HELVIA STILE B200S – STILE B200P Gooseneck Microphone Universal Bases User Manual

Please read this manual carefully and keep it for future reference

Unpacking

Thank you for purchasing your STILO B200S / B200P base. Carefully unpack the carton and check the contents to ensure that all parts are present and in good conditions:

- 1x STILO B200S or B200P base
- This User manual

Features and Size

STILO B200S / B200P is a universal base for gooseneck microphones designed for positioning on tables or desks.

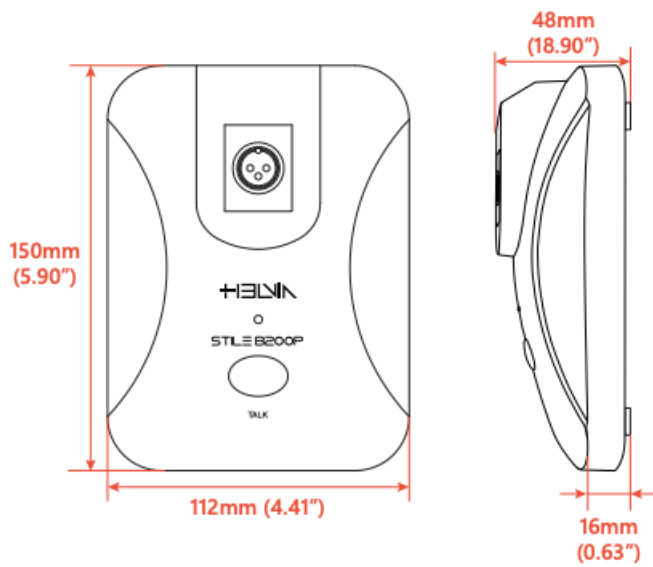

It weighs 410g (14.46oz.) and assures high stability even in case of accidental bumps against the microphone. The base is equipped with a On-Off switch (STILO B200S) or Push-to-Talk button (STILO B200P), and green light.

It features 2x 1.5V AA type batteries (not included) to power any condenser or back-electret capsules with 3V Phantom Power. It also accepts any external Phantom power up to 48V coming from the output audio cable.

Features

- Designed for high stability of gooseneck microphone placement
- 410g (14.46oz.) heavy base
- Balanced XLR Input and Output Connectors
- On-Off switch (STILO B200S) / Push-to-Talk button (STILO B200P)
- 3V internal Phantom Power with batteries
- Accepts external +48V Phantom Power

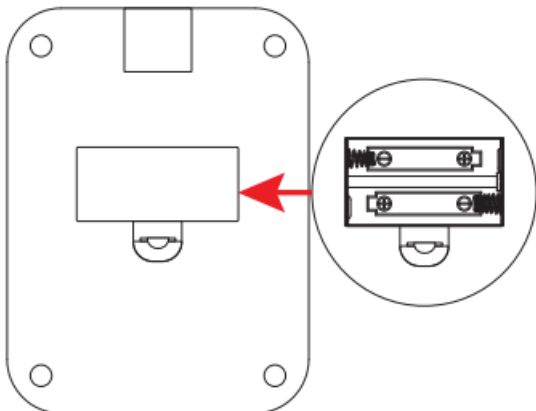

Size

Operating Suggestions

- Microphone head should not be toward speakers, in order to avoid feedback effect.
- Pay attention during gain/volume adjusting, in order to avoid feedback.
- In order to avoid overstretching, wear and tear, never bend the gooseneck more than 90°.

Battery Installation

- Use 2x 1.5V AA-Type Alkaline Batteries.
- Open the cover on base bottom.
- Insert the batteries following the "+" (plus) and "-" (minus) signs shown inside the battery slot.
- Close the cover.
