Hazebase 51700100 PRO 1500 W Base Hazer with DMX Installed Own Case

Product Usage Instructions

Unboxing and Setup

When you receive your Base*Hazer*Pro Hazer, follow these steps to set it up:

1. Open the packaging and remove the hazer and its case.
2. Inspect the hazer for any visible damage. If you notice any, contact customer support.
3. Place the hazer in a suitable location, ensuring proper ventilation.
4. Connect the power cable to the hazer and plug it into a power outlet.
5. If using DMX control, connect the DMX cable to the hazer and the DMX controller.

Operating the Hazer

Follow these steps to operate the Base*Hazer*Pro Hazer:

1. Ensure that the hazer is powered on and ready for operation.
2. If using DMX control, set up your DMX controller according to its user manual.
3. Adjust the desired haze output using the control knobs or DMX controller.
4. Monitor the fluid level and refill when necessary. Refer to the user manual for fluid refilling instructions.
5. After use, turn off the hazer and disconnect it from the power source.

Maintenance and Cleaning

To ensure optimal performance and longevity of your Base*Hazer*Pro Hazer, follow these maintenance guidelines:

- Regularly clean the exterior of the hazer using a soft cloth and mild cleaning solution.
- Check and clean the air filters to prevent clogging.
- Inspect the hazer for any signs of wear or damage. Replace any faulty parts immediately.

- Refer to the user manual for detailed maintenance instructions.

FAQ

- **Q:** Is the Base*Hazer*Pro Hazer suitable for outdoor use?
  - **A:** No, the Base*Hazer*Pro Hazer is designed for indoor use only. Using it outdoors may cause damage to the unit and pose safety risks.
- **Q:** Can I use third-party haze fluids with this hazer?
  - **A:** While it is recommended to use the manufacturer-approved haze fluid, you can use compatible third-party haze fluids. However, using non-approved fluids may affect performance and could void your warranty.
- **Q:** How often should I clean the air filters?
  - **A:** It is advisable to clean the air filters every month or more frequently if you notice reduced haze output or increased noise levels.
- **Q:** Can I control the haze output remotely?
  - **A:** Yes, if you have a DMX controller connected, you can control the haze output remotely by adjusting the DMX settings on your controller.
