hOmeLabs™

hOmeLabs HME010246N AC Power Adapter for Automatic Trash Can

Product Information

- **Specifications**

- **Rated Input:** 5.9 V DC
- **Rated Output:** 500 mA DC Plug Dimension
- **Weight:** 63 g (0.12 lb)

The HME010246N is a dedicated AC adapter designed specifically for use with hOmeLabs Automatic Trash Cans to operate them on AC power. It should never be used with other equipment to ensure proper functionality.

Product Instruction

- **Safety Precautions**

- **WARNING:** Indicates a potentially hazardous situation which, if mishandled, could result in death or serious personal injury.
- Important information for the correct disposal of the product by EC Directive 2012/19/EU:
- Do not dispose of this product as unsorted municipal waste.
- Collection of such waste separately for special treatment is necessary.
- It is prohibited to dispose of this appliance in domestic household waste.
- For disposal, there are several possibilities:
- The municipality has established collection systems where electronic waste can be disposed free of charge.
- Old products can be sold to scrap metal dealers as they contain valuable resources.
- Improper disposal of waste can endanger health and the environment.

- **Checkup and Replacement**

- Periodical checkups and replacements are required to ensure trouble-free use of the AC Adaptor.
- It is recommended to replace it approximately every 6 years when used 24 hours every day under normal use conditions.
- This period may vary based on the installation environment and usage conditions.

• FAQ

- **Q: Can the HME010246N AC adapter be used with other devices?**
 - **A:** No, the HME010246N AC adapter is dedicated for use with hOmeLabs Automatic Trash Cans and should not be used with other equipment.
- **Q: How should I dispose of the HME010246N AC adapter?**
 - **A:** Do not dispose of this product as unsorted municipal waste. Follow local regulations for electronic waste disposal or consider selling it to scrap metal dealers to recover valuable resources.
- **Q: Is the HME010246N AC adapter compliant with environmental regulations?**
 - **A:** Yes, the product is in compliance with directive 2011/65/EU on the restriction of hazardous substances in electrical and electronic equipment.

GENERAL DESCRIPTION

The HME010246N is a dedicated AC adapter to operate the hOmeLabs Automatic Trash Cans on AC power. Never use it for other equipment.

SAFETY PRECAUTIONS

- Before installation or use, be sure to carefully read all the instructions in this section for correct and safe operation.
- Be sure to follow all the precautionary instructions in this section, which contain important warnings and/or cautions regarding safety.
- After reading, keep this manual handy for future reference.

WARNING

WARNING: Indicates a potentially hazardous situation which, if mishandled, could result in death or serious personal injury.

- Do not expose the unit to rain or an environment where it may be splashed by water or other liquids, as doing so may result in fire or electric shock.
- Use the unit only with the voltage specified on the unit. Using a voltage higher than specified may result in fire or electric shock.
- Do not cut, kink, or modify the power supply cord. In addition, avoid using the power cord near heaters, and never place heavy objects – including the unit itself – on the power cord, as doing so may result in fire or electric shock.
- Should the following irregularity be found during use, immediately, disconnect the power supply plug from the AC outlet and contact hOmeLabs customer support.
- Make no further attempt to operate the unit in this condition as this may cause fire or electric shock.
- If you detect smoke or a strange smell coming from the unit.

- If water or any metallic object gets into the unit.
- If the unit case breaks.
- If the power supply cord is damaged (exposure of the core, disconnection, etc.).
- To prevent a fire or electric shock, never open or remove the unit case as there are high-voltage components inside the unit.
- Never plug in nor remove the power supply plug with wet hands, as doing so may cause electric shock.
- Avoid installing the unit in humid or dusty locations, in locations exposed to direct sunlight, near the heaters, or in locations generating sooty smoke or steam, as doing so may result in fire or electric shock.
- Remove the power supply plug from the AC outlet when moving the connected equipment, as doing so may cause damage to the power cord, resulting in a fire.
- If dust accumulates in the wall AC outlet, a fire may result. Clean it periodically.
- Unplug the power supply plug from the AC outlet for safety purposes when cleaning or leaving the unit unused for 10 days or more.
- Important information for correct disposal of the product per EC Directive 2012/19/EU.
- At the end of its working life, the product must not be disposed of as urban waste.
- It must be taken to a special local authority differentiated waste collection centre or a dealer providing this service.
- Disposing of a household appliance separately avoids possible negative consequences for the environment and health deriving from inappropriate disposal and enables the constituent materials to be recovered to obtain significant savings in energy and resources.
- As a reminder of the need to dispose of household appliances separately, the product is marked with a crossed-out wheeled dustbin.

DISPOSAL

Do not dispose of this product as unsorted municipal waste. Collection of such waste separately for special treatment is necessary. It is prohibited to dispose of this appliance in domestic household waste.

For disposal, there are several possibilities:

1. The municipality has established collection systems where electronic waste can be disposed free of charge.
2. As old products contain valuable resources, they can be sold to scrap metal dealers.

Wild disposal of waste in forests and landscapes endangers your health. Hazardous substances leak into the groundwater and find their way into the food chain.

CHECKUP AND REPLACEMENT

- Periodical checkups and replacements are required to ensure trouble-free use of the AC Adaptor.
- Replace it in about 6 years as a guide when used 24 hours every day under normal use conditions.
- These 6 years are suggested only as a guide and may be shortened depending on the installation environment and conditions of use.

SPECIFICATIONS

Rated Input	110–240 V AC 50/60 Hz
Rated output	5.9 V DC 500 mA
DC plug Dimension	Ø3.5 mm & Ø1.1 mm (Outer/inter diameter), Length: 11.8 mm
Operating Temperature	0–40°C (32–104°F)
Weight	63 g (0.12 lb)

MANUFACTURING INFO

This manual is to be used with all items with the model number HME010246N

WARNING

WARNING: Keep all plastic bags away from children.

FCC

FCC STATEMENT

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, under part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used under the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

ROHS COMPLIANCE

- This product is in compliance with directive 2011/65/EU of the European Parliament and of the Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment.
