 Some screens in this guide may differ slightly depending on your mobile device and the Holman Home app version

Contents

INTRODUCTION

The **CLXRGB60 Garden Light** wifi **Wi-Fi Controller** allows anyone with a smartphone and Wi-Fi access to control their garden lights from anywhere on the globe.

Connect your **4-Pin Plug + Socket** to your **Wi-Fi Garden Light Controller** to create stunning lighting displays or select from existing scenes to bring your garden to life. Adjust the color, mood, intensity, brightness, and display all from your smartphone. Find out more online at **www.holmanindustries.com.au/rgb-colour-60W-garden-light-wi-fi-controller**

INITIAL SETUP

1. Download Holman Home onto your mobile device via the

Apple App Store or

Google Play

2. Open Holman Home on your mobile device

 You may be prompted to allow notifications— **Holman Home** will still work if you choose not to

3. Tap **REGISTER**

4. Read our Privacy Policy and tap **AGREE** if you wish to proceed

5. Follow the prompts to register a Holman Home account with your email or mobile number

🛈 When entering an email address ensure the country is correct as this may affect your ability to share control of your Garden Light Controller with other users

🛈 You may be prompted to allow Holman Home to access your location. This allows the app to show weather information. Holman Home will still work if you choose not to allow this
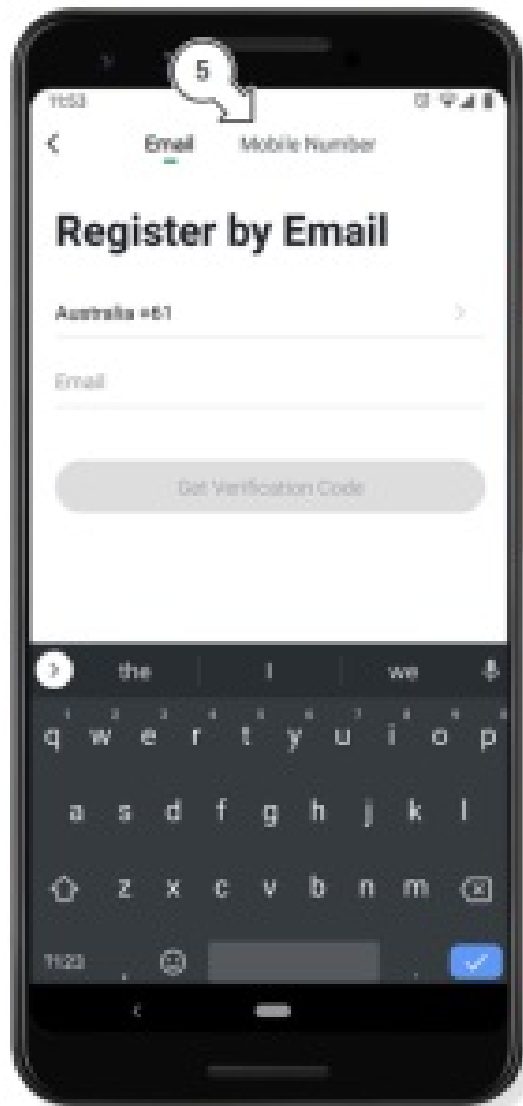

6. The home screen will appear and you are now able to add devices to Holman Home by tapping **ADD DEVICE** or ✚

7. To find the **Garden Light Controller,** tap the **GARDEN LIGHTING**

8. Tap the **RGB GARDEN LIGHTING** icon to search for your **Garden Light Controller**

9. This begins the Wi-Fi pairing process with your **Garden Light Controller**. Follow the prompts on your mobile device to complete the pairing process

BASIC APP INFORMATION

After completing the Wi-Fi pairing process, your Garden Light Controller will be available on the ALL DEVICES screen. Tap your Garden Light Controller for advanced lighting controls

1. Tap ⏻ at the bottom of the screen to turn the light on or off
2. When your garden lights are on it is possible to:
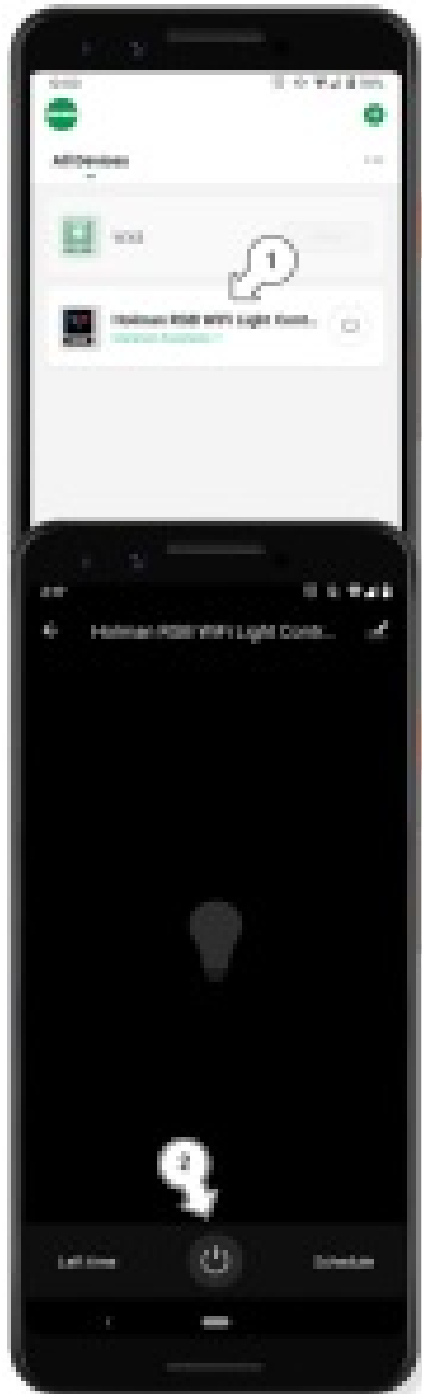

i. Change the color by using the scroll wheel

ii. Adjust the brightness of the light using the ☀ slider

iii. Adjust the intensity of the color using ◑ slider
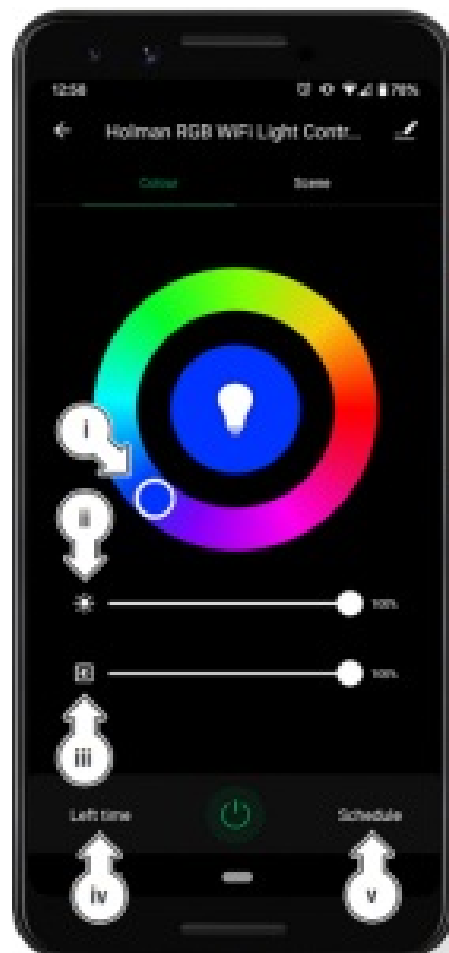

iv. Tap **LEFT TIME** to set a timer for the lights to stay on for a duration

v. Tap SCHEDULE to set on and off timers for the light

CHOOSING SCENE DISPLAY

1. Tap SCENE as shown to open scene options
2. There are eight predefined scenes. The selected scene will have the image displayed in the middle of the screen

3. Using EDIT it is possible to:

    i. Change the SCENE NAME,

    ii. change the scene picture by selecting the EDIT SCENE PIC,

    iii. add more colors to your display by tapping **+** plus under the SCENE COLOUR,

    iv. change the flash mode by tapping the COLOUR FLASH MODE,

    v. adjust the COLOUR FLASH or BREATH using the ⟳ slider

DEVICE INFORMATION

1. Tap ✎ as shown to display Device Information

   ⓘ From here you will be able to:

2. Change the name, icon and allocate a location on your **Garden Light Controller**

3. Choose **DEVICE INFORMATION** to see the Virtual ID, IP and MAC Address, Device Time Zone, and Signal Strength

4. Select **TAP-TO-RUN AND AUTOMATION** for any smart scenarios you have created

5. Tap ALEXA or GOOGLE ASSISTANT for information on setting up these services on setting up services

6. Toggle OFFLINE NOTIFICATION to be notified when your device has been offline for more than 30 minutes

7. Tap SHARE DEVICE to share control of your **Garden Light Controller** with a user outside your home. We recommend using the **HOME MANAGEMENT** function if you wish to share your **Garden Light Controller** with a user who lives in your home

   ⓘ All users will need to have a Holman Home account to be able to share devices
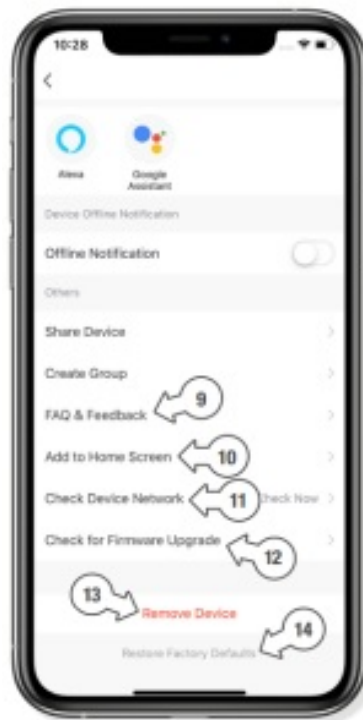

8. Tap **CREATE GROUP** to control multiple **Garden Light Controllers**

9. For support and fault reporting, tap FAQ & **FEEDBACK**

10. Add the device to your **HOME SCREEN** (iOS only)

11. Tap **CHECK DEVICE NETWORK** to run a test on your Wi-Fi signal

12. Tap **CHECK FOR FIRMWARE UPGRADE** to ensure your **Garden Light Controller** has the latest firmware

13. Tap **REMOVE DEVICE** to remove your **Garden Light Controller** from **Holman Home**

14. Tap **RESTORE FACTORY DEFAULTS** to remove your **Garden Light Controller** from **Holman Home** and clear all settings back to factory defaults

TROUBLESHOOTING

Symptom	Suggestion
CLXRGB60 Controllercannot connect to Holman Home	1. When adding your CLXRGB60 to Holman Home: 2. Confirm your CLXRGB60 is powered ON 3. Confirm Wi-Fi AP on your CLXRGB60 is flashing RED 4. Confirm both your CLXRGB60 and smartphone are within Wi-Fi range 5. Make sure the network functions of your Wi-Fi router and smartphone are unblocked; fire walls can block certain ports 6. Confirm your Wi-Fi network name (SSID) has been entered correctly, including spaces. Note this is case sensitive 7. Confirm your Wi-Fi network password has been entered correctly 8. Confirm your CLXRGB60 is connected to a 2.4GHz Wi-Fi network (not 5GHz), enable the broadcast and do not allow the Wi-Fi network to be hidden 9. Confirm your Wi-Fi router encryption method is WPA2-PSK and authentication type is AES, or both are set to automatic 10. If the number of connected devices to the Wi-Fi has reached the amount limit (usually 16 or 50 devices), turn off other Wi-Fi devices and configure again 11. If your Wi-Fi router enables the MAC address filter, remove the device from the MAC filter list and make sure the WiFi router is allowing your CLXRGB60 to be connected 12. Make sure that the Wi-Fi router has the DHCP service enabled. If it is not enabled, the address will be occupied 13. Your Wi-Fi router may not compatible with your CLXRGB60. It is recommended that you replace the Wi-Fi router and try again
No LED lights on	No AC power, or a blown fuse or transformer. Check fuse and transformer output. Turn power on
