**Precaution!**

The Powder Coating paint process has become the most common and widely used application in the outdoor furniture category. Unfortunately, powder coating is extremely sensitive to Humidity and Moisture. A simple process to protect your furniture, especially flat surfaces is to apply a simple coat of good quality car wax prior to using. If this process is done every few months it will protect your furniture for years to come.

## HARDWARE CONTENTS

## SAFETY INFORMATION

Please read and understand this entire manual before attempting to assemble, operate or install the product. This appliance has been tested to and complies with the ANSI Z21.97-2010, Outdoor Decorative Gas Appliances CGA CR 9 7-003 Outdoor Gas Fireplaces. The installation must conform to local codes or the absence of local codes to the National Fuel Gas Code, ANSI Z223.1. This manual contains important information about the assembly, operation, and maintenance of this fire pit. General safety information is presented in these first few pages and is also located throughout the manual. Keep this manual for future reference. This manual should be read in conjunction with the labeling on the product. Safety precautions are essential when any mechanical or propane-fueled equipment is involved. These precautions are necessary when using, storing, and servicing. Using this equipment with the respect and caution demanded will reduce the possibility of personal injury or property damage. The following symbols shown below are used extensively throughout this manual. Always heed these precautions, as they are essential when using any mechanical or fueled equipment.

## DANGER

- DANGER indicates an imminently hazardous situation that, if not avoided, will result in death or serious injury.
- Failure to comply with the precautions and instructions provided with this fire pit can result in death, serious bodily injury, and property loss or damage from hazards of fire, explosion, burn, and asphyxiation. and/or carbon monoxide poisoning. Only persons who can understand and follow the instructions should use or service this fire pit.

## FOR YOUR SAFETY

If you smell gas:

1. Shut off the gas to the appliance.
2. Extinguish any open flame.
3. If the odor continues, keep away from the appliance and immediately call your gas supplier or fire department.

Solid fuels shall not be burned in this appliance.

## **DANGER**

### **EXPLOSION – FIRE HAZARD**

- Keep solid combustibles, such as building materials, paper, or cardboard, a safe distance away from the fire pit as recommended by the instructions.
- Provide adequate clearances around air openings in the combustion chamber.
- Never use the fire pit in spaces that do or may contain volatile or airborne combustibles, or products such as gasoline, solvents, paint thinner, dust particles, or unknown chemicals.
- During operation, this product can be a source of ignition. Keep the fire pit area clear and free from combustible materials, gasoline, paint thinner, cleaning solvents and other flammable vapors and liquids. Do not use fire pit in areas with high dust content.
- Minimum fire pit clearances from combustible materials: two (2) feet from the sides & two (2) feet from the rear, 6 feet from the ceiling.

### **EXPLOSION – FIRE HAZARD**

- Never store propane near high heat, open flames, pilot lights, direct sunlight, other ignition sources, or where temperatures exceed 120 degrees F (49° C).
- Propane vapors are heavier than air and can accumulate in low places. If you smell gas, leave the area immediately.
- Never install or remove the propane cylinder while the fire pit is lighted, near the flame, pilot lights, or other ignition sources, or while the fire pit is hot to the touch.
- This fire pit is red-hot during use and can ignite flammables too close to the burner. Keep flammable at least 2 feet from the sides & 2 feet from the rear, and 6 feet from the ceiling. Keep gasoline and other flammable liquids and vapors well away from the fire pit.
- Store the propane cylinder outdoors in a well-ventilated space out of reach of children. Never store the propane cylinder in an enclosed area (house, garage, etc.). If the fire pit is to be stored indoors, disconnect the propane cylinder for outdoor storage.

## **WARNING**

We cannot foresee every use that may be made of our fire pit. Check with your local fire safety authority if you have questions about fire pit use. Other standards govern the use of fuel gases and heat-producing products for specific uses. Your local authorities can advise you about these. If no local codes exist, follow the National Fuel Gas Code, ANSI Z223.1. In Canada, installation must conform to local codes. If no local codes exist, follow the current National standards of CANADA CAN/CGA-B 149.2.

### **CARBON MONOXIDE HAZARD**

- This fire pit is a combustion appliance. All combustion appliances produce carbon monoxide (CO) during the combustion process. This product is designed to produce extremely minute, non-hazardous amounts of CO if used and maintained in accordance with all warnings and instructions. Do not block airflow into or out of the fire pit.
- Carbon Monoxide (CO) poisoning produces flu-like symptoms, watery eyes, headaches, dizziness, fatigue, and possibly death. You can't see it and you can't smell it. It's an invisible killer. If these symptoms are present during the operation of this product get fresh air immediately!

- For outdoor use only.
- Never use inside the house, or other unventilated or enclosed areas.
- This fire pit consumes air (oxygen). Do not use it in unventilated or enclosed areas to avoid endangering your life.

## **WARNING**

- WARNING indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.
- Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance. An LP cylinder not connected for use shall not be stored in the vicinity of this or any other appliance.

**WARNING:** For Outdoor Use Only

## **DANGER**

## **CARBON MONOXIDE HAZARD**

- This appliance can produce carbon monoxide which has no odor. Using it in an enclosed space can kill you. Never use this appliance in an enclosed space such as a camper, tent, or home.
- Improper installation, adjustment, alteration, service, or maintenance can cause property damage, injury or death. Read the installation, operation, and maintenance instructions thoroughly before installing or servicing this equipment.

## **WARNING**

California Proposition 65 Combustion by-products produced when using this product contain chemicals known to the State of California to cause cancer, birth defects, and other reproductive harm.

## **BURN HAZARD**

Never leave the fire pit unattended when hot or in use. Keep out of reach of children.

## **WARNING**

Certain materials or items, when stored under the fire pit, will be subjected to radiant heat and could be seriously damaged.

## **CAUTION**

## **SERVICE SAFETY**

Keep all connections and fittings clean. Make sure the propane cylinder valve outlet is clean. During set up, check all connections and fittings for leaks using soapy water. Never use a flame. Use as a heating appliance only. Never alter in any way or use with any device.

## **CAUTION**

CAUTION indicates an imminently hazardous situation which, if not avoided, may result in minor or moderate personal injury, or property damage.

## **WARNING**

This product is fueled by propane gas. Propane gas is invisible, odorless, and flammable. An odorant is normally added to help detect leaks and can be described as a “rotten egg” smell. The odorant can fade over time so leaking gas is not always detectable by smell alone. Propane gas is heavier than air and leaking propane will sink to the lowest level possible. It can ignite by ignition sources including matches, lighters, sparks or open flames of any kind many feet away from the original leak. Use only propane gas set up for vapor withdrawal. Store or use propane gas in compliance with local ordinances and codes or with ANSI/NFPA 58. Turn off propane when not in use.

## **WARNING**

Alert children and adults to the hazards of high surface temperatures. Stay away from these surfaces to avoid burning skin or igniting clothing. Carefully supervise young children when in the vicinity of the fire pit. Do not hang clothing or any other flammable materials from the fire pit, or place on or near the fire pit. Replace any guard or protective device removed for servicing the appliance prior to placing it back in service. Installation and repair should be done by a qualified service person. The fire pit should be inspected before use and annually by a qualified service person. More frequent cleaning may be required as necessary. It is imperative that the control compartment, burners, and circulating air passageway of the appliance be kept clean.

## **WARNING**

- Keep away from the unit for the first 20 minutes after igniting your unit for the first time, as fire glass/pumice stones could pop out and cause injury. Should any fire glass pop out, after they cool, please discard them.
- Always ensure that fire glass/ pumice stones are completely dry before use. Failure to do so will cause them to crack or pop.

## **OPERATION CHECKLIST**

### **Operation Checklist**

For a safe and pleasurable heating experience, perform this check before each use.

### **Before Operating**

1. I am familiar with the entire owner's manual and understand all precautions noted.
2. All components are properly assembled, intact, and operable.
3. No alterations have been made.
4. All gas connections are secure and do not leak.
5. Wind velocity is below 10 mph.
6. Unit will operate at reduced efficiency below 40 ° F/4.44°C
7. The fire pit is outdoors (outside any enclosure).
8. There is adequate fresh air ventilation. Do not use this appliance if any part has been underwater. Immediately call a qualified service technician to inspect the appliance and to replace any part of the control system and gas control which has been under water.
9. The fire pit is away from gasoline or other flammable liquids or vapors.
10. The fire pit is away from windows, air intake openings, sprinklers, and other water sources.
11. The fire pit is at least 24 in. on the rear and at least 24 in. on the sides from combustible materials.

12. A fire pit is on a hard and level surface.
13. There are no signs of spider or insect nests.
14. All burner passages are clear.
15. All air circulation passages are clear.
16. Children and adults should be alerted to the hazards of high surface temperatures and should stay away to avoid burns or clothing ignition.
17. Young children should be carefully supervised when they are in the area of the fire pit.
18. Clothing or other protective material should not be hung from the fire pit, or placed on or near the fire pit.
19. Any guard or other protective device removed for servicing the fire pit must be replaced prior to operating the fire pit.
20. Installation and repair should be done by a qualified service person. The fire pit should be inspected before use and at least annually by a qualified service person.
21. More frequent cleaning may be required as necessary. It is imperative that control compartment, burner and circulating air passageways of the fire pit be kept clean.

### **After Operation**

1. Gas control is in the OFF position.
2. The gas Tank valve is OFF.
3. Disconnect the Gas line.
4. After each use, replace cap on tank.

### **PREPARATION**

Before beginning assembly of the product, make sure all parts are present. Compare parts with the package contents list and hardware contents above. If any part is missing or damaged, do not attempt to assemble the product. Contact customer service for replacement parts.

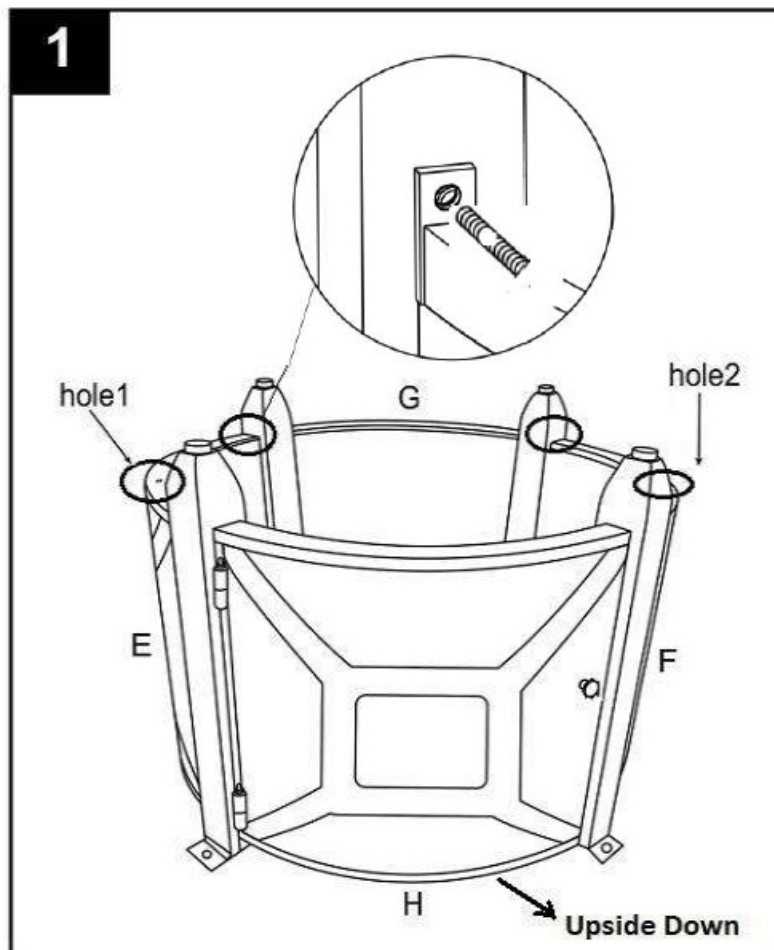

### **Estimated Assembly Time: 60 minutes**

Tools Required Assembly (not included): Leak Detection Solution.

## **ASSEMBLY INSTRUCTIONS**

**NOTE:** It is best to assemble the fire pit with two people

- Connect Side Panels (E,F,G,H), Legs (S) with Bolt (6\*30mm)/ Washer(M6) (M) as shown in Figure 1 using Wrench. (make sure that holes 1, and 2 can be found on the side panels and assembled as Figure 1, the two holes help fix the Gas Tank Bracket and Gas Tank Support in Step 2.)

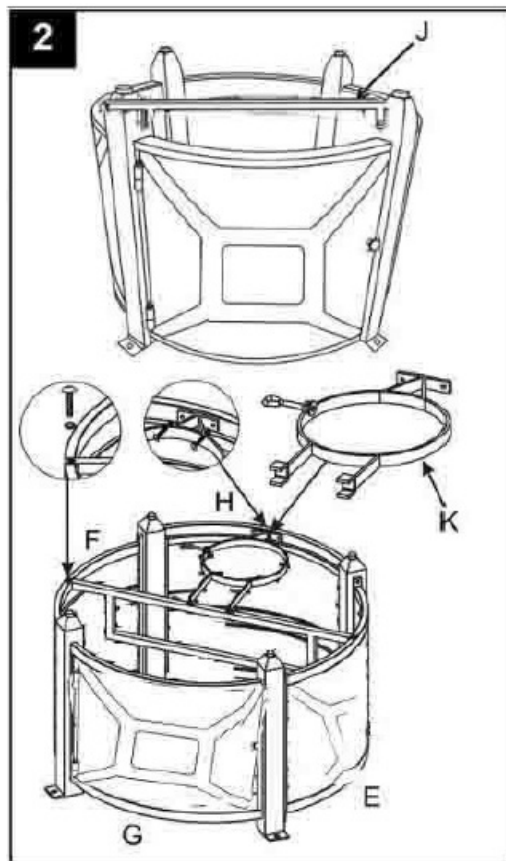

(**NOTE:** Don't put the Bolts on too tight.)

#### Hardware Used

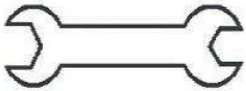

<b>M</b>	Bolt(6*45mm)		X 16
	Washer (M6)		X 16
	Nut (M6)		X 16
<b>O</b>			

- Connect the Gas Tank Bracket (J) to the holes located at the bottom of Side Panels E and F using 2 – Bolt (6\*25mm)/Washer/Nut(M6) (P) Then slide the ends of the Gas Tank Support (K) onto the right side of the Gas Tank Bracket (J) and align the 2 holes on the front of the Gas Tank Support (K) with the 2 holes in the Door Frame (H) and secure it to the bottom piece of the Door Frame using 2 – Bolt (6\*15mm)/Washer(M6)(N).

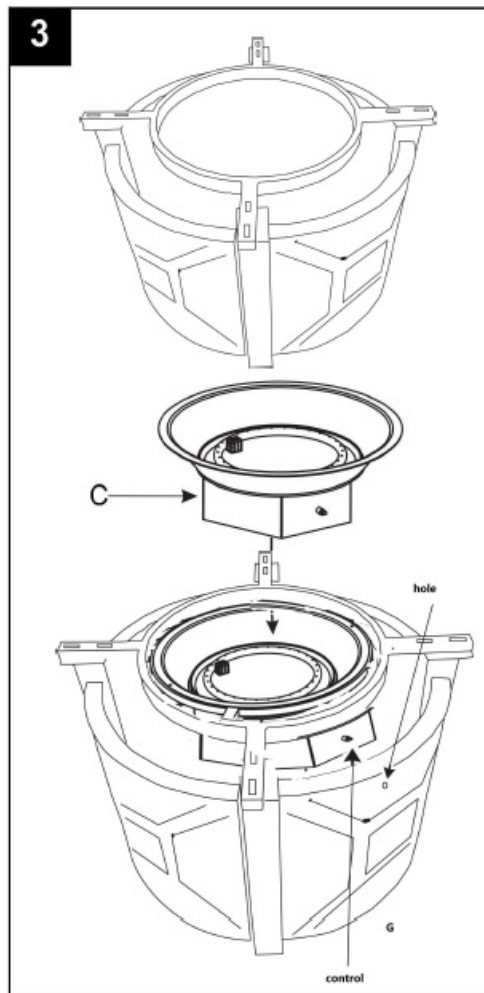

( **NOTE:** Don't put the Bolts on too tight.)

#### Hardware Used

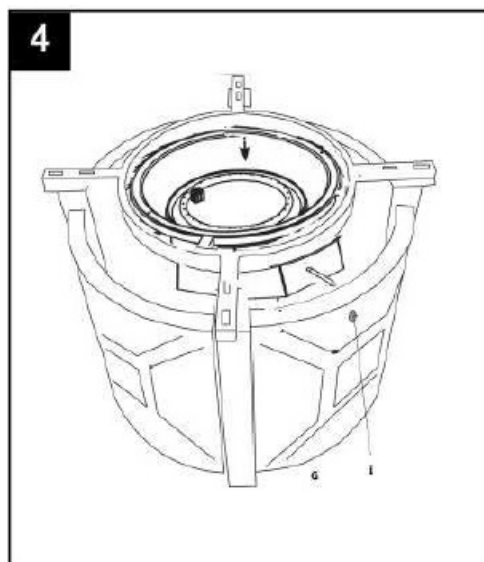

<b>N</b>	Bolt (6*15mm)		x2
	Washer (M6)		x2
<b>O</b>			
<b>P</b>	Bolt (6*25mm)		x2
	Washer (M6)		x2
	Nut(M6)		x 2

- Place the Burner Bracket (D) onto the assembled panels as shown in Figure 3. Move the Burner (C) so that the burner controls can face Panel G.

( **NOTE:** There is a HOLE at the top of Panel G to accommodate the control knob on the burner.) Make sure the switch of the burner is aligned with the (G).

- Attach the Connecting rod (I) to the Burner(C) using the Opening pin through the hole at the top of the side panel (G)

- Attach the 4-Bolt (8\* 55mm) (L) to the holes of the Table Top (B). Then align the Bolts with the holes in the Burner Bracket assembled panels and insert the Bolts through the holes. Fix the Table Top to the Burner Bracket and assembled panels with 4 – Washer/Spring Washer/Nuts (L). ( **NOTE:** Tighten all the Bolts and Nuts.)

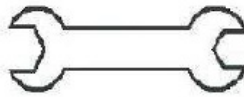

#### Hardware Used

**L** Bolt (M8),  
Nut (M8),  
Washer,  
Spring Washer x 4

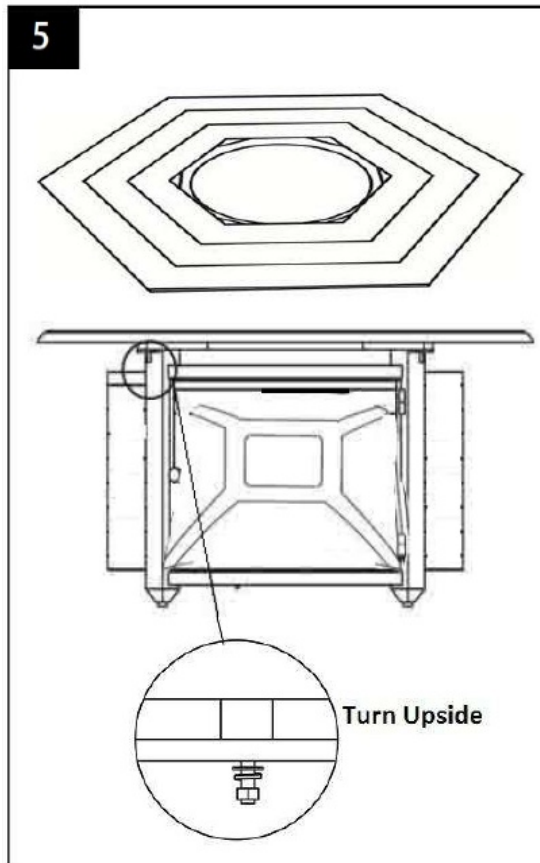

x 4

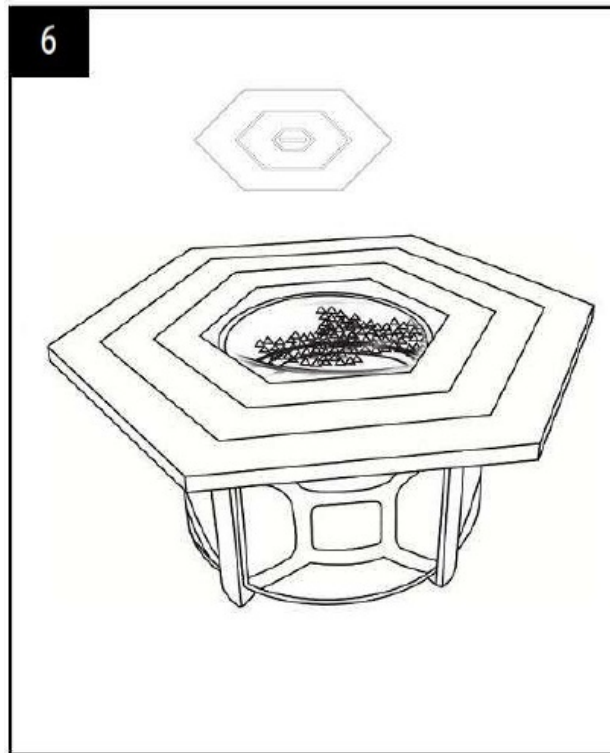

**O**

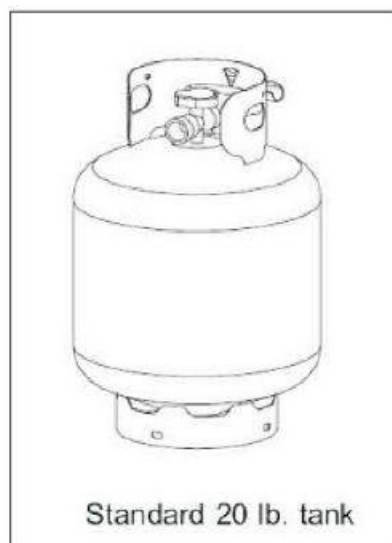

**R**

- Pour the Glass Beads (D) around the Burner (C). Put the Burner Cover (A) on the Burner when the fire pit is NOT in use.

- Connect the hose and regulator to the cylinder. The propane gas and ? the cylinder are sold separately. Use a standard 20 lb. propane cylinder only. Use this fire pit only with a propane vapor withdrawal supply system. See Chapter 5 of the standard for storage and handling of liquefied petroleum gas, ANSI/NFPA 58. Your local library or fire department should have this book. Storage of an appliance indoors is permissible only if the cylinder is disconnected and removed from the appliance. A cylinder must be stored outdoors in a well-ventilated area out of reach of children. A disconnected cylinder must have dust caps tightly installed and must not be stored in a building, garage, or any other enclosed area. The maximum inlet gas supply pressure: is 250 psi. The minimum inlet gas supply pressure: 5 psi. The minimum hourly of 10000 Btu is the required input rating for a fire pit for automatic operation at a rating less than the full input rating. The pressure regulator and hose assembly supplied with the appliance must be used. The installation must conform with local codes, or in the absence of local codes, with national fuel gas code, ANSI Z223.1 /NFPA54, natural gas and propane Installation Code, CSA B 149.1, or propane storage and handling code, B149.2.

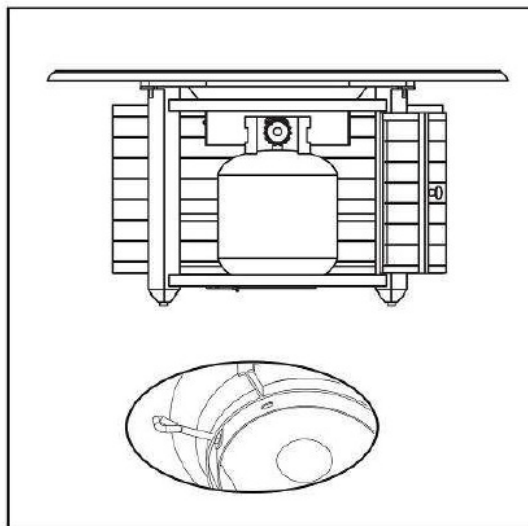

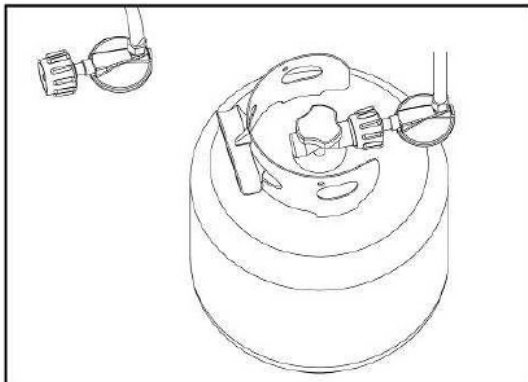

## TROUBLESHOOTING

If you have any questions regarding the product, please call customer service at 1- [888-775-1330](tel:888-775-1330), 8 a.m. – 4 p.m. (MST), Monday – Friday.

PROBLEM	POSSIBLE CAUSE	CORRECTIVE ACTION
Burner wont light	Propane cylinder is frosted over	Wait until the propane cylinder warms up and becomes unfrosted
	Blockage in orifice	Clear blockage and striker cage of fire glass 1/4" away on all sides
	Control knob is not in ON position	Turn control knob to ON
Burner flame is low	Gas pressure is low	Turn cylinder valve OFF and fill the cylinder
	Outdoor temperature is less than 40°F and tank is less than 1/4 full	Use a full cylinder
	Control knob fully ON	Check burner and orifices for blockage
Carbon build-up	Dirt or film on burner	Clean burner
Thick black smoke	Blockage in burner	Remove blockage and clean burner inside and outside

### ASSEMBLY INSTRUCTIONS

A dented, rusted, or damaged propane cylinder may be hazardous and should be checked by your cylinder supplier. Never use a propane cylinder with a damaged valve connection. The propane cylinder must be constructed and marked in accordance with the specifications for LP gas cylinders of the U.S. Department of Transportation (DOT) or the standard for cylinders, spheres, and tubes for transportation of dangerous goods and commission, CAN/C SA-B339. The cylinder must have a listed overfilling prevention device. The cylinder must have a connection device compatible with the connection for the appliance. The cylinder used must include a collar to protect the cylinder valve. Never connect an unregulated propane cylinder to the heater. Attach regulator to cylinder. Complete attachment. Install cylinder.

- Do not store a spare LP-gas cylinder under or near this appliance.

- Never fill the cylinder beyond 80 percent full.
- Place the dust cap on the cylinder valve outlet whenever the cylinder is not in use. Only install the type of dust cap on the cylinder valve that is provided with the cylinder valve. Another type of caps or plugs may result in leakage of propane .

**ATTENTION:** This PRODUCT IS NOT FOR COMMERCIAL USE INTENDED FOR RESIDENTIAL USE ONLY.

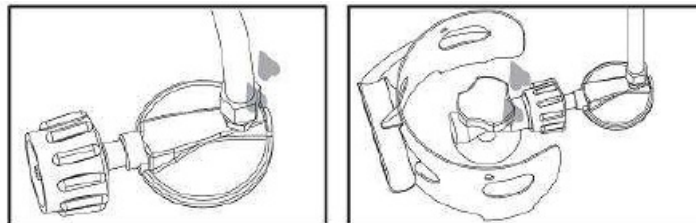

- Do not sit or stand on this table
- Keep children away during assembly, This item contains small parts which can be swallowed by children.
- Do not use indoors and inside any enclosure.
- Retain the assembly instructions for future reference.
- Installer? Please leave these instructions with the owner.

## OPERATION INSTRUCTIONS

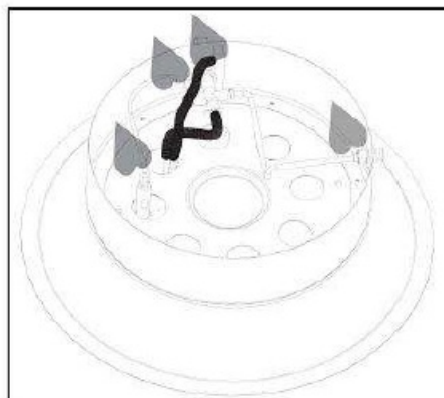

### Leak Test

#### WARNING

Perform all leak tests outdoors. Extinguish all open flames. NEVER leak test when smoking. Do not use the fire pit until all connections have been leak-tested and do not leak.

- Hose / Regulator connection
- Regulator / Cylinder connection

1. Make 2-3 oz. of leak test solution (one part liquid dishwashing detergent and three parts water).
2. Apply several drops of solution where the hose attaches to the regulator.
3. Apply several drops of solution where the regulator connects to the cylinder.
4. Make sure all fire pit and light valves are OFF.
5. Turn the cylinder valve ON.

If bubbles appear at any connection, there is a leak.

1. Turn the cylinder valve OFF.
2. If the leak is at the hose/regulator connection: tighten the connection and perform another leak test. If bubbles continue appearing, the hose should be returned to the place of purchase.
3. If the leak is at the regulator/cylinder valve connection: disconnect, reconnect, and perform another leak test. If you continue to see bubbles after several attempts, the cylinder valve is defective and should be returned to the cylinder's place of purchase. If NO bubbles appear at any connection, the connections are secure.

**NOTE:** Whenever gas connections are loosened or removed, you must perform a complete leak test. Complete installation.

## **DANGER**

- CARBON MONOXIDE HAZARD
- For outdoor use only. Never use inside the house, or other unventilated or enclosed areas. This fire pit consumes air (oxygen). Do not use it in unventilated or enclosed areas to avoid endangering your life.

## **WARNING**

- Very hot while in operation!
- Never lean over the fireplace while in use.
- Failure to comply with these instructions may result in serious bodily injury.

**Caution.** Do not attempt to operate until you have read and understand all General Safety Information in this manual and all assembly is complete and leak checks have been performed.

## **Before Turning the Gas Supply ON**

1. Your fire pit was designed and approved for outdoor use only. Do NOT use it inside a building, garage, or any other enclosed area.
2. Make sure surrounding areas are free of combustible materials, gasoline, and other flammable vapors or liquids.
3. Ensure that there is no obstruction to air ventilation. Be sure all gas connections are tight and there are no leaks.
4. Be sure the cylinder cover is clear of debris. Be sure any component removed during assembly or servicing is replaced and fastened prior to starting.

## **Before Lighting**

1. Fire pit should be thoroughly inspected before each use, and by a qualified service person at least annually. If relighting a hot fire pit, always wait at least 5 minutes.
2. Inspect the hose assembly for evidence of excessive abrasion, cuts, or wear. Suspected areas should be leak tested. If the hose leaks, it must be replaced prior to operation. Only use the replacement hose assembly specified by the manufacturer. The burner must be replaced prior to the appliance being put into operation if it is evident that the burner is damaged. The replacement burner should be specified by the manufacturer.

## Lighting

1. Turn the control knob to the "OFF" position (Figure a).
2. Fully open LP cylinder valve.

**Note:** For initial start or after any cylinder change, hold Control Knob IN for 2 minutes to purge air from gas lines before proceeding.

3. Push in the gas control knob and turn counterclockwise to "IGNITE" (Figure b) to light the fire pit. If needed, keep depressing and turning the control knob counterclockwise until the heater lights (You should hear a clicking sound).
4. After the fire pit lights, release the control knob. Push in and turn the control knob to "HIGH", then release the control knob. If you want a lower temperature, push in the control knob and turn counterclockwise to the "LOW" (Figure c).

**Note:** If the burner fails to remain lit, all valves should be closed and a waiting period of at least 5 minutes should pass before attempting to light.

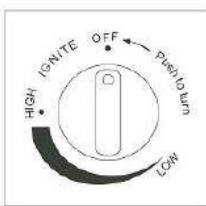

Figure a

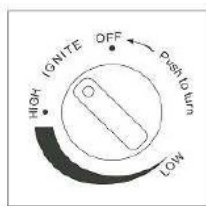

Figure b

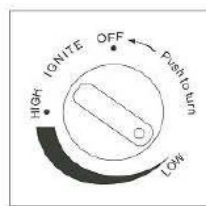

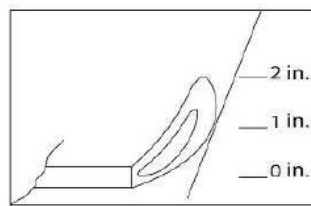

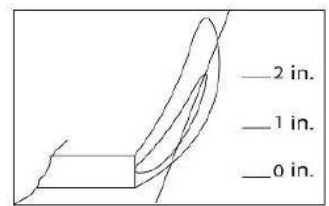

Figure c

Normal

Abnormal

## FOR YOUR SAFETY

Be careful when attempting to manually ignite this fire pit. Holding the control knob for more than 10 seconds before igniting the gas will cause a ball of flame upon ignition.

## When the fire pit is ON

The burner will display tongues of blue and yellow flame. These flames should not be yellow or produce thick black smoke, which would indicate an obstruction of airflow through the burners. The flame should be blue with straight yellow tops. If excessive yellow flame is detected, turn off the heater and consult "Troubleshooting."

## Relighting:

1. Turn control knob to OFF.
2. Repeat the "Lighting" steps on the prior page.

## WARNING

## FOR YOUR SAFETY

A fire pit will be hot after use. Handle with extreme care.

## Shut Down

1. To extinguish the burner depress the control knob and continue to turn it clockwise to OFF.
2. Turn the cylinder valve clockwise to OFF and disconnect the regulator when the heater is not in use.

## CARE AND MAINTENANCE

## **WARNING**

**FOR YOUR SAFETY:** Do NOT touch or move the fire pit for at least 45 minutes after use. Bomer is hot to the touch. Allow Bomer to cool before touching.

To enjoy years of outstanding performance from your fire pit, make sure you perform the following maintenance activities on a regular basis: Keep exterior surfaces clean.

1. Use warm soapy water for cleaning. Never use flammable or corrosive cleaning agents.
2. While cleaning your unit, be sure to keep the area around the burner dry at all times. Do not submerge the control valve assembly. If the gas control is submerged in water, do NOT use it. It must be replaced.
  - Keep the appliance area clear and free from combustible materials, gasoline, and other flammable vapors and liquids.
  - Do not obstruct the flow of combustion and ventilation air.
  - Keep the ventilation opening(s) of the cylinder enclosure free and clear from debris.
3. Air flow must be unobstructed. Keep controls, burner, and circulating air passageways clean. Signs of possible blockage include:
  - Gas odor with extreme yellow tipping of flame.
  - The fire pit does NOT reach the desired temperature.
  - The fire pit glow is excessively uneven.
  - The fire pit makes popping noises.
  - Spiders and insects can nest in burners or orifices. This dangerous condition can damage the fire pit and render it unsafe for use. Clean burner holes by using a heavy-duty pipe cleaner. Compressed air may help clear away smaller particles.
  - Carbon deposits may create a fire hazard. Clean burner with warm soapy water if any carbon deposits develop.

**Note:** In a salt-air environment (such as near an ocean), corrosion occurs more quickly than normal. Frequently check for corroded areas and repair them promptly.

## **TIP**

Use high-quality automobile wax to help maintain the appearance of your fire pit. Apply to exterior surfaces only. Do not apply to the burner.

## **Storage**

Between uses:

- Turn Control Knob OFF.
- Disconnect LP source.
- Store fire pit upright in an area sheltered from direct contact with inclement weather (such as rain, sleet, hail, snow, dust and debris).
- If desired, cover the fire pit to protect exterior surfaces and to help prevent build-up in air passages. Note: Wait until fire pit is cool before covering.

## **During periods of extended inactivity or when transporting**

- Turn Control Knob OFF.

- Disconnect the LP source and move to a secure, well-ventilated location outdoors.
- Store fire pit upright in an area sheltered from direct contact with inclement weather (such as rain, sleet, hail, snow, dust and debris).
- If desired, cover the fire pit to protect exterior surfaces and to help prevent build-up in air passages. Never leave LP cylinder exposed to direct sunlight or excessive heat.

**Note:** Wait until the fire pit is cool before covering.

### **Service**

Only a qualified service person should repair gas passages and associated components.

**Caution:** Always allow fire pit to cool before attempting service.

## **ONE-YEAR LIMITED WARRANTY**

### **CUSTOMERS IN USA**

For small parts please call 1-[888-775-1330](tel:888-775-1330) for assistance. For damaged products, you may have to return to the retailer.

### **CUSTOMERS IN CANADA**

Only return this product to the store if it was purchased within 90 days. If you have problems after 90 days of purchase, please CALL 1-[888-775-1330](tel:888-775-1330). DATED PROOF OF PURCHASE REQUIRED FOR WARRANTY SERVICE. AZ Patio Heater, LLC ("Vendor") warrants to the original retail purchaser of this heater to no other person, that if this heater is assembled and operated in accordance with the printed instructions accompanying it, then for a period of one year from the date of purchase, all parts in such heater shall be free from defects in manufacturing and workmanship. The vendor may require reasonable proof of your date of purchase from an authorized retailer or distributor. Therefore, you should retain your sales slip or invoice. This limited Warranty shall be limited to the repair or replacement of parts, which prove defective under normal use and service and which the vendor shall determine in its reasonable discretion upon examination to be defective. Before returning any parts, you should contact vendor's customer service department using the contact information listed below. If Vendor confirms, after examination a defect covered by this limited warranty in any returned part, and if Vendor approves the claim, Vendor will replace such defective part without charge. If you return defective parts, Transportation charges must be prepaid by you. The vendor will return replacement parts to the original retail purchaser, Freight or postage prepaid.

The Limited Warranty does not cover any failures or operating difficulties due to accident, abuse, misuse, alteration, misapplication, improper installation or improper maintenance or service by you or a third party. The failure to perform normal and routine maintenance on the product, shipping, damage, abnormal adjustment to the burner, damage or repairs related to insects, birds, or animals of any kind, and damage due to weather conditions as set out in this owner's manual. In addition, the Limited Warranty does not cover damage to the finish such as scratches, dents, discoloration, rust, or weather damage, after purchase. Please protect your investment. The Limited Warranty is in lieu of all other warranties offered by any retail company. Vendor disclaims all warranties for products that are purchased from sellers other than authorized retailers or distributors. AFTER THE PERIOD OF THE 1 YEAR WARRANTY, THE VENDOR DISCLAIMS ANY IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. FURTHER, THE VENDOR SHALL HAVE NO LIABILITY WHATSOEVER TO THE PURCHASER OR ANY THIRD PARTY FOR ANY SPECIAL, INDIRECT, PUNITIVE, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.

The vendor assumes no responsibility for any defects caused by third parties. This limited warranty gives the purchaser specific legal rights; a purchaser may have other rights depending on where he or she lives. Some jurisdictions do not allow the exclusion or limitation of special, incidental or consequential damages, or limitations on how long a warranty lasts, so the above exclusion and limitations may not apply to you. The vendor does not authorize any person or company to assume for it any other obligation or liability in connection with the sale,

installation, use, removal, return, or replacement of its equipment, and no such representations are binding on the vendor. For warranty service, please contact [warranty@azpatioheaters.com](mailto:warranty@azpatioheaters.com) or call us toll-free at [888-775-1330](tel:888-775-1330).
