INTRODUCTION

HSL KM Switch

View and work simultaneously with multiple computers connected to multiple displays using one set of USB, audio, keyboard and mouse peripherals.

Keyboard Mouse (KM) switch offered by HSI allows interacting with multiple computers in real-time while maintaining the highest isolation between computers and peripherals. Directly connect separate display(s) to each computer and effortlessly share keyboard, mouse, audio and USB devices through the KM. obviate the need for purchasing and installing dedicated, percomputer peripheral sets.

This guide instructs how to install, configure and operate a HSI KM switch.
