  - **A:** No, this device is suitable for non-tropic areas below 2,000 meters.
- **Q:** What should I do if the device falls to the ground?

- **A:** Check for any physical damage and ensure the device is functioning properly before further use.
- **Q:** Can the device withstand extreme temperatures?
  - **A:** It is not recommended to use the device in environments with extreme temperatures as it may affect its performance.

Thank you for your choosing the new device

This guide serves to enable users to get to know and familiar with our product as soon as possible. Here we have made a brief introduction to the key layout and definitions in figures and words.

Precautions before Use

1. This production is suitable for use in non-tropic areas below 2,000 meters.
2. Prevent the device from falling to the ground or being strongly impacted otherwise.
3. Do not use it in the long term in any environment where the air is too cold, too hot (<35°C), too humid or with too much dust. Do not expose the Device to sunlight.
4. Avoid using it in the strong magnetic and strong static environment as much as possible.
5. Once any water or other liquid splashes onto the Device, close it immediately and do not use it until it dries out.
6. Do not clean the Device with any detergent containing chemical element or other liquid to avoid causing damage due to corrosion and becoming damp. If cleaning is really necessary, clean it with dry soft cloth tissue paper.
7. Our company shall not bear any and all responsibilities for loss or deletion of material inside the machine caused due to abnormal software and hardware operation, maintenance or any other accident.
8. Please back up your important material at any time to avoid loss.
9. Please do not disassemble the Device by yourself; otherwise you will lose the right to warranty.

FCC STATEMENT

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. this device may not cause harmful interference
2. this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.

Using the Computer

Before First Use

- Before first use, plug the power adapter into the power port and connect it to a power outlet.
- Connect the keyboard and mouse.
- Ensure that you have a good Wi-Fi connection, with your network name and password available.

Startup

Press the power button to turn on the computer.
Wait for the Desktop screen to appear.
The computer is now ready for use.
During the first use, the startup guide will help you set up the device:

- Language
- Date and time
- Wi-Fi connection
- Location services options
- Third-party applications
- Necessary updates
- Account synchronization

Starting And Shutting the Computer

Starting the Computer

- Press the power button and wait for the screen to turn on.
- Wait for the desktop screen to appear;
- The computer is now ready for normal use.
Shutting the Computer

- Press the start button and click on the power icon. You will then be given the options to shut down, sleep, or

restart.

Screen Settings

Turning the Screen On or Off

- When the computer is on, you can turn off the screen to conserve power and protect the screen. Simply press the start button and click on the power icon, then choose sleep.
- It is strongly recommended that you sign into/register for a Windows account (needed for the installation of new apps).
- When prompted it is also recommended that you agree to backing up your computer. This creates copies of all of your files should you ever need to restore the computer.

Connect to a Wi-Fi network

The Notification bar displays icons that indicate your computer internet status.

- Connected to a Wi-Fi network (waves indicate connection strength).

- There are no Wi-Fi networks in range, or the Wi-Fi is not connected.

Open the Settings menu by pressing the start button and clicking on the cog / settings icon
Select your network from the list of available networks. You will be prompted to confirm the connection. Click "Connect" to confirm
If the network is protected (indicated by a lock icon), you will be prompted to enter a password or other credentials.
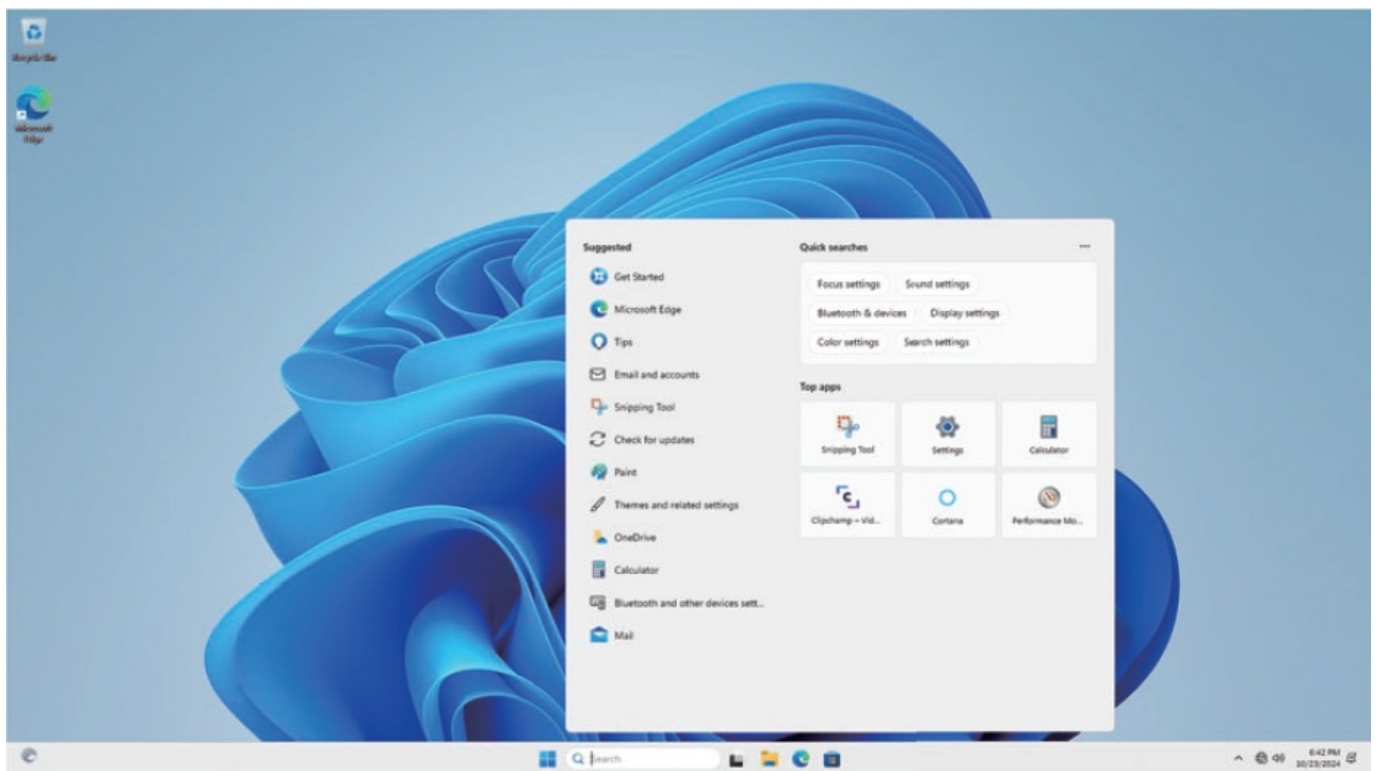

Warning

- There are no Wi-Fi networks in range, or the Wi-Fi is not connected.

## User Interface
