HENCO CU-6ZONEB-H Hence Logic Control Unit

Specifications

Feature	Detail
Model	CU-6ZONEB-H
Brand	HENCO
Zones Controlled	6 Zones
Power Supply	230V AC, 50 Hz
Max Current Load	Typically 3 A (check product manual)
Relay Output	For each zone (pump, boiler control)
Mounting Type	DIN rail or wall mount
Indicator LEDs	For each zone's status
Actuator Compatibility	230V thermal actuators
Housing	Plastic enclosure
Certifications	CE certified

Key Features

- Controls up to 6 separate heating zones
- Compatible with room thermostats and thermal actuators
- Integrated LED indicators for quick zone diagnostics
- Centralized logic ensures energy-efficient heating
- Output terminals for pump and boiler control
- Overheat protection and fault diagnostics
- Modular design for easy installation and scalability

Usage

- Home underfloor heating systems
- Small office heating control
- Renovation or retrofit heating solutions
- Zoned comfort customization

Product Details

- **Installation:** Simple wiring with clear labeling
- **Operation:** Thermostats signal the control unit, which activates the corresponding actuators and pump.
- **Maintenance:** Minimal; visual inspection and testing of relays recommended annually

Safety warnings and operating instructions

This product should be installed preferably by a qualified professional. All instructions in this Installation & Operation manual should be observed when working with the controller. Failures due to improper installation, improper use or poor maintenance are voiding manufacturer liability.

FAQs

• What thermostats work with the HENCO CU-6ZONEB-H?

Any 230V room thermostats with on/off control logic are typically compatible.

• Can I control a pump or boiler with this unit?

Yes, it includes output terminals for both pump and boiler relay activation.

• Is it expandable beyond 6 zones?

No, this model is fixed at 6 zones, but multiple units can be installed in parallel.
