## HALCYON S210 3 Circuit Track Adaptor

## Product Information

The product is a track adaptor (S210) suitable for use with Halcyon 3 Circuit track. It is designed for indoor use only. If retrofitting alternative manufacturer track, testing is recommended to ensure compatibility prior to

installation. The plastic spot track adapter has a raised linear lug that should fit on the opposite side of the 3 circuit track raised linear guide to ensure the luminaire sits flat and connects to correct polarity and circuit.

## Product Usage Instructions

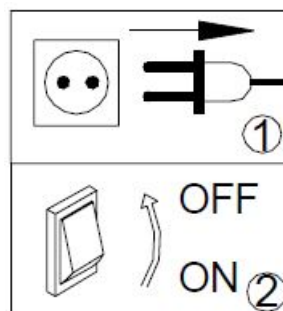

1. Ensure that the product is suitable for use with Halcyon 3 Circuit track and that you are using it for indoor purposes only.
2. If retrofitting alternative manufacturer track, test compatibility prior to installation.
3. When installing the track adapter in the track, take care that it is oriented correctly to avoid damage.
4. Ensure that the raised linear lug on the plastic spot track adapter fits on the opposite side of the 3 circuit track raised linear guide.
5. Select the desired circuit for connection according to FIG-2.
6. Unlock the circuit using the provided lock and switch it to ON position.
7. Carefully connect the luminaire to the circuit ensuring that it connects to the correct polarity and circuit.
8. **Caution:** The surface may be hot. Handle with care.

**Note:** The above instructions are based on VER:1.0 of the product user manual. Please refer to the latest version of the manual for any updates or changes in instructions.

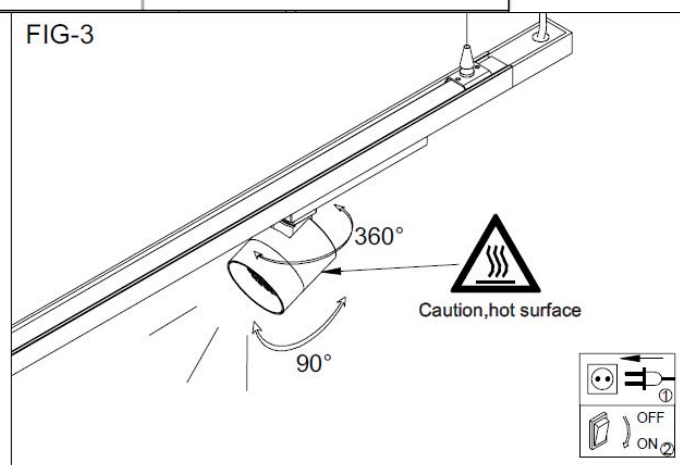

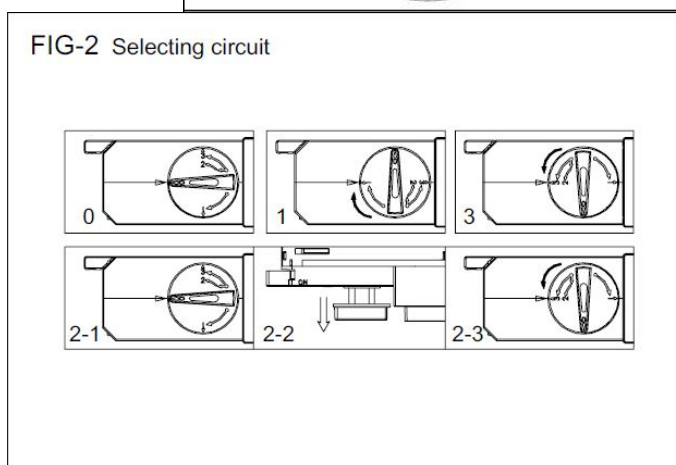

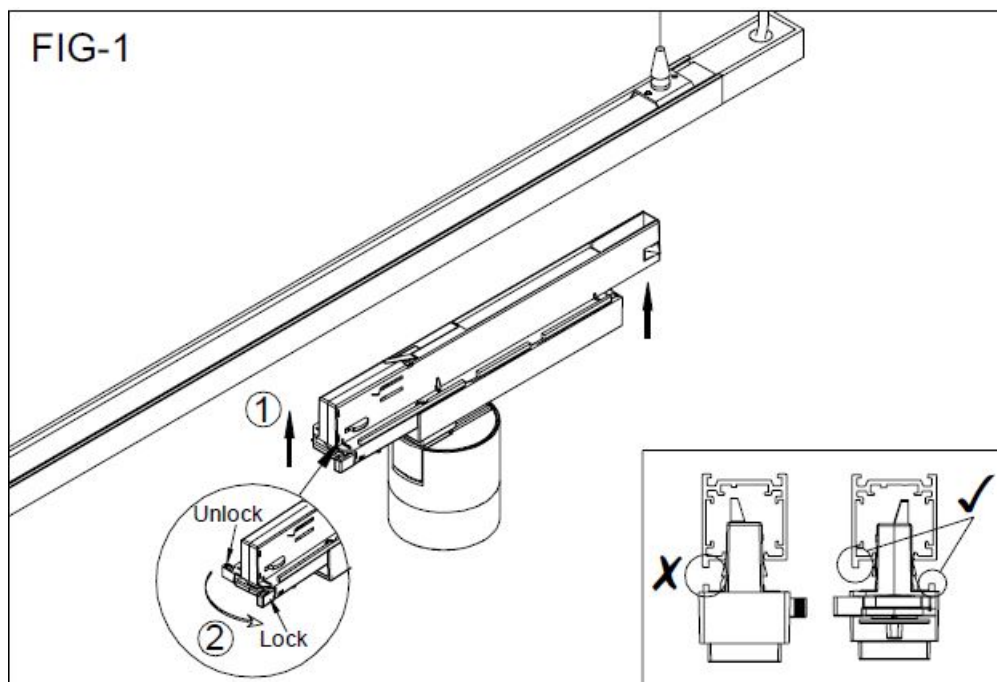

## For indoor use only

Suitable for Halcyon 3 Circuit track. Testing is recommended to ensure compatibility prior to installation if retrofitting alternative manufacturer track. Take care track adaptor is orientated correctly when installing in track to avoid damage. The raised linear lug on the plastic spot track adaptor should fit on the opposite side of the 3 circuit track raised linear guide to ensure the luminaire sits flat and connects to correct polarity and circuit.
