Connect the keyboard to one computer using the receiver and up to two computers via Bluetooth®.

To program the keyboard keys or set up your keyboard and mouse to easily switch between computers, use the software. If the software does not download automatically, on your computer, open Microsoft Store. Search for HP Accessory Center, and then download the app.

The keyboard offers limited support for macOS® and Chrome™ devices. To manually change the keyboard operating system, hold down the following keys for more than 3 seconds:

- Windows®: FN + 1
- macOS: FN + 2
- Chrome: FN + 3

Components description

1. Programmable keys

To change the default functions, use HP Accessory Center.

2. Receiver key and light

Press and hold for 2 s to pair the keyboard using the receiver.

Slowly blinking white (180 s): The receiver is in pairing mode.

Solid white (5 s): The keyboard is connected to the receiver.

3. Bluetooth keys and lights

Press to select the first or second Bluetooth channel. Press and hold for less than 2 s to air the keyboard using Bluetooth. Press and hold for more than 2 s to reinitiate pairing mode if previously paired.

Solid white (5 s): The keyboard connection or reconnection was successful.

Slowly blinking white (180 s): The Bluetooth channel is selected, and the keyboard is in pairing mode.

Two white blinks and a pause (180 s): The keyboard is connecting to a previously paired device.

4. Power light

Solid white (5 s): The keyboard is on.

Slowly blinking amber: The keyboard needs to be charged.

5. Copilot in Windows (supported devices only)

Feature availability and functionality varies by market, see aka.ms/WindowsAIFeatures.

The Copilot feature is limited to specific up-to-date versions of Windows.

6. Receiver light

Slowly blinking white (180 s): The receiver is in pairing mode.

Solid white (5 s): The keyboard is connected to the receiver.

NOTE: Turn off the keyboard when not in use.
