If you have any questions or comments about the product, please contact: carl.adrian.xq@gmail.com

Please read the manual carefully before use

Recommend keeping this manual for future reference.

Compatibility Note

- Please make sure your car supports wired Android Auto
- Required an Android smartphone that support latest Android Auto function.
- Required Android 11 or higher of the Android operating system

How to confirm if your car has Android Auto function

Method 1:

Connect your Android Smartphone to your car by USB data cable and see Android Auto logo on your car display.

Method 2:

Check the compatible list below or check with your car manufacturer to see if your car has this capability:

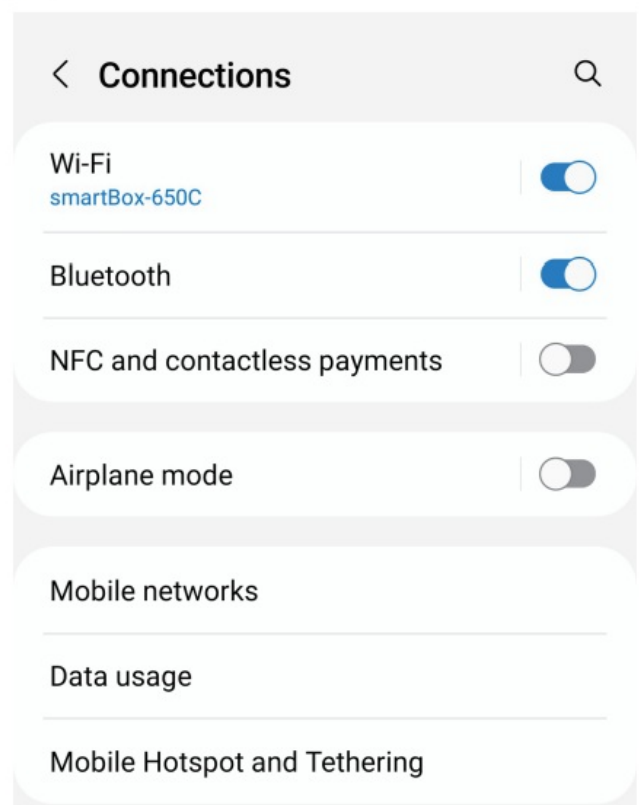

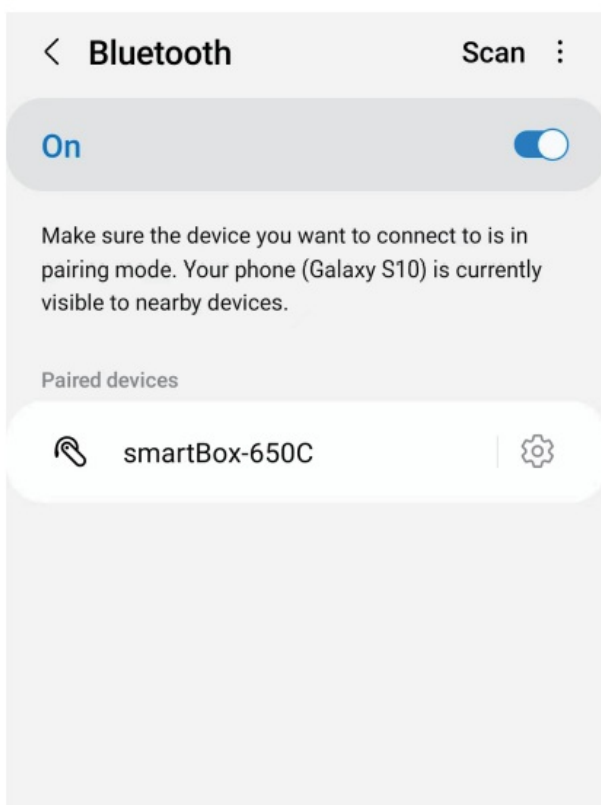

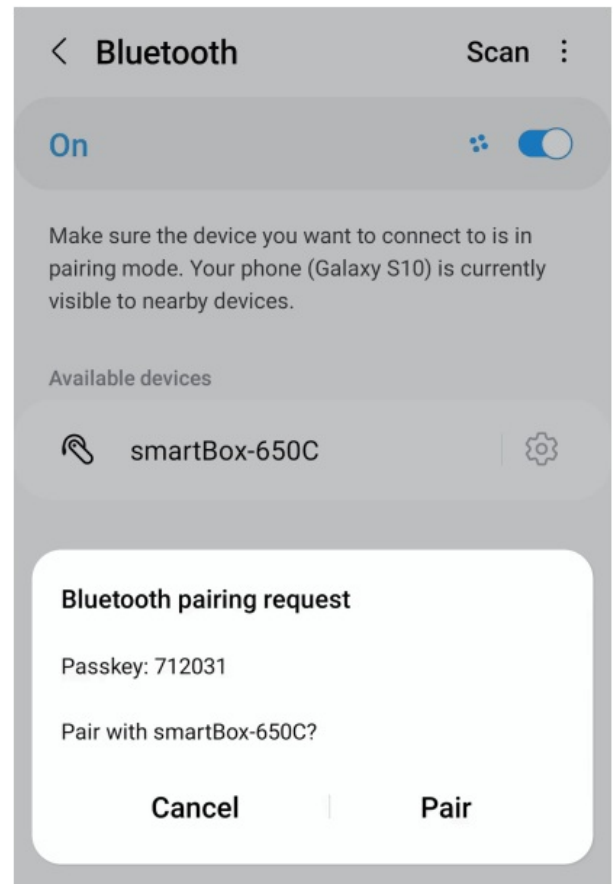

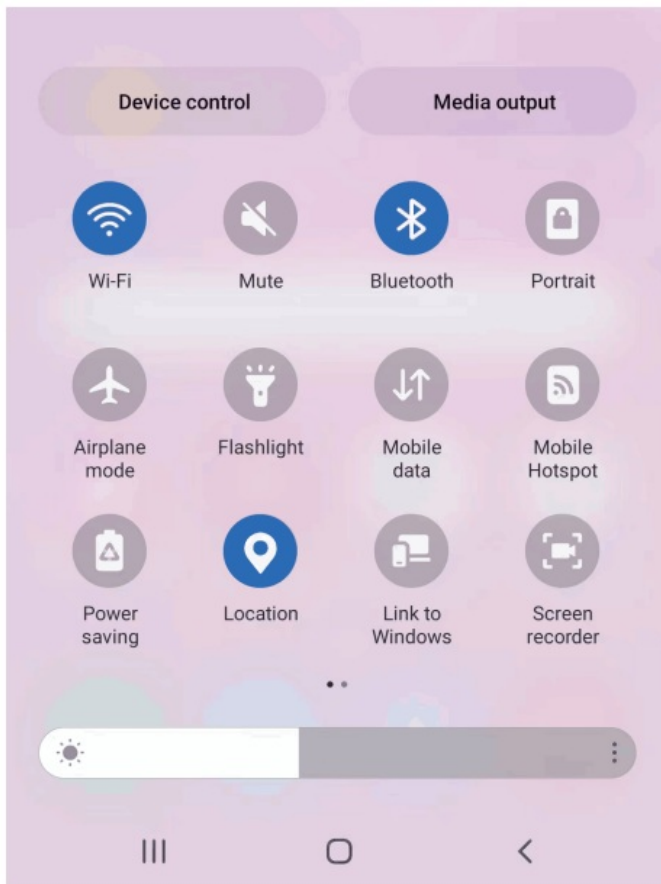

Check out the website for supported car models:

<https://www.android.com/auto/Compatibility#Compatibility-vehicles>

How to use

1. Start the car and wait for the car head unit system to be loaded
2. Connect the Wireless Android Auto adapter to the USB-A or USB-C port in your car. please be sure plug the adapter into the port that is for wired Android Auto.
3. Open WIFI and Bluetooth on your Android smartphone and find the Bluetooth named "saltbox-"; Click on 'Pair'; Click on 'Allow'; Click on 'Use Android Auto'

4. You are ready to enjoy your wireless android auto adapter.

Please note

1. The wireless Android Auto adapter working principle is uses Bluetooth to establish a pairing between the Android smartphone and the vehicle, then switches to using WiFi to maintain the wireless connection. After the Bluetooth pairing is successful, the Android smartphone WiFi will automatically connect to the adapter's WiFi,

and then disconnect the Adapter Bluetooth connection and automatically connect to your vehicle Bluetooth by default.

2. Please ensure wireless Android auto Adapter power indicates blue light is on.
3. Please ensure that your car models supports wired Android auto

Package list

1x Wireless Android Auto Adapter
1x USB-A OR USB-C OTG Adapter
1x 3M Sticker
1x User Manual

FQA

1. What is the Wi-Fi password for the Wireless Android Auto Adapter?

we need to connect the bluetooth, not Wi-Fi. After Bluetooth matching is successful, WiFi will automatically connect. So no need Wi-Fi password. Make sure your Wi-Fi is turned on and unoccupied when pairing.

2. After pairing Android Auto adapter, can not start or compatible/ can not recognize the USB

1) If your car has use the android auto function for the first time, please use your data cable to connect your phone to activate android auto through a wired method 2) Please make sure that android auto on your android phone is the last version. If not, please log in to your google play account to update to the last test version. 3) Please turn off the bluetooth of your phone and enter the mobile application management to search auto to clear the auto cache. After the clearing is completed, Restart the adapter and reconnect to bluetooth.

3. Audio input or output issues: calls rejected or forwarded to voicemail / no play sound/ microphone not working/ music playback interrupted or paused/ voice functioning abnormally...

4. The indicator light of the adapter is still on after the car is turned off.

Because the car does not cut off all power immediately when it is turned off, the adapter's light will not go out immediately, but it will take a while. Please rest assured that its power consumption is minimal and will not drain the car battery.

5. When use the wireless Android Auto Adapter whether Mobile Phone can use other internet wifi

When enjoying the wireless android auto adapter function, the phone's WiFi will be occupied by the adapter. So you can not use other internet at the same time. You only can use your phone SIM card internet.

6. Unable to automatically reconnect

1.) Please make sure that the Bluetooth and Wifi functions of your mobile phone are turned on and the Bluetooth is not occupied when you get in the car. 2.) Clear the pairing record, restart the phone and repair the adapter

7. Can the adapter be paired with multiple android Smartphones

The adapter can be paired with maximum five phones, but only one device can be connected at a time. If you would like to pair it with a new phone, please cancel the current connection first. Please note, by Bluetooth function default, the adapter's system will only auto-connect back to the last used phone.

8.Can't find the Bluetooth and Wi-Fi of the Android Auto Adapter?

Please make sure wireless Android auto adapter power indicates blue light is on and Be sure plug the adapter into the port that is for wired Android auto. If convenient, Please test it with another Android Phone. If only a specific Android phone cannot find the Bluetooth or Wi-Fi of the adapter, please try to reset the network and bluetooth settings of this Phone and then restart the phone once, if the same problem happens on other Android Phone, It will be defective, please let us know.

9.Whether Wireless Android auto Adapter support Youtube Video

Can support You tube .Please follow operation: Opne Google Browser and type

Setting Video link: <https://www.youtube.com/watch?v=m8xHyEI9zXY>
