## Guest Internet Solutions WAP-1 Managed WiFi Community Internet Service

## Specifications

- **Product Name:** STAR-2 Kit
- **Manufacturer:** Guest Internet Solutions
- **Features:** Managed WiFi, Community Internet Service
- **Languages:** English and Spanish
- **Includes:** GIS-R2 Internet Controller, WAP-1 Dual Band Outdoor Wireless Access Point, Extension Ethernet Cable, Free Cloud Account

## Community Internet Service

### STAR-2 kit

An easy-to-install kit that provides a community Internet service using your ISP or Starlink

- Share or sell an Internet service to a community using Guest Internet to manage the ISP or Starlink service.
- Everything you need in one kit to start providing a community Internet service using your ISP Internet.
- We have a selection of ready-to-use complete kits with full installation instructions, using high-performance products.
- Easy self-install and management of the Internet service, you do not depend on others.
- Multi-language: English and Spanish.
- Print vouchers with access codes to give people access: duration, data speed, and data limits.
- Monitor the service for failures: get alerts.
- Protection from abuse of the Internet service; prevents unauthorized Internet access.
- No other fees, maintenance, license, software, services, or contracts.
- Free support, free upgrades.
- Free cloud service; manage the Internet from anywhere.
- Branding is easy to customize your Internet service.

## **Community Internet using your ISP: easy to install and operate**

Many rural communities around the world had no hope of getting Internet access until now. The Starlink Internet operates almost everywhere in the world and can be shared with homes in a community when the Internet service is managed using a Guest Internet controller. The unique Guest Internet features maintain good Internet performance for many users while ensuring that Starlink requirements are not exceeded.

## **Provide a service to homes with the STAR-2 kit your and your ISP or Starlink antenna**

The STAR-2 kit can provide an Internet service for many homes when connected to your ISP service. The GIS-R2 Internet controller connects to the ISP or Starlink router. The powerful WAP-1 wireless access point connects to the GIS-R2. Mobile devices and homes within a broad range with line of sight to the WAP-1 antenna can connect to the Internet using the STAR-4 home installation kit. The GIS-R2 sets rules for Internet access so that the service from one Starlink antenna can be shared between many people, and to ensure that the Starlink data capacity is not exceeded which may result in a service interruption. The rules include the duration of access, maximum data speed, maximum data volume, and the time at which the service can be used. Access is provided with a voucher that can be printed using the GIS-R2 or using the free Cloud service. The voucher access code has the rules for Internet access. Guest Internet has no other charges, and the equipment is very easy to use, so it is not necessary to rely on an expert to operate the system; anyone can do it.

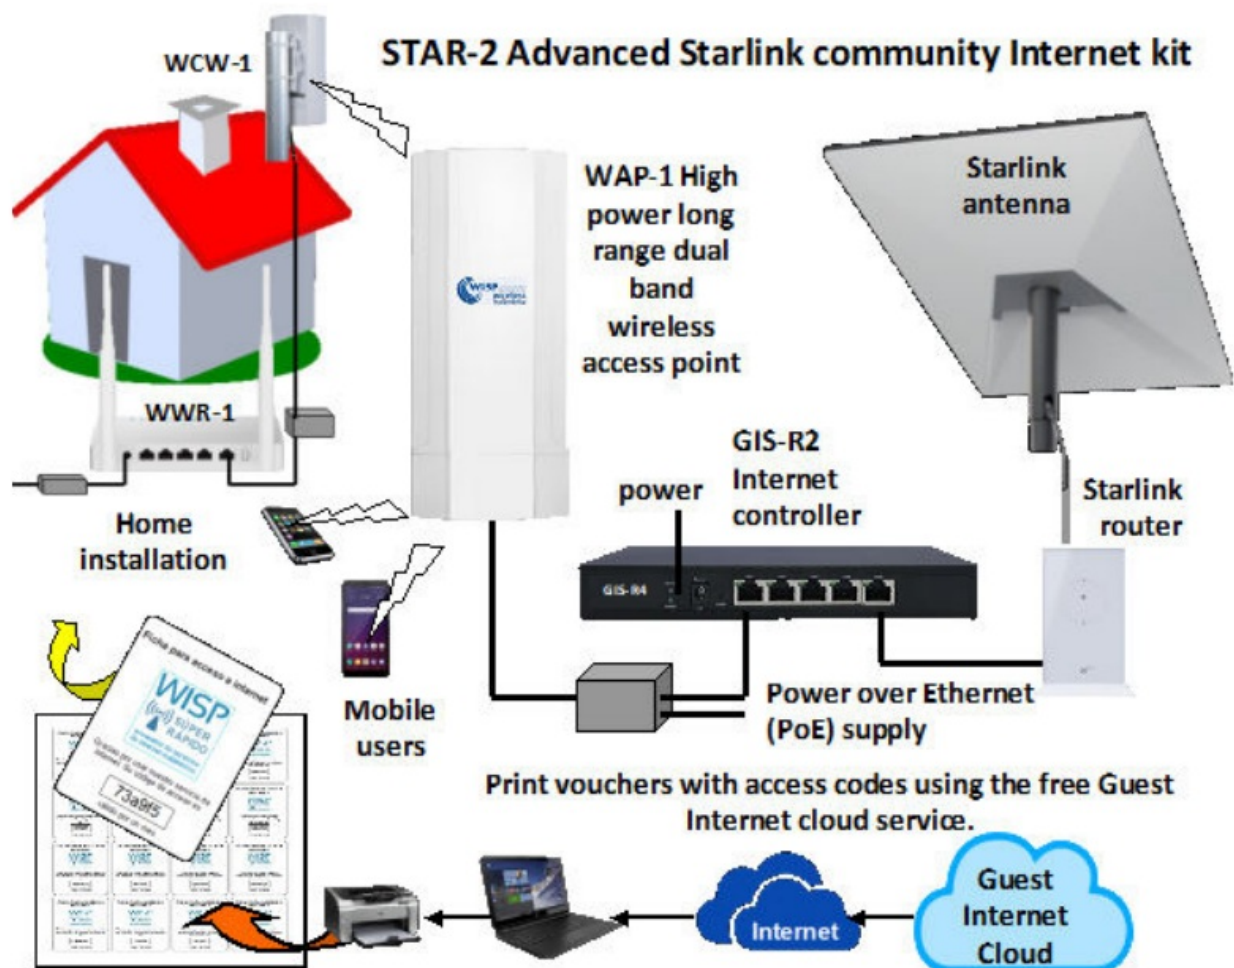

The GIS-R2 is an Internet controller with all the features that are essential to manage the ISP Internet service for many users. The STAR-2 kit includes the powerful WAP-1 wireless access point.

## Items included with the STAR-2 kit

- GIS-R2 Internet controller
- WAP-1 dual-band outdoor wireless access point
- Extension Ethernet cable
- Free Cloud account to manage the service
- Print vouchers using the GIS-R2 or using the Cloud account
