**HELIOS 500A Low Voltage Power Advanced FleXbus**

## Product Information

### Specifications:

- **Product Name:** FleXbus Advanced
- **Manufacturer:** Helios Power Solutions
- **Website:** [heliosps.com](https://heliosps.com)
- **Contact Information:**
  - **Australia:** [sales-au@heliosps.com](mailto:sales-au@heliosps.com), +61 2 7200 9200
  - **Asia:** [sales@heliosps.asia](mailto:sales@heliosps.asia), +65 6871 4140
  - **New Zealand:** [sales-nz@heliosps.com](mailto:sales-nz@heliosps.com), +64 9 835 0700
  - **Middle East:** [sales@heliosps.asia](mailto:sales@heliosps.asia), +971 4 401 8484

### Product Usage Instructions:

#### Fix Supports

Fix half supports directly on the wall, ceiling, or on a cable tray using suitable mounting configurations (Flat/Edge).

#### Connect FleXbus Conductor

Connect the ready-to-use FleXbus conductor with pre-punched holes on the switchboard.

#### Install Conductors

Install conductors into the supports and mount the top part of the supports securely.

#### Strip and Cut Conductor

Strip FleXbus conductor and cut any excess length using appropriate tools like FleXbus Scissors.

#### Connect to HCBC Clamp

Connect the FleXbus conductor with HCBC clamp and plate for secure connections.

### Optional Accessories:

- IP2x Boots for additional protection
- IP55 Conductor Entry for specific requirements
- Fire Barrier for enhanced safety

### FAQs:

- **Q: Can I use the FleXbus Advanced on any type of surface?**

A: Yes, you can fix the supports on the wall, ceiling, or cable tray using appropriate mounting configurations.

- **Q: Are the optional accessories necessary for installation?**

A: The optional accessories like IP2x Boots, IP55 Conductor Entry, and Fire Barrier are recommended for specific use cases to enhance safety and protection.

## FleXbus Advanced

### Installation Guide

#### Easy and quick installation sequence overview

- Fix half supports directly on the wall, ceiling or on cable tray
- Connect the ready-to-use FleXbus conductor with pre-punched holes on side switchboard

- Install conductors into the supports and mount the top part of the supports
- Strip FleXbus conductor and cut FleXbus conductor excess length

3

4

- Connect FleXbus conductor with HCBC clamp and plate

5

- Optional IP2x Boots

Optional

- Optional IP55 Conductor Entry
- Optional Fire Barrier

Fix supports directly on the wall, ceiling or on cable tray (wire basket/perforated/cable ladder). Use multiple possible mounting configurations to fit your installation (Flat/Edge)

# 2

Connect the ready-to-use Flexbus conductor with pre-punched holes to the switchboard. This connection can be made directly onto the busbar or circuit breaker with optional palm extenders

# 3

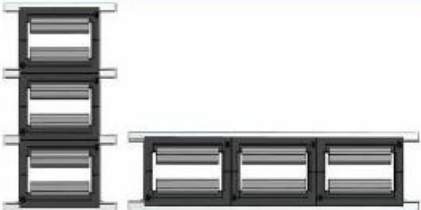

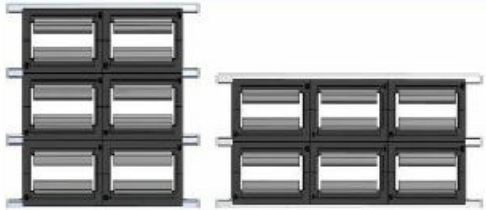

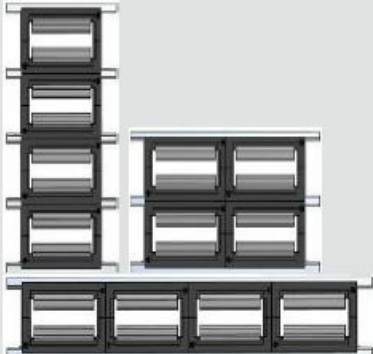

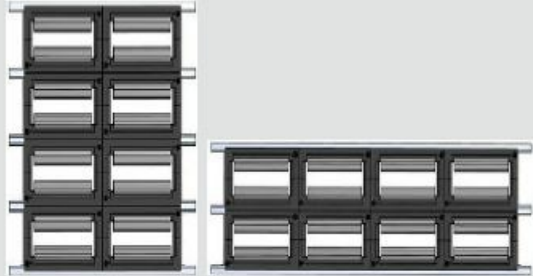

Install conductors into the supports and mount the top part of the supports. Leave excess conductor length at the top of the transformer/power supply.

| Configuration | On Edge Support Kit   |  |
|---------------|---|--|
|               | 1 Conductor per Phase  | 2 Conductors per Phase  |
| 3P            |                        |                          |
| 3P+N          |                        |                          |

| Flat Support Kit |   |  |
|------------------|---|--|
| Configuration    | 1 Conductor per Phase —   | 2 Conductors per Phase =   |
| 3P               |  |  |
| 3P+N             |  |  |

4

Strip FleXbus conductor. Cut excess length of the FleXbus with scissor shears

5

Connect Flexbus conductor with HCBC clamp and plate

## Optional IP2x Boots

Optional

## Optional IP55 Conductor Entry

Optional

Optional Fire barrier
