## Preparation For Use

Mobile phone is connected to Wi-Fi

Ensure that the smart phone is within the same Wi-Fi network of the Smart Gateway to ensure an effective connection between the smart phone and the Smart Gateway.

### Download and Registration

(if you have got already Homcloud App on your mobile and an Homcloud Account go to Network Settings).

- Download Homcloud App from App Store or Google Play or scan QR code below.

- Enter the register/login interface and register with your country area code and phone number/email address.
- Wait a few minutes for verification code (by email or text message) and enter it where required along with a password.(between 6 and 20 numbers and letters)

### Important

Our App only support 2.4 GHz Wi-Fi networks, IEEE 802.11 b/g/n (for configuration both Smart device and mobile phone need to be connected at the same Wi-Fi network).

### Network Settings

- Connect the gateway to the power supply.
- Confirm that the indicator (red light) is blinking. If it is not blinking, press and hold for 5 sec the reset button until the wi-fi red lights is blinking.
- Make sure that the mobile phone is connected to the home 2.4GHz band router. At this time, the mobile phone and the gateway are in the same local area network;
- Open the “My Home” page of the App and click the “+” button on the upper right corner of the screen;
- “Smart Gateway wi-fi” will appear on the “Select type of device” page, click “Add”;
- Follow instructions on Homcloud App and wait around 2 minutes for the end of configuration.

Once the device has been added successfully, you will be able to find the device on the “My Home” page.
