| description           | <p>Safety built-in socket, 4 mm diameter, contact-protected, with 6.3 x 0.8 t ab connector complying with DIN 46 244, nickel-plated brass. For installation into switch panels and equipment chassis with wall thicknesses up to 6 mm. Installation hole: 12.2 mm diameter,</p> <p>Tightening torque: 50 Ncm, Accessory: assembly tool MW SEB</p> |
| operating instruction | BA451                                                                                                                                                                                                                                                                                                                                             |
