Start Here

Glass and Bulb Installation

1. With a Phillips screw driver, remove flat head screw on the underside of the fixture.
2. Remove the front plate.
3. Insert the bulb into the socket.
4. Slide the glass in the glass track at the back of the fixture.
5. Once the glass is in place, re-assemble the front plate and screw.

Luminaire Mounting

(For typical ground spike mounting)

1. To prevent electrical shock, disconnect the transformer from the electrical supply before installation or service.
2. Run wire from luminaire through mounting hole in the top of the ground spike.
3. Attach luminaire to ground spike by threading to mounting hole in spike and locking it in place.
4. Place spike in desired position and insert into ground until the angle of spike is flush with ground.
5. Strip the two wire leads from the luminaire and connect to the main supply wire using the provided silicone filled wire nut.

Note: Wire is to be protected by routing in close proximity to the luminaire or fitting or next to a building structure such as a house or deck. Wiring should be buried a maximum of 6 inches (15.2 cm) in order to connect to main

supply wire. The main supply wire must have its length cut off within 6 inches (15.2 cm) from a building structure, a luminaire or fitting.

Bulb specifiecations	
Power	1.5W
Lurnans	150
\l: oltage	12V DC
CRI	90+
Temperture	2700K
