Guest Internet Solutions GIS-K1 4-port Switch Wi-Fi Hotspot Gateway integrated

Product Specifications:

- **Product Name:** STAR-15 kit
- **Product Type:** Community WiFi Internet Service
- **Included Items:** GIS-K1 Internet controller, AP1200F dual band outdoor wireless access point with omni-directional antenna, Extension Ethernet cable, Free Cloud account
- **Features:** Easy self-installation, Internet user management software, Monitoring for failures, Protection from abuse, Free support and upgrades

Product Usage Instructions:

Installation and Setup:

1. Mount the AP1200F outdoor wireless access point at a high point outdoors with a clear line of sight.
2. Connect the AP1200F to the GIS-K1 Internet controller using the provided Ethernet cable.
3. Connect the Starlink router to the GIS-K1 for Internet connectivity.

Providing Internet Service:

1. Configure the GIS-K1 Internet controller to manage user access and service settings.

2. Distribute vouchers for Internet access using the GIS-R4 or the Cloud account provided.
3. Monitor service performance and receive alerts for any failures.

User Management:

1. Add and remove users as needed using the Internet user management software on the GIS-K1.
2. Customize branding and service settings to suit your community's needs.

FAQ:

- **How many homes can be served with the STAR-15 kit?**
  The STAR-15 kit can provide Internet service for 30-50 homes when connected to a Starlink antenna within a range of 1 Km with a line of sight to the AP1200F antenna.
- **What is included in the STAR-15 kit?**
  The STAR-15 kit includes the GIS-K1 Internet controller, AP1200F outdoor wireless access point with omni-directional antenna, extension Ethernet cable, free Cloud account for service management, and a complete installation guide.
- **Do I need to purchase additional licenses or pay for maintenance?**
  No, the STAR-15 kit does not require any additional fees, licenses, maintenance costs, or contracts. It includes free support, upgrades, and cloud services for managing the Point of Sale (PoS) system.

INTRODUCTION

- Sell the Internet service in your building or outside to a community with several methods, including voucher sales and Mobile Money payments.
- Everything you need in one kit to start providing an Internet service using your ISP connection or your Starlink antenna.
- Easy self-install and management of Internet sales, you do not depend on others.
- The GIS-K1 WiFi controller and wireless access point have the Internet user management software installed.
- Connect network and wireless devices to the GIS-K1, wired computers, indoor and outdoor wireless access points, and Ethernet switches to connect more devices.

- Monitor the service for failures: get alerts.

- Protection from abuse of the Internet service; prevents unauthorized Internet access.

- No other fees, maintenance, license, software, services, or contracts.

- Free support, free upgrades ,and free cloud service; manage the PoS from anywhere.

- Branding is easy to customize your Internet service.

**Community Internet using ISP service: easy to install and operate**

Many rural communities around the world had no hope of getting Internet access until now. The Starlink Internet operates almost everywhere in the world and can be shared with homes in a community when the Internet service is managed using a Guest Internet controller. The unique Guest Internet features maintain good Internet performance for many users while ensuring that Starlink requirements are not exceeded.

Provide a WiFi Internet service to mobile devices and homes using the STAR-15 kit and your ISP connection.

The STAR-15 kit can provide an Internet service for 30-50 homes when connected to a Starlink antenna. The GIS-K1 WiFi Internet controller connects to the Starlink router. The powerful omnidirectional AP1200F outdoor wireless access point connects to the GIS-K1. Homes within a range of 1 Km with line of sight to the AP1200F antenna can connect to the Internet using the STAR-4 home installation kit. The GIS-K1 sets rules for Internet access so that the service from one Starlink antenna can be shared between many people, and to ensure that the Starlink data capacity is not exceeded, which may result in a service interruption. The rules include the duration of access, maximum data speed, maximum data volume, andthe time at which the service can be used. Internet access is provided with a voucher that can be printed using the GIS-K1 or using the free Cloud service. The voucher access code has the rules for Internet access. Guest Internet has no other charges ,and the equipment is very easy to use, so it is not necessary to rely on an 'expert' to operate the system; anyone can do it.

The GIS-K1 is a WiFi Internet controller with all the features that are essential to manage the Starlink Internet service for many users. The STAR-15 kit includes the powerful AP1200F outdoor wireless access point withan omnidirectionall antenna.

Items included with the STAR-15 kit

STAR-15 community WiFi Internet kit

- GIS-K1 Internet controller.
- AP1200F dual-band outdoor wireless access point with omnidirectional antenna.
- Extension Ethernet cable.
- Free Cloud account to manage the service.
- Print vouchers using the GIS-R4 or using the Cloud account.
- Complete guide, how to connect, configure, and provide your Internet service.
- The Starlink antenna is not included.

  The AP1220F omnidirectional antenna is installed outdoors at a high point, such as the roof of a building. The installer has to provide the Ethernet cable that connects the AP1200F to the PoE supply.

Guest Internet features that manage the WiFi community Internet service

Easy to install and use

Comprehensive instructions and simple products mean that you do not have to depend on others to provide the Internet service.

Control Internet use with access codes

- Duration of access
- Maximum data speed
- Maximum data use
- Number of users
- Date to be used
- + more

Failure monitoring

Monitor the Starlink, Guest Internet, and wireless products; get an email alert when any failure occurs.

Online Internet purchase

Accept payment online to purchase a code from any debit or credit card using PayPal or your card processor.

Print and sell a voucher.s

Each voucher has an access code.

Intrusion protection

Prevent unauthorized access to the Internet service with the powerful Guest Internfirewallwal.l

ABOUT COMPANY

- Guest Internet has no other charge,e and the equipment is very easy to use, so it is not necessary to rely on an expert to operate the system; anyone can do it. The ISP Internet service is not included with this kit.
