## Guest Internet Solutions STAR-8_kit Community Internet Service

**INSTALLATION GUIDE**

# Community Internet Service

**Community Internet using your ISP: easy to install and operate**

Many rural communities around the world had no hope of getting Internet access until now. The Starlink Internet operates almost everywhere in the world and can be shared with homes in a community when the Internet service is managed using a Guest Internet controller. The unique Guest Internet features maintain good Internet performance for

many users while ensuring that Starlink requirements are not exceeded.

**Provide a service to homes with the STAR-8 kit and your ISP connection**

The STAR-8 kit can provide an Internet service for 50-75 homes when connected to a Starlink antenna. The GIS-R4 Internet controller connects to the Starlink router. The powerful OmniWiFi wireless access point connects to the GIS-R4. Homes within a range of 1 Km with line of sight to the OmniWiFi antenna can connect to the Internet using the STAR-4 home installation kit.

The GIS-R4 sets rules for Internet access so that the service from one Starlink antenna can be shared between many people, and to ensure that the Starlink data capacity is not exceeded which may result in a service interruption. The rules include the duration of access, maximum data speed, maximum data volume, and time at which the service can be used.

Access is provided with a voucher that can be printed using the GIS-R4 or using the free Cloud service. The voucher access code has the rules for Internet access.
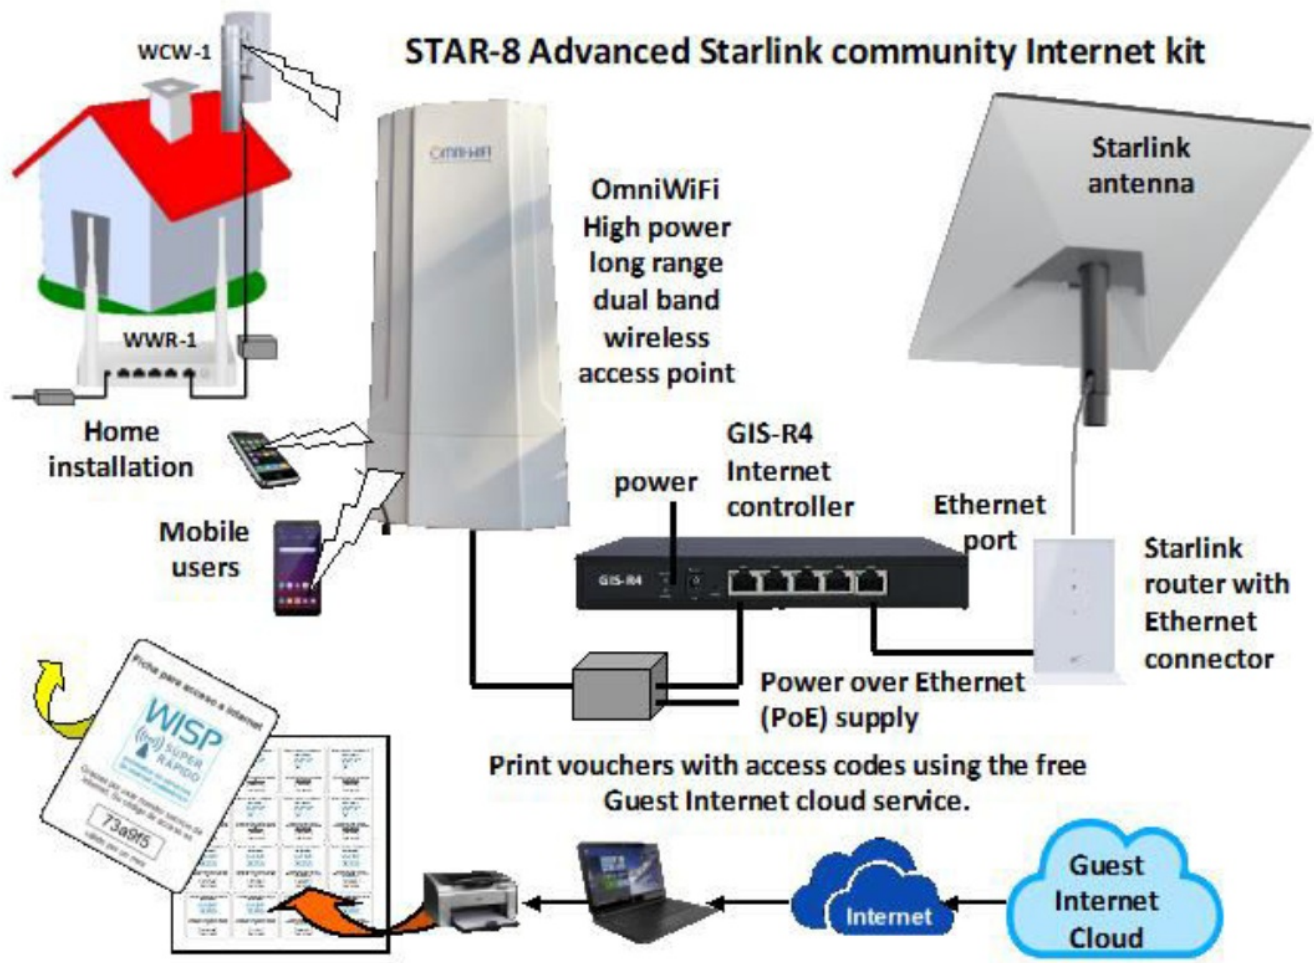

Guest Internet has no other charges and the equipment is very easy to use so it is not necessary to rely on an 'expert' to operate the system, anyone can do it.

The GIS-R4 Internet controller and OmniWiFi wireless access point

The GIS-R4 is an Internet controller with all the features that are essential to manage

the Starlink Internet service for many users. The STAR-8 kit includes the powerful OmniWiFi wireless access point.

## Items included with the STAR-8 kit

☐ Extension Ethernet cable

☐ Free Cloud account to manage the service

☐ Print vouchers using the GIS-R4 or using the Cloud account

☐ Complete guide, how to connect, configure and provide your Internet service

☐ The Starlink antenna is not included

Connect the wireless Internet service to homes with the addition of the STAR-8 home installation kit.

## Guest Internet features that manage the Starlink community Internet

**service**

**Easy to install and use**

Comprehensive instructions and simple products mean that you do not have to depend on others to provide the Internet service

Quick Start guide

**Control Internet use with access codes**

– Duration of access

– Maximum data speed

– Maximum data use

– Number of users

– Date to be used

– + more

Easy to print

**Failure monitoring**

Monitor the Starlink, Guest Internet and wireless products; get an email alert whe n any

failure occurs

**Multi-language**

Al l software and documentation is available in English or Spanish, Guest Internet is the perfect product for Spanish speakers

**Print and sell vouchers**

Each voucher has an access code

**Intrusion protection**

Prevent unauthorized access to the Internet service with the powerful Guest Internet firewall

## Installation:

1. Connect the GIS-R4 Internet controller to your Starlink router.
2. Install the OmniWiFi dual-band outdoor wireless access point within a range of 1 Km with line of sight to the homes.
3. Connect the Extension Ethernet cable as needed for setup.

## Internet Service Management:

Use the GIS-R4 to set rules for Internet access, including duration, data speed, data volume, and usage time. This ensures fair sharing of the service among users and prevents service interruptions due to exceeding data capacity.

## Voucher Printing:

Print vouchers with access codes using the GIS-R4 or the Free Cloud account. Vouchers contain rules for Internet access that can be distributed to users.

## Monitoring and Maintenance:

Monitor the service for failures and receive alerts. Ensure proper functioning of the system for uninterrupted Internet service.

## Branding and Customization:

Easily customize your Internet service branding using Guest Internet features.

## Support and Upgrades:

Enjoy free support and upgrades for your STAR-8 kit. No additional fees or contracts required.

## Remote Management:

Manage your Internet service from anywhere using the Free Cloud account provided with the kit.

## STAR-8 kit

An easy to install kit that provides a community Internet service using your ISP connection

❑ Share or sell an Internet service to a community using Guest Internet to manage the ISP service.

❑ Everything you need in one kit to start providing a community Internet service using your ISP connection.
