LED replacement

Typical Ground Stake Mounting

LUMINAIRE MOUNTING: (for typical ground stake mounting)

1. To prevent electrical shock, disconnect the transformer from the electrical supply before installation or service.
2. Run wire from the Luminaire through the mounting hole in the top of the ground stake.
3. Attach the Luminaire to the ground stake by threading it into the mounting hole in the stake until it fits snugly against the bottom of the stem.
4. Place a stake in the desired position and insert it into the ground until the flange of the stake is flush with the ground.
5. Strip the two wire leads from the Luminaire and connect to the main supply wire using the provided silicone-filled wirenut.
6. Silicone-filled nuts are intended for one-time use. Wire Nut Capacity -2 pcs 18 AWG 2 pcs 12 AWG

The main low-voltage cable from the Luminaire is to be:

1. Protected by routing near the luminaire or fitting, or next to a building a structure

such as a house or deck.

2. The main secondary wire is intended for shallow burial, less than 6 inches (15.2cm) – to connect to the main low-voltage cable 3.
3. Have the length cut off so that it is connected to a connector within 6 inches (15.2cm) from a building structure, a luminaire or fitting.

LED replacement

1. Power of fixtures
2. Remove acyclic ring (A) and middle ring (M) using screws (E)
3. Remove stem screws
4. Remove the failed LED
5. Replace the failed LED with a new LED
6. Replace stem screws
7. Next re-secure acyclic ring (A) and middle ring (M) using screws (E)
8. Restore power to the fixture
