Guest Internet Solutions Managed WiFi

Community Internet Service

STAR-7 kit

An easy to install kit that provides a community Internet service using your **ISP connection**

- Share or sell an Internet service to a community using Guest Internet to manage the ISP service.
- Everything you need in one kit to start providing a community Internet service using your ISP connection.
- STAR-kits are ready to use complete kits with full installation instructions, using high performance products.
- Easy self-install and management of the Internet service, you do not depend on others.
- Multi-language: English and Spanish.
- Print vouchers with access codes to give people access: duration, data speed and data limits.
- Monitor the service for failures: get alerts.
- Protection from abuse of the Internet service; prevents unauthorized Internet access.
- No other fees, maintenance, license, software, services or contracts.
- Free support, free upgrades.
- Free cloud service; manage the Internet from anywhere.
- Branding is easy to customize your Internet service.

Community Internet using your ISP: easy to install and operate

Many rural communities around the world had no hope of getting Internet access until now. The Starlink Internet operates almost everywhere in the world and can be shared with homes in a community when the Internet service is managed using a Guest Internet controller. The unique Guest Internet features maintain good Internet performance for many users while ensuring that Starlink requirements are not exceeded.

Provide a service to homes with the STAR-7 kit and your ISP Internet connection

The STAR-7 kit can provide an Internet service for 50 to 75 homes when connected to a Starlink antenna. The GIS-R4 Internet controller connects to the Starlink router. The powerful long range WAP-5 wireless access point connects to the GIS-R4. Homes within a range of 1-3 Km with line of sight to the WAP-5 antenna can connect to the Internet using the STAR-4 home installation kit.

The GIS-R4 sets rules for Internet access so that the service from one Starlink antenna can be shared between many people, and to ensure that the Starlink data capacity is not exceeded which may result in a service interruption. The rules include the duration of access, maximum data speed, maximum data volume, and time at which the service can be used.

Access is provided with a voucher that can be printed using the GIS-R4 or using the free Cloud service. The voucher access code has the rules for Internet access.

Guest Internet has no other charges and the equipment is very easy to use so it is not necessary to rely on an `expert' to operate the system, anyone can do it.

The GIS-R4 is an Internet controller with all the features that are essential to manage the Starlink Internet service for many users. The STAR-4 kit provides Internet to homes with the home installation kit.

Items included with the STAR-7 kit

- GIS-R4 high performance Internet controller
- WAP-5 dual band high power outdoor wireless access point
- Extension Ethernet cable
- Free Cloud account to manage the service
- Print vouchers using the GIS-R4 or using the Cloud
- Complete guide, how to connect, configure and provide your Internet service
- **The Starlink antenna is not included**

The installer has to provide the Ethernet cable that connects the WAP-5 to the PoE supply.

STAR-7 Advanced Starlink community Internet kit

Print vouchers with access codes using the free Guest Internet cloud service.

1. Homes
2. Mobile users
3. WAP-5 High power long range dual band wireless access point
4. power
5. Power over Ethernet (PoE) supply
6. GIS-R4 high performance Internet controller
7. Ethernet port
8. Starlink router with Ethernet connector
9. Starlink antenna

1. Internet
2. Guest Internet Cloud

Guest Internet features that manage the Starlink community Internet service

Easy to install and use

Comprehensive instructions and simple products mean that you do not have to depend on others to provide the Internet service

Quick Start guide

Control Internet use with access codes

- Duration of access
- Maximum data speed
- Maximum data use
- Number of users
- Date to be used

– + more

Easy to print
