**Community Internet using your ISP**: easy to install and operate

Many rural communities around the world had no hope of getting Internet access until now. The Starlink Internet operates almost everywhere in the world and can be shared with homes in a community when the Internet service is managed using a Guest Internet

controller. The unique Guest Internet features maintain good Internet performance for many users while ensuring that Starlink requirements are not exceeded.

Community Internet Service

- Provide a service to homes with the STAR-4 kit and your STAR kit central antenna
- The STAR-4 kit is a home installation kit that adds additional homes for the STAR-1.
- STAR-2 and STAR-6, and STAR-7 kits. The STAR-4 kit has the components to install two homes and includes full installation instructions.
- Each STAR-4 kit has two WCW-1 rooftop integrated wireless antennas and receivers, and two WWR-1 wireless routers for installation in the home to provide Internet access.
- The only additional item required is the Ethernet cable that connects the
- WCW-1 on the roof to the WWR-1 wireless router in the home. The products are illustrated in the figure below.
- Guest Internet equipment is very easy to uuse so it is not necessary to rely on an 'expert' to operate the system, anyone can do it.

Two products in the STAR-4 kit

IN7620 Wireless router

CPE120 client wireless receiver
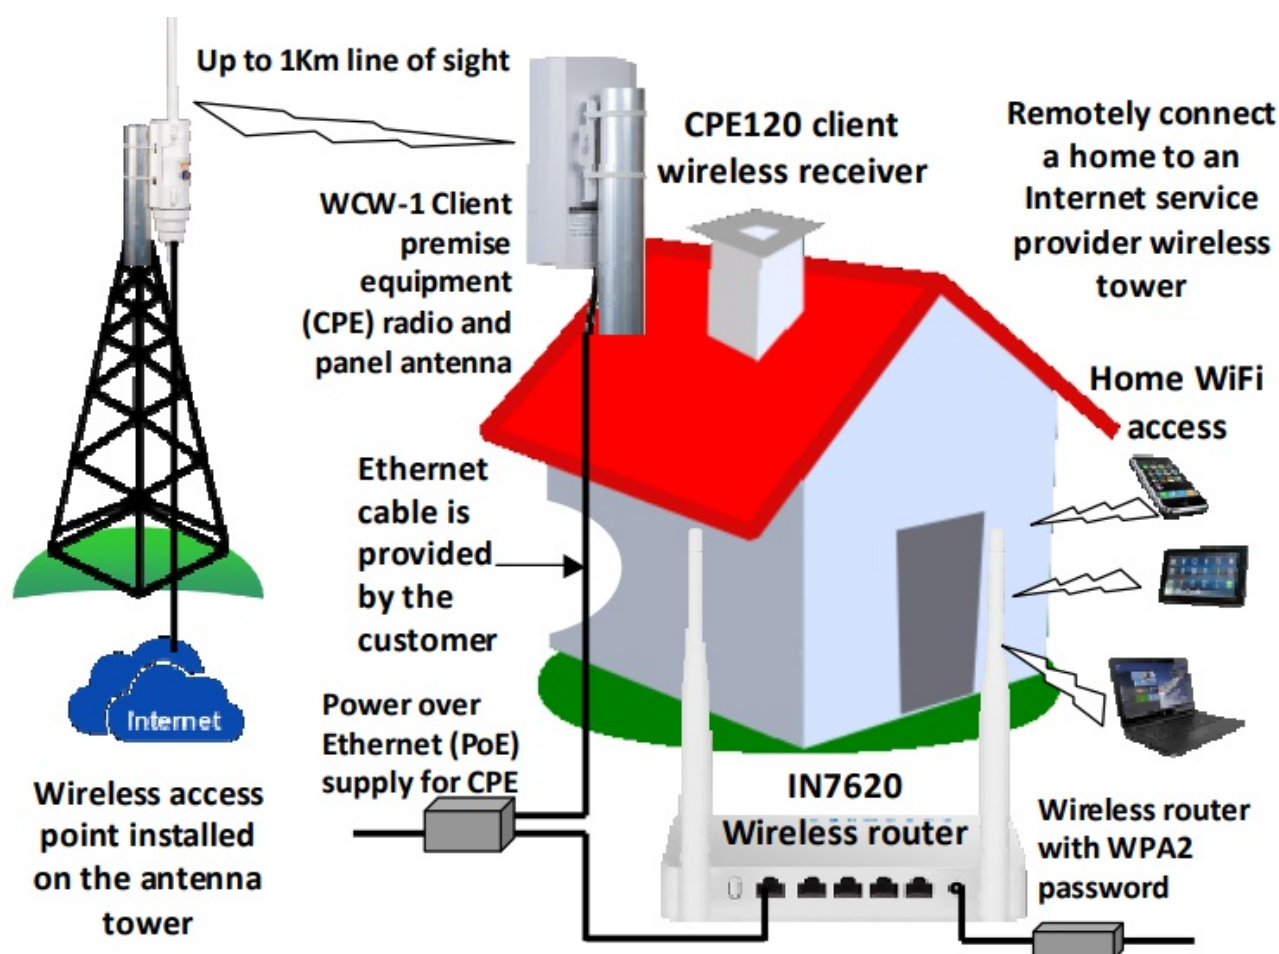

Items included with the STAR-4 kit

- A pre-configured home installation kit with a CPE120 home rooftop antenna and IN7620 wireless router
- Extension Ethernet cable

- Complete guide, how to connect, cconfiguregureProvideovide your Internet service
- The ISP Internet service is not included.

The CPE120 antenna must be pointed towards the transmitting antenna and adjusted for good signal strength. The installer has to provide the Ethernet cable that connects the CPE120 on the roof to the IN7620 wireless router is installed in the home.

STAR-4 home installation kit
