**HAVIT COMMERCIAL HCP Series Single Circuit Track**

## Product Information

### Product Specifications

- **Model No:** HCP-102110, HCP-102120, HCP-102130, HCP-103110, HCP-103120, HCP-103130
- **Material:** Aluminium + Plastic
- **Color:** Black, White
- **Length:** 1m, 2m, 3m
- **IP Rating:** IP20
- **Track Type:** Single Circuit – Surface Mounted
- **Input Voltage:** 240v
- **Protection Class:** 1 (Requires Earth)
- **Max Load:** 8A
- **Warranty:** 5 Years Replacement\*

### Product Usage Instructions

#### Surface Mounted Installation

1. Make sure that the electrical circuit is free of voltage (master switch off)
2. Remove the cover from the live end and set aside
3. Insert Cables into the live end and screw the track into place using the appropriate screws for application.
4. Connect the earth cable first then the Live and Neutral cables
5. Reattach cover to Live end
6. All connections must be carried out carefully, inspect all contacts before switching back on the electric circuit.

#### Track Head Installation

Must be installed by a licensed electrician.

## Installation Instruction

### Steps for Surface Mounted Installation:

1. Make sure that the electrical circuit is free of voltage (master switch off)
2. Remove the cover from the live end and set aside
3. Insert Cables into the live end and screw the track into place using the appropriate screws for application.
4. Connect the earth cable first then Live and Neutral cables
5. Reattach cover to Live end
6. All connections must be carried out carefully, inspect all contacts before switching back on the electric circuit.

### Steps for Track Head Installation:

1. Make sure that the electrical circuit is free of voltage (master switch off)
2. Slide locking pin on base to open position
3. Insert track light into track making sure connection points are on the correct side of the track
4. Slide the locking pin into the closed position
5. Direct light fitting to desired position by twisting left and right or up and down making sure not to twist too far to avoid damaging fitting.

6. Repeat these steps if more than 1 fitting is being installed
7. All connections must be carried out carefully, inspect all contacts before switching back on the electric circuit.
