**INT-L G1 Intermediate Large Chew Kit**

1

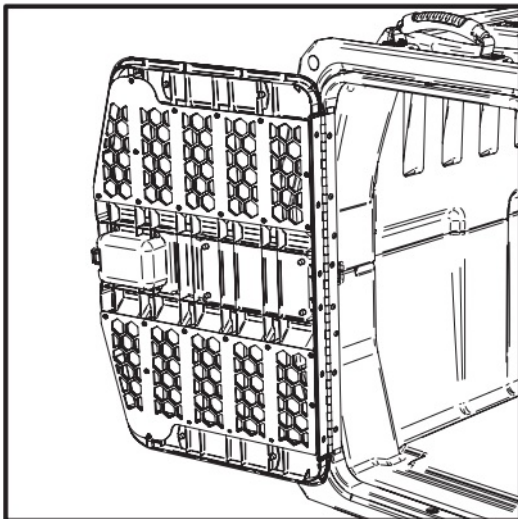

2

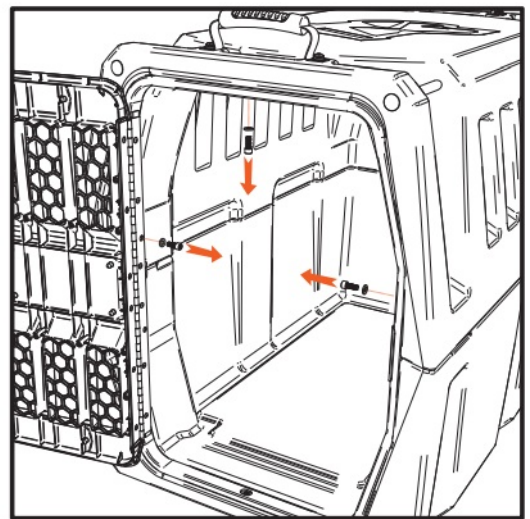

1. To install the Chew Kit on the door remove the screw, and take off the security latch cover. Discard the latch cover.
2. Place grate over windows and align the screw holes. Install the thirteen screws to secure the grate in place

3

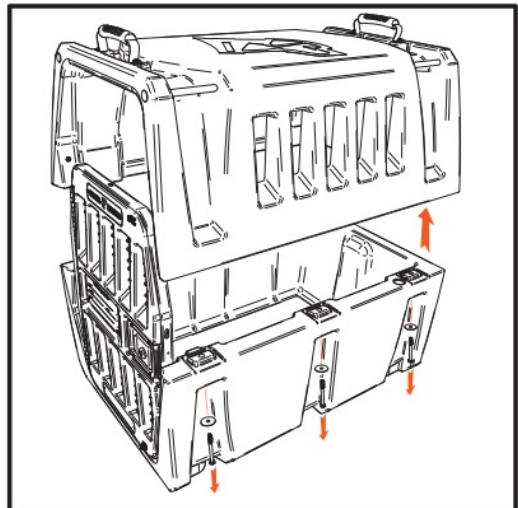

4

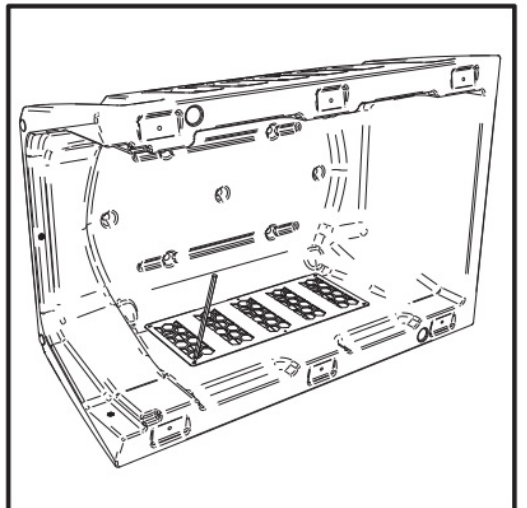

3. Repeat for bottom of door.
4. To install the Chew Kit on the windows remove three cap screws and washers that attach door frame to upper half of the kennel

5

6

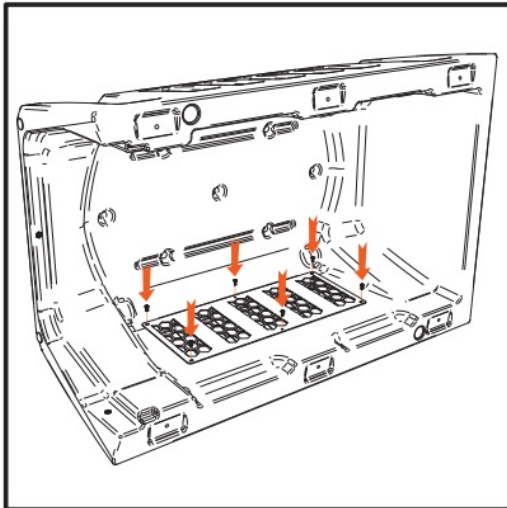

5. Using a 7/16" wrench or ratchet, remove the screws and washers fastening the upper and lower halves of the kennel.

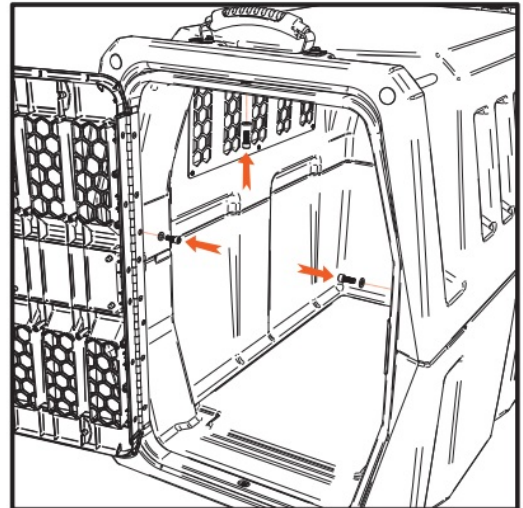

6. Place the window grate on the interior of the kennel. Align the grate with the window openings. Mark the mounting holes.

Repeat for other window(s)

7

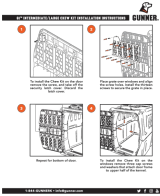

8

7. Insert supplied screws into designed points, and install grates by twisting screws with applied manual force.
8. Reassemble the upper and lower halves of the kennel. Finally, reinstall three cap screws and washers in the door frame.
