Guideline for your creation

To create a successfull native ad, we would like to give some advice and provide technical specifications.

Language

 Please consider that we run all our websites in German except <u>kunststoffe-international.com</u>. Therefore, we strictly recommend to provide all text elements in German as well.

Title

• The title should be meaningful and not exceed a max. of 60 characters.

Teaser

• The teaser should target the key message of your topic and not exceed a max. of 160 characters.

Copy text

- Impart knowlege to the user and provide information useful for his daily business. The copy text is up to 2,500 characters. By our experience, the user honors a style of writing like an expert editor avoiding marketing buzz words.
- Prefer facts and details illustrating your topic.

Image

- The image will be displayed in various formats and croppings depending on the different teaser placements on the website. We strongly recommend not to use text and / or logos within the image since that might be cropped.
- Please provide the image in the following three versions: 1200×675, 1200×627, and 627×627 pixels

Company logo

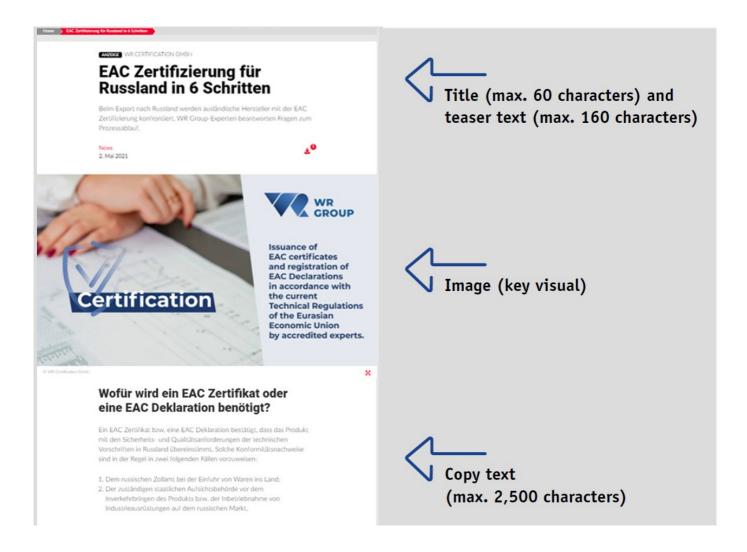

• Please provide your logo in 500×500 pixels.

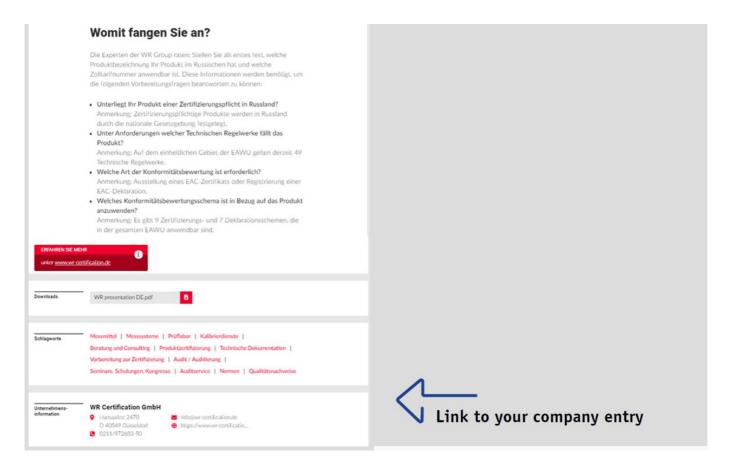

Target URL

• Link to your website for further information.
