## Safety instructions

### Safe use

HORL Scissors are only intended for people who are able to handle sharp utensils safely. They are not suitable for use by children.

**Be aware that scissors have sharp parts** The tip and inner blades of HORL Scissors are very sharp. To avoid injury, never grasp the blades.

### Releasing the scissor halves

Use both hands to carefully release the scissor halves by the handles. Do not attempt to separate the HORL Scissors with one hand.

### Warranty claims

Incorrect use or using sharpeners other than HORL sharpeners can shorten the service life of HORL® Scissors and invalidate the warranty.

### **Secure surface while reshaping**

Make sure that the halves of the HORL® Scissors are placed securely on a non-slip surface.

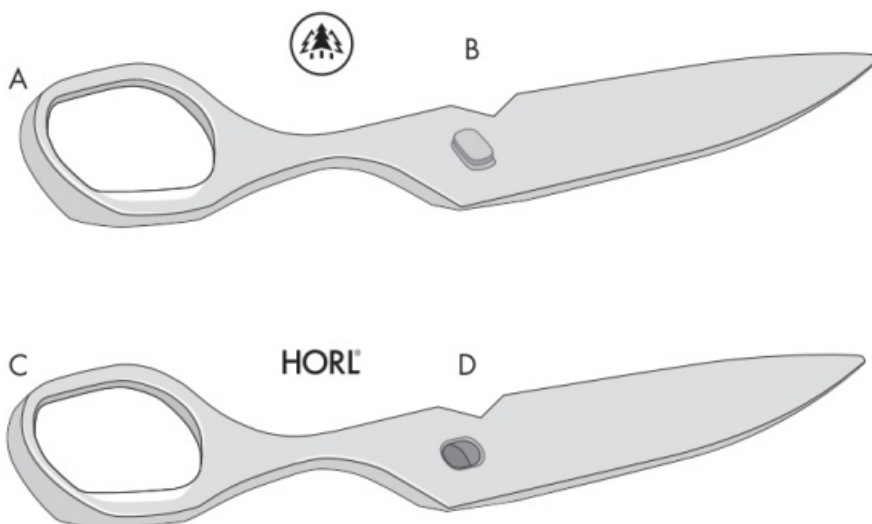

### **Choice of work surface**

Diamond dust and the silicone parts of the sharpener can damage work surfaces. We recommend using a large, non-slip cutting board as a base.

## **Product description**

### **PRODUCT DETAILS**

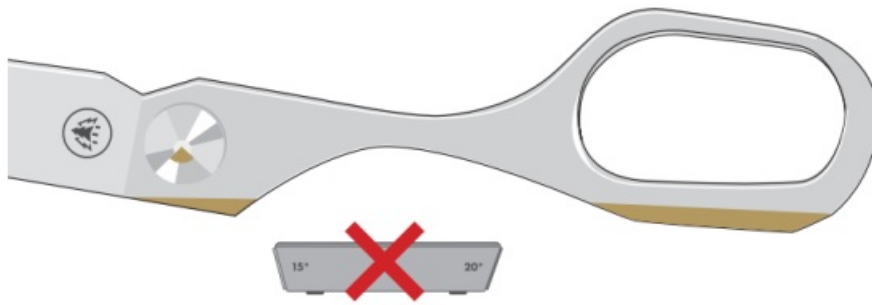

### **Product details**

A – Upper half of the scissors with HORL® logo and B – Bayonet clamp

C – Lower half of scissors with HORL® lettering and D – Clamp hole

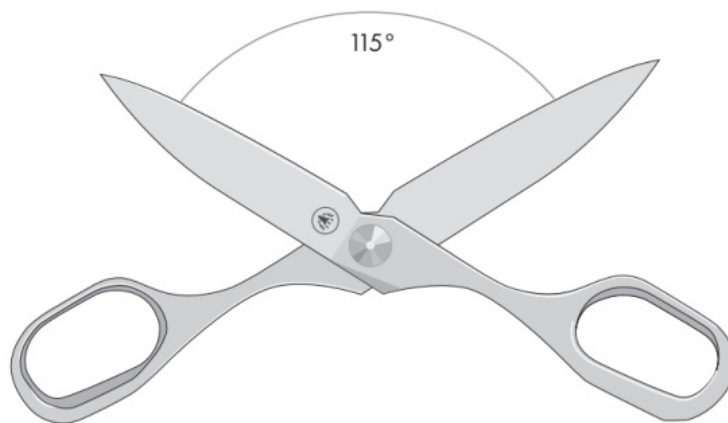

### **CONTACT SURFACES AND GRINDING ANGLE**

### Contact surfaces and grinding angle

The three contact surfaces on the scissor halves align the cutting edge at an optimum sharpening angle of 45°. This means there is no need to use the sharpener's magnetic angle support.

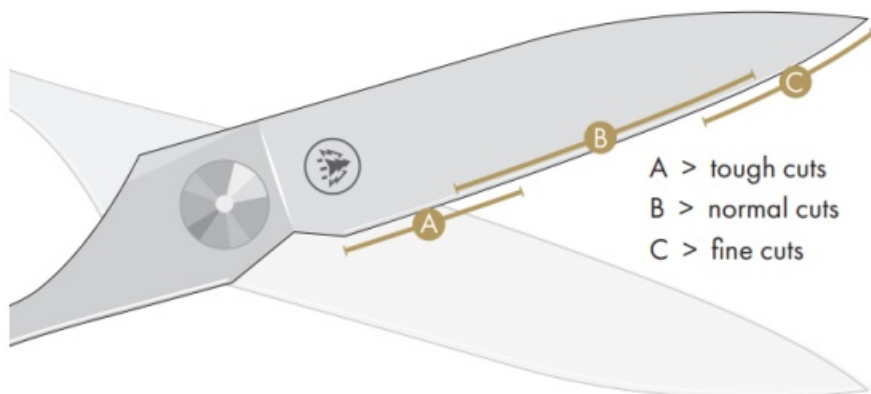

### OPENING THE HORL® SCISSORS

### Opening the HORL® scissors

With the scissors open at an angle of 115° after overcoming a little resistance the scissor halves can be separated from each other.

### CUTTING ZONES

### Cutting zones

HORL® Scissors will cut along their entire length. Tough materials can be cut most efficiently at (A). Close to the point (C) is ideal for cutting finely.

✓ **DOS**

Textiles, paper, packaging, films, soft plastics

✗ **DON'TS**

Metal, wood, wire

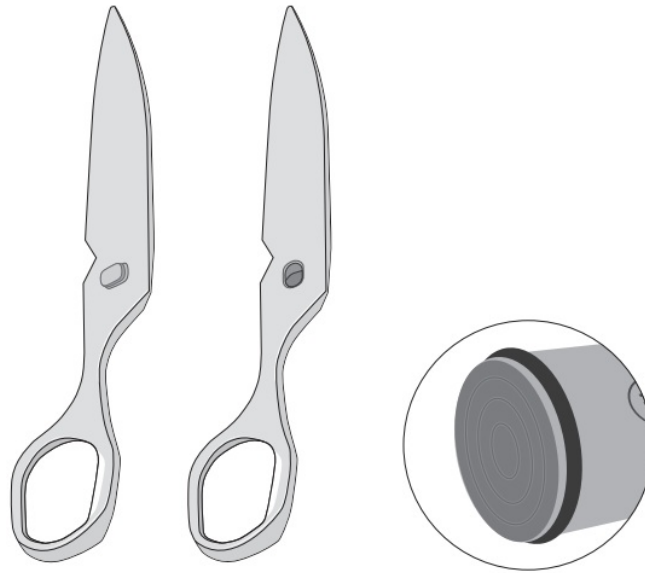

**Optimized for right-handed use**

The cutting performance of HORL® Scissors is optimized by using the right hand. Ergonomically, they can also be used by left-handers.

**Sharpening guide**

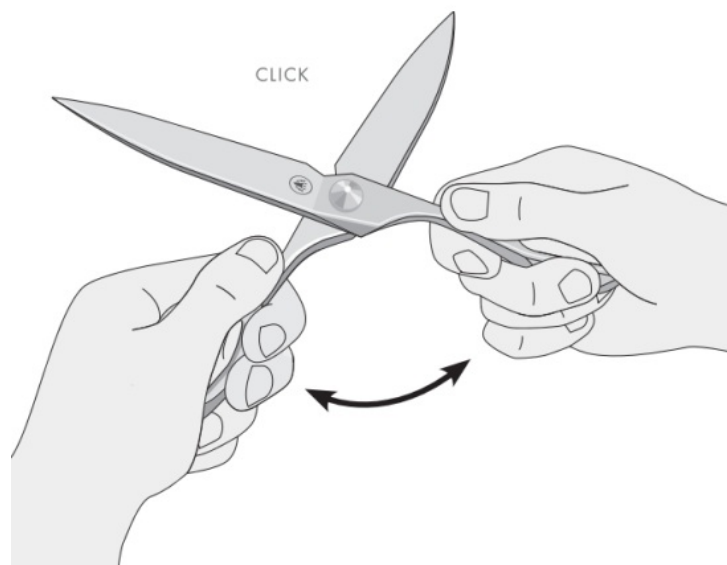

**SHARPENING WITH THE HORL ® SHARPENER**

Sharpening with the HORL® sharpener

The scissor blades normally only require sharpening with the HORL ® ceramic honing disc. However, if the HORL Scissors become significantly blunt, also use the diamond grinding disc beforehand.

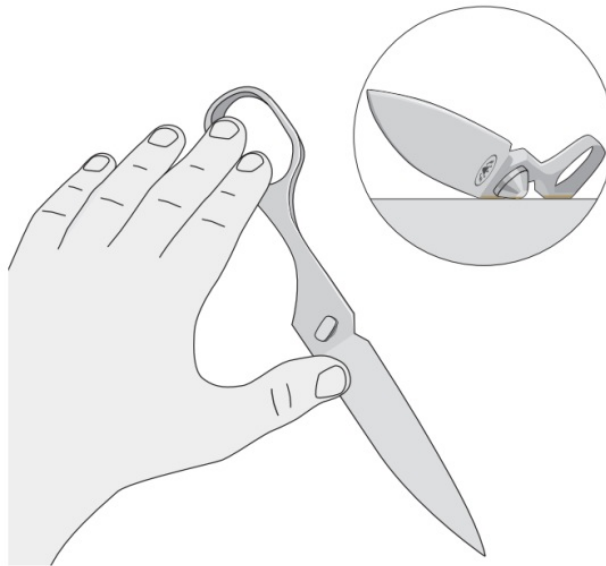

## 1. DETACH

### **Separate the scissor halves**

Open the scissors wide with both hands until you feel a noticeable resistance and overcome this. The two scissor halves can then be separated.

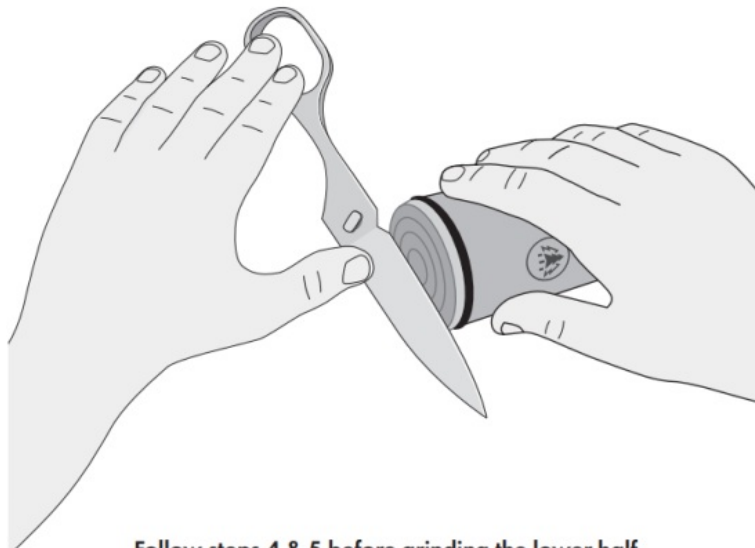

## 2. POSITION

### **Position the upper scissor half correctly**

Place the scissor half on its contact surfaces, that ensure an optimal angle of 45°. Secure it with your fingers and thumb in the handle eye and on the inside of the blade.

### **3. GRIND THE UPPER HALF**

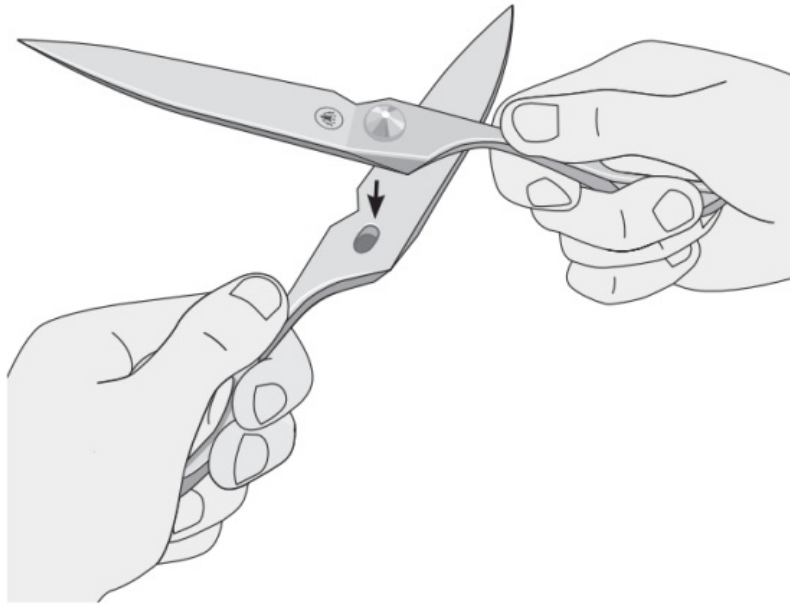

**Follow steps 4 & 5 before grinding the lower half**

### **Grind the upper half**

Press on the scissor handle with your supporting hand for a stable standing position. Place the ceramic disk against the blade and grind for about 30 seconds.

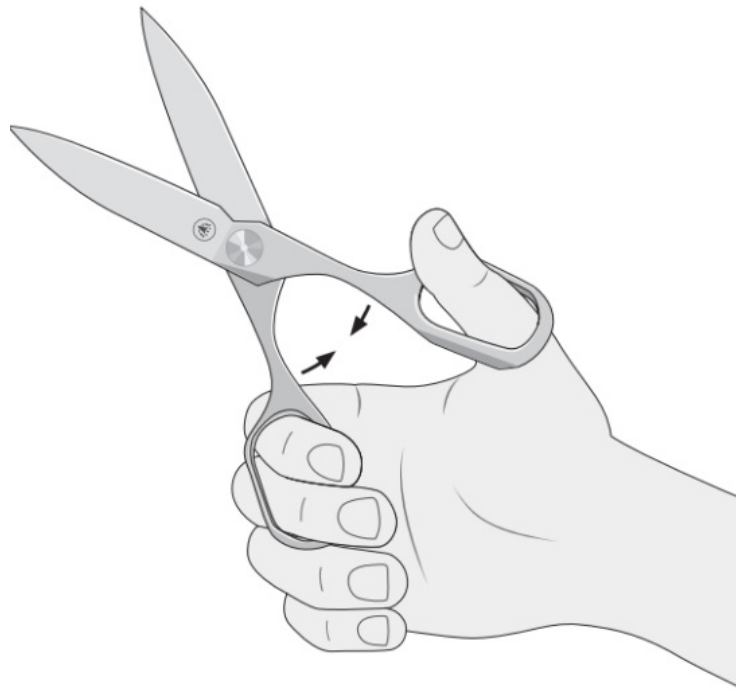

### **4. REASSEMBLE**

#### **Reassemble the scissors**

After grinding the upper half, put the scissor halves back together again.

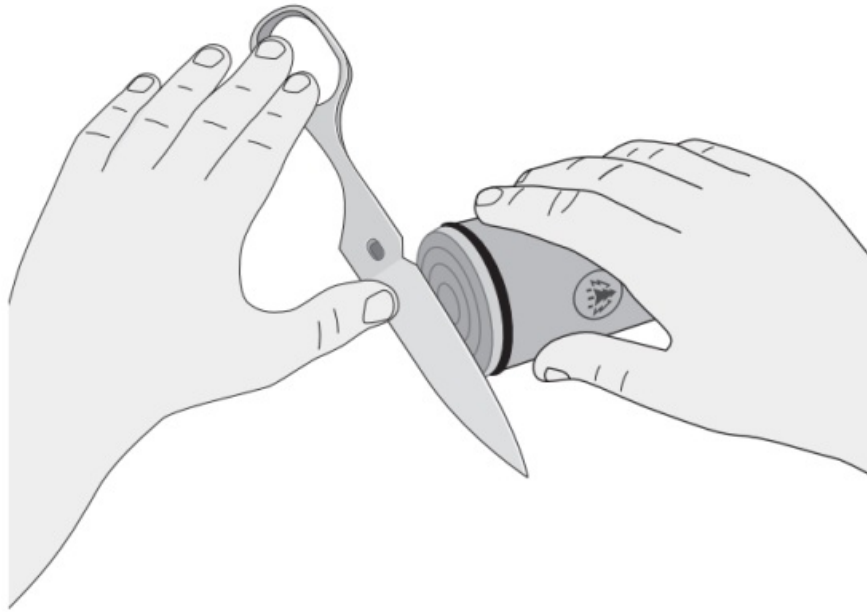

#### **5. SHEAR OFF BURR**

#### **Shear off any burr and wipe the blade**

To remove burr, snip the scissors three or five times in the air. Carefully wipe off grinding particles with a cloth.

#### **6. GRIND THE LOWER HALF**

7. Grind the lower half of the scissors

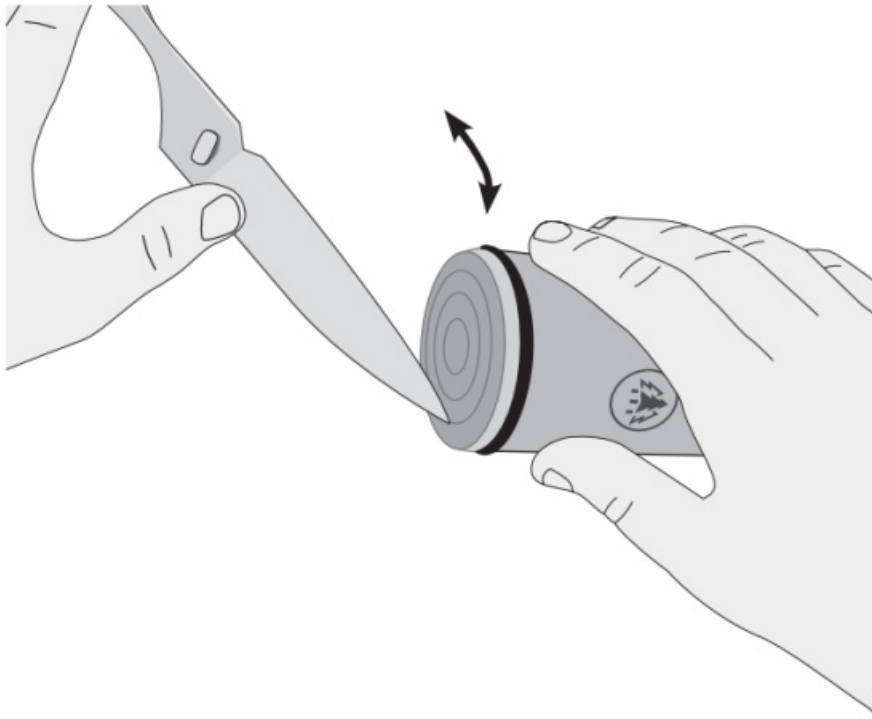

Now repeat steps 1 to 5 to grind the blade of the lower half of the scissors, which is marked with HORL® lettering.

**Tips and tricks**

**GRINDING THE TIP**

### Grinding the tip

When you reach the tip of the scissor blade, turn the sharpener slightly inwards and guide it along a slight curve. Always maintain contact with the cutting edge.

### CARE AND CLEANING

### Care and cleaning

Clean the clamp area and the two halves of the scissors regularly with a damp cloth. Always leave the clamp dry. Find more information online [go.horl.com/start-sre](https://go.horl.com/start-sre)

<https://go.horl.com/start-sre?r=qr>

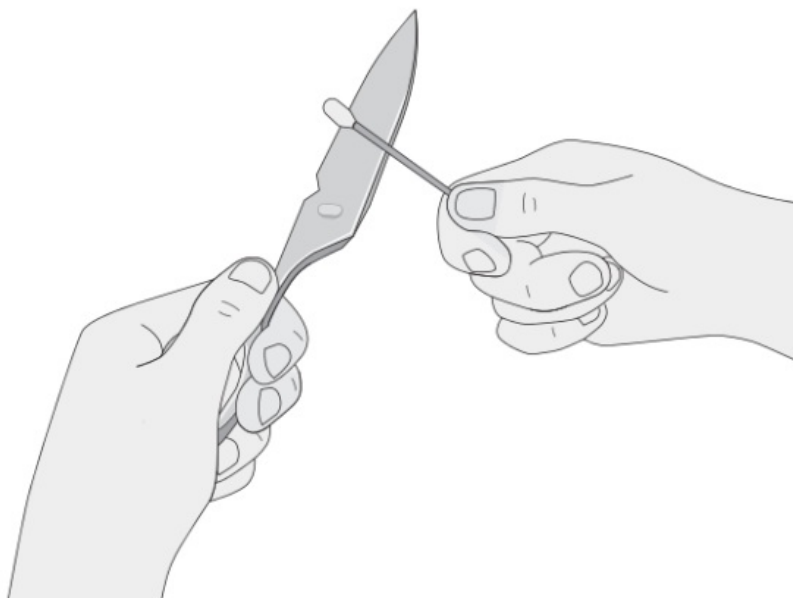

## STORAGE

### Storage

Protect the HORL® Scissors from moisture. We recommend storing them in a dry place, for example in their original packaging.

## CHECKING THE EDGE

### Checking the edge

To determine whether there is a burr, carefully wipe a cotton swab along the blade. If any fibers are pulled out, you need to sharpen the blade.
