User Notice

This camera is required to use a TF high-speed card (multimedia memory card) of U3 or higher. Memory card instructions

- When the memory card is first used, please make sure that the memory card is formatted first when the card has the data or other images that the camera can't identify.
- Please turn off the camera before inserting or removing the memory card.
- If the memory card performance degradation, need to buy a new memory card. Please know that using the memory card multiple times will degrade its performance.
- The memory card is a precision electronic device. Do not bend the memory card and avoid falling or being stressed.
- Do not place the memory card in strong electric or magnetic environments, such as near a speaker or television receiver.
- Do not use or leave the memory card in an overheated or under-cooled environment.
- Keep the memory card clean and avoid touching any liquid. If the memory card is touching the liquid, wipe it dry with a soft cloth.
- When the memory card is not in use, place it in the card sleeve.
- Please note that the memory card will become hot after prolonged use. This situation is completely normal.
- Do not use the memory card with other digital cameras. If you want to use a different memory card with your camera, format it first.
- Do not use a memory card formatted on another digital video camera or card reader.
- If the memory card is in one of the following conditions, the recorded data may be damaged:
 - The memory card is not used properly.
 - When recording, deleting (formatting), or reading, the power is turned off or the memory card is removed.

3. Short press the power button to turn on Wi-Fi, and short press again to turn off Wi-Fi. The Wi-Fi name is different for each item and all password is 1234567890. The below picture is only for reference.

WIFI turned on but not connected

WIFI have been connected

Computer download photo/video

After the camera is connected to the computer and enters the removable disk mode, a removable disk will be added in the “My Computer” window. The captured photos or videos will be stored in the “JPG\VIDEO” directory on the removable disk. You can enter and copy the files to your computer’s hard drive.

Note: Do not disconnect the USB connection during the download of the file. The memory card

cannot be inserted or removed during a USB connection to avoid data loss. If The computer sets this USB connection in camera mode, the computer cannot detect the removable disk.

WIFI APP Connection

Before using the wifi function, please install the “iSmart DV” APP program on your smartphone or tablet.

Remarks:

For Android smartphones, please search for “iSmart DV” on Google Play and install to use it. For IOS smartphones, Please download them from the app store by searching “iSmart DV”.

Connection steps:

1. After tuning on, short press the power button, and there will be a message “WIFI Waiting Connection” Icon that appears on the screen.
2. Open the wifi connection on the phone, search for the WIFI name “Action Cam_xxx” and connect it (the original password is 1234567890);
3. Click on the “iSmart DV” app to preview the picture being taken in real-time on the app. Photo, file playback/delete, etc.
4. You can also scan the following QR code with your mobile phone to download:

<http://www.ligoor.com/app/ismartdv/ismartdv.html>

Android/IOS

Note: You can search “iSmart DV” and download the app from the app store for IOS and Google Play for Android

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.a
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure condition without restriction.
