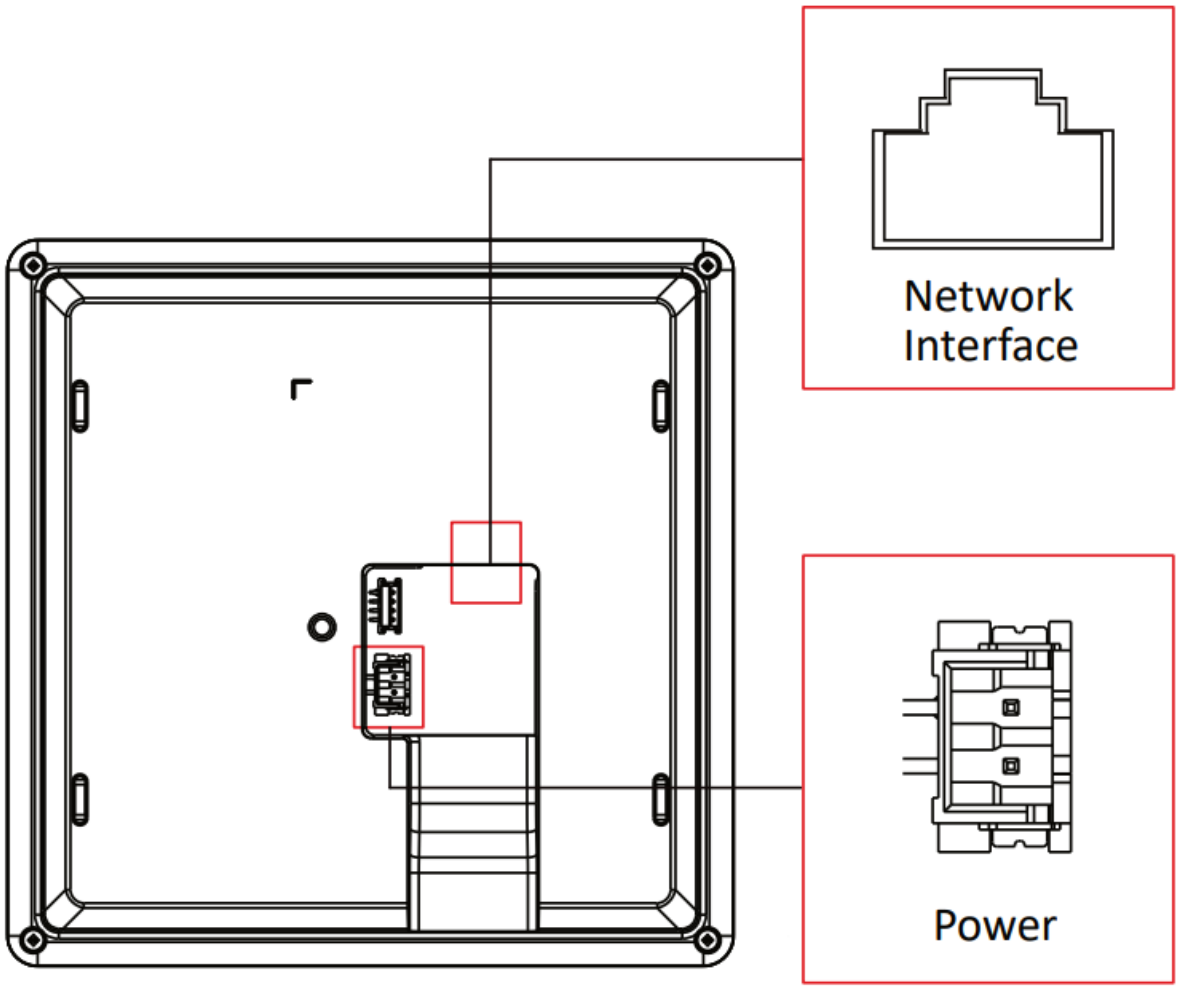
YASIN POST INCOMPLET

Wiring

There is one network interface and one 12 VDC power interface on the rear panel of the indoor station.

Note: You can power on the device via the power interface with 12 VDC power supply. Or you can power on the

device via standard PoE through the network interface.



Installation

Devices support wall mounting.

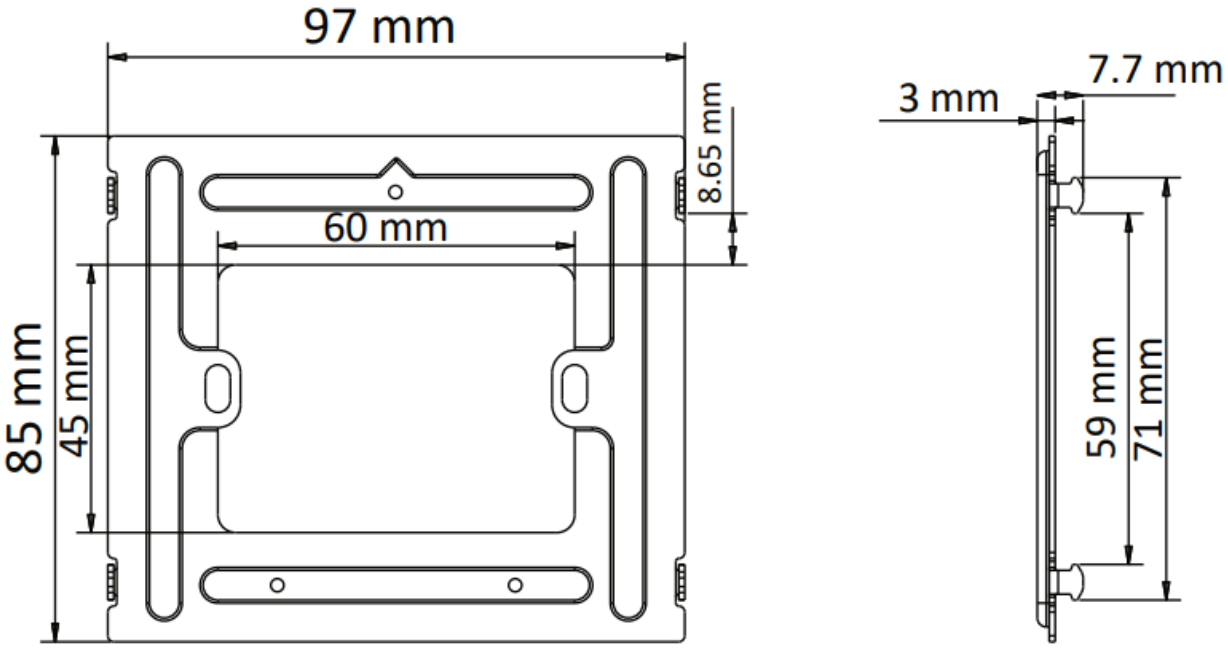
Installation Accessory Description

The wall mounting plate and junction box are required to install the indoor station onto the wall. The dimension of the mounting plate is shown as below.

The mounting plate is supplied. The junction box is not supplied.

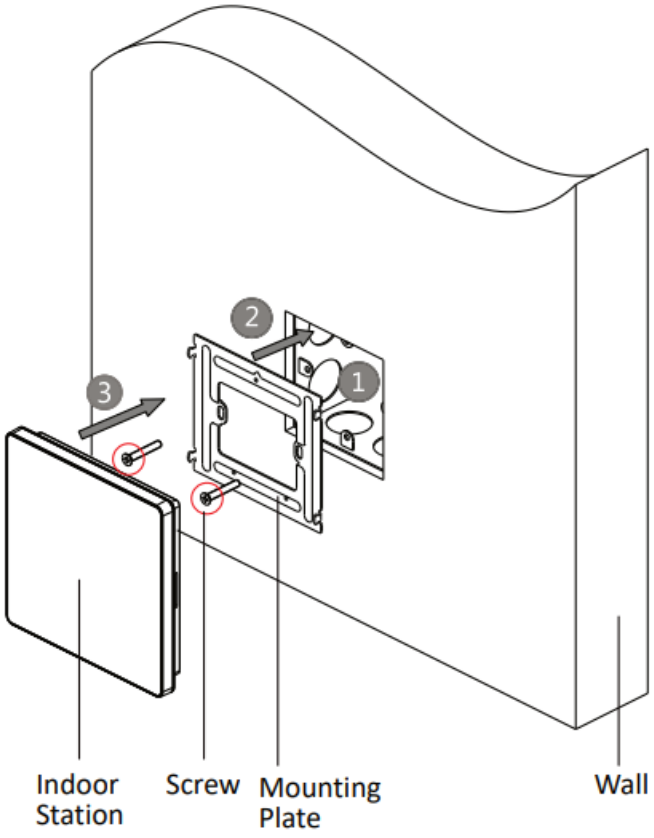
Before You Start

Make sure the device in the package is in good condition and all the assembly parts are included.
The power supply the indoor station supported is 12 VDC. Or the standard PoE is supported. Please make sure your power supply matches your indoor station.
Make sure all related equipments are powered-off during the installation.
Check the product specification for the installation environment.



Wall Mounting with Junction Box

1. Chisel a hole in the wall. Insert the junction box to the hole.
2. Fix the wall mounting plate to the junction box with 2 SCKM4X25 screws.
3. Hook the indoor station to the wall mounting plate tightly by inserting the plate hooks into slots on the rear panel of the indoor station, during which the lock catch will be locked automatically.



Activation and Quick Operation

Activation of DS-KH6110-WE1 After powering on, the device will automatically enter the page of **Language**

Settings.

1. Select language and tap OK.
2. Create an activation password and confirm the password. Tap OK.

Quick Operation of DS-KH6110-WE1

After setting language and activation password, you will need to finish a quick operation by following the wizard.

1. Set password reset method and tap Next.
   – Enter the Reserved Email address, and then you can reset the password by email. Tap Change to Security Question to modify the password reset method.
2. Set Network parameters and tap Next.
3. Configure the Indoor Station and tap Next.
4. Enable Wi-Fi function, select a Wi-Fi and enter the password to link. Tap Next.
5. Set Time parameters and tap Next.
6. Tap to enable the Hik-Connect Service and tap Next.
7. Select a door station from the list or enter the serial No. to search for the device. Tap the selected device to link. Tap Next.
8. Tap to enable Indoor Extension. Select an extension from the list or enter the serial No. to search for the device. Tap the selected device to link.
9. Tap Finish to save the settings.

Activate DS-KH6100-E1/DS-KH6000-E1 via iVMS-4200 Client Software

You can only configure and operate the device after creating a password for the device activation.

1. Power on the device.
2. Run the client software, click **Maintenance and Management → Device Management → Device** to enter the page.
3. Click Online Device to show the online device area. The searched online devices are displayed in the list.
4. Check the device status (shown on **Security Level** column) and select your device.
5. Click **Activate** to open the Activation dialog.
6. Create a password in the password field, and confirm the password.
7. Click **OK** to activate the device.

STRONG PASSWORD RECOMMENDED–

We highly recommend you create a strong password of your own choosing (using a minimum of 8 characters, including upper case letters, lower case letters, numbers, and special characters) in order to increase the security of your product.

And we recommend you reset your password regularly, especially in the high security system, resetting the password monthly or weekly can better protect your product.
