Description

OCTAVE employs a novel and warm-sounding octave-up circuit for use in front of fuzz or other distortion pedals. A bit of the fundamental is preserved so tonality doesn't turn into a nasty bee sting. By itself this is not a great-sounding pedal, but when driving something else it becomes absolutely wonderful.

Specifications

Item	Specification
Bypass	True
Gain	6dB
Bandwidth	10Hz to 15kHz
Controls	Level, Tone
Size	5.4" x 2.4" x 2.1"
Input Power	9V to 15V @ 1mA
