to enter the settings interface (as shown in Figures 4 and 5). You can set the camera name, alarm settings, storage settings, and basic functions.

FCC Warning

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

Frequently Asked Questions

Q: How do I share the camera?

A: In the live video viewing interface, click the device button in the top right corner to enter the device settings interface, and click “Share Device”. Then click “Add Device” and enter the phone number or email of the user you want to share with, and click “Done” to complete sharing.

Q: How does the camera store video recordings?

A: the camera supports TF card storage (up to 128GB) – Video card full after automatic book in addition to earlier video, circular recording.

Q: The camera is offline unexpectedly, how do I check?

A:

1. Check if the power supply and network connection are normal.
2. Restart the device.
3. Reconfigure the camera.
4. Check if your home network bandwidth is normal.

*If this explanation is not detailed, please refer to the actual product
