## Overview

### Welcome to the Nodestream AVR2

Please read these instructions carefully before using this product and save this quick start guide for future reference. See the User Manual for full details via the QR code on the back page.

### Multi-cast streaming solution

## In the Box

AVR2™

D9 null modem

D9 gender changer

1 x power cable  
(region specific)

1 x HDMI cable

1 x Ethernet cable

## Overview

### Rear Connections

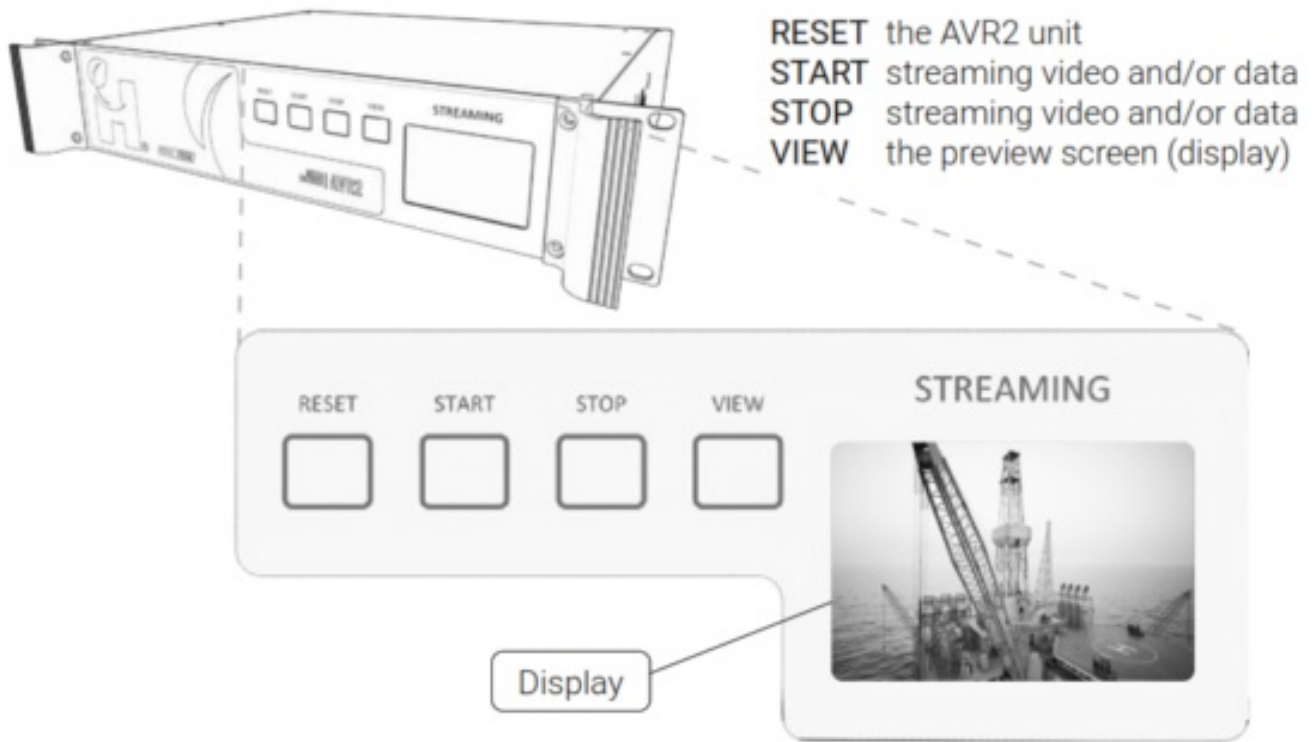

**IMPORTANT:** 100-240VAC 47/63HZ only (UPS Recommended)

For further information on connections, refer to AVR2 User Manual.

### Front Interface

## Installation

The AVR2 is designed to be mounted in a standard 19" rack and occupies 2U of space

Ensure there is adequate spacing around the AVR2 device for cooling. The cool air travels in the direction shown by the arrows.  
No vertical loading on the AVR2 device.

1. Install at all 4 mount points

2. Connect Ethernet, video source input, and power cable

The AVR2 device requires an open Internet connection, refer to the User Manual for information on advanced network configuration.

## Start-Up

1. Switch on the power (on the rear of the AVR2 unit)

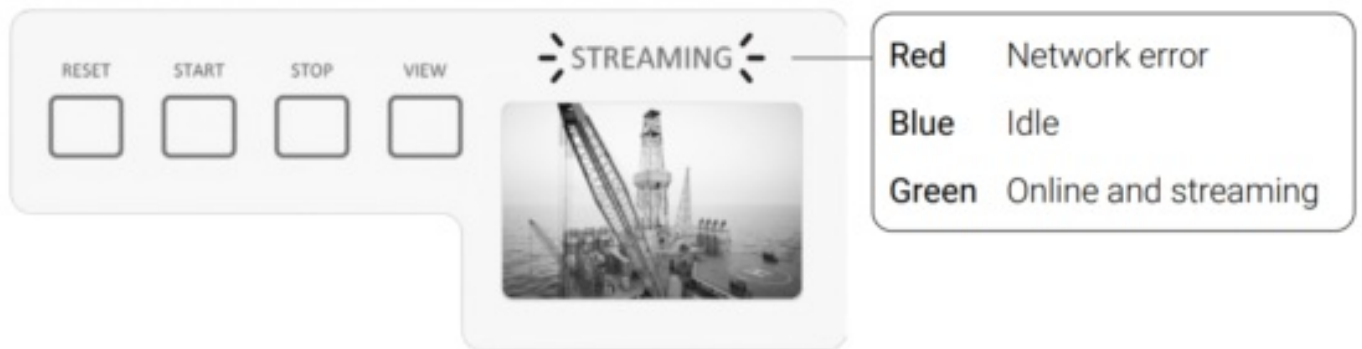

The device is configured to auto-start when AC power is applied.

2. The LEDs on the interface panel turn on and the display turns on

3. Once the unit has powered up, the status is indicated by the STREAMING LED

The display automatically turns off after 5 minutes. Press **View** to wake the display.
