## HAMRON 004685 Mounting Set for Load Carrier 4-pk

### MOUNTING KIT FOR LOAD CARRIERS OPERATING INSTRUCTIONS

Important! Read the user instructions carefully before use. Save them for future reference. (Translation of the original instructions).

### SAFETY INSTRUCTIONS

- Do not exceed the maximum permitted roof load and total weight of the car, see owner's handbook.
- The maximum roof load consists of the total of the inherent weight of the load carriers and the load.
- Distribute the load uniformly over the carrier surface with the lowest possible centre of gravity and secure the load so that it cannot move when driving and braking.
- Check the position of the load and its fastening at regular intervals.
- Do not use elastic fastenings.
- Roof loads change the driving capability and sensitivity to side-winds of the vehicle.
- Special fasteners are needed for bikes.
- Be careful when driving with roof loads that increase the uplift force, such as surfboards and building boards etc.
- Check the screw unions and fastenings after driving a short distance and then at regular intervals. Tighten to the specified torque, where appropriate.
- Adjust your speed to the load on the vehicle.
- Drive safely. Avoid sharp accelerations, braking, and turns.
- For the safety of other motorists and to save energy the load carriers should be removed when not in use.

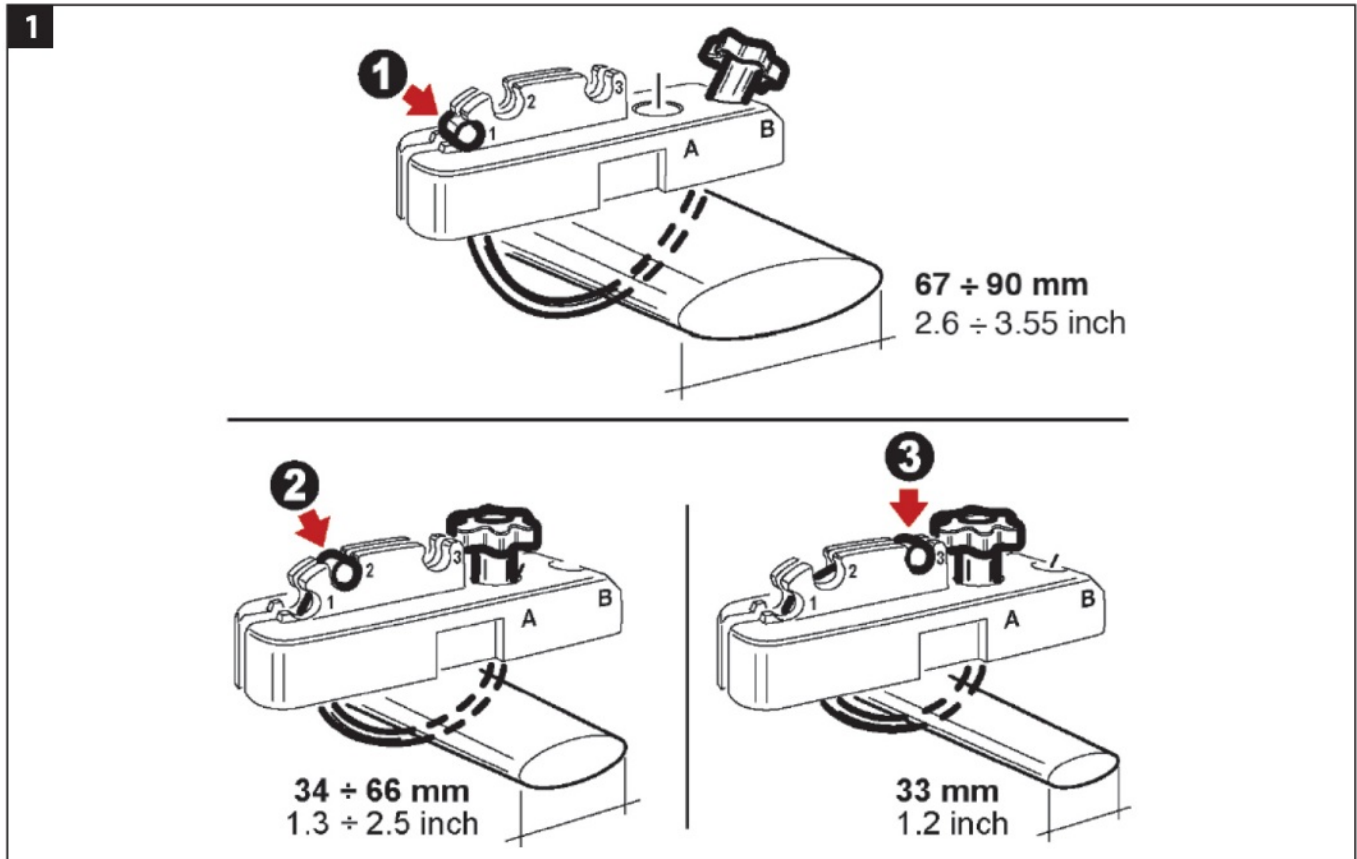

## DESCRIPTION

Universal mounting kit to fasten the roof box to the load carriers on the car. Adapter for load carriers with profile width of 33-90 mm.

## MOUNTING

### NOTE:

Clean the car and take care not to damage the paintwork when fitting.

## MAINTENANCE

- Clean the product at regular intervals and before putting into storage. Use lukewarm water and when necessary a mild detergent. Do not use strong or abrasive detergents.
- Store the product in a dry and safe place when not in use.
