Hswbytdnx WiFi Bluetooth Projector

Specifications

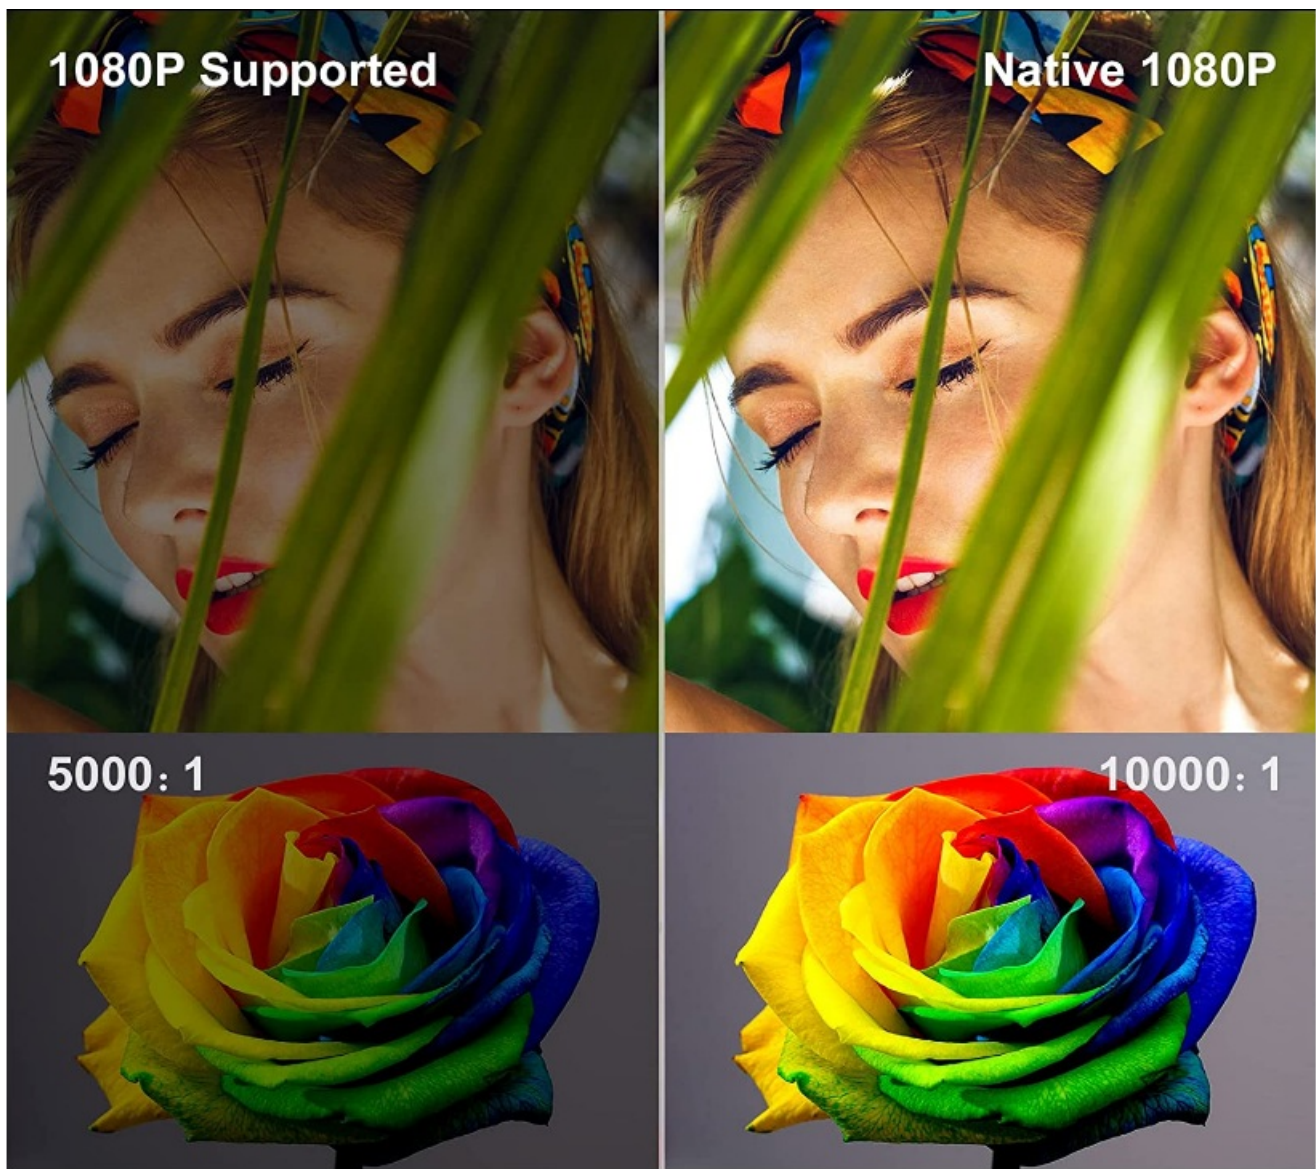

- **Brand:** Hswbytdnx
- **Connectivity Technology:** Bluetooth, USB, HDMI
- **Display resolution:** 1920 x 1080
- **Display Type:** LCD
- **Item Weight:** 3.85 pounds
- **Package Dimensions:** 14.37 x 11.18 x 5.83 inches

What's in the box?

- 5G Wi-Fi 4K Bluetooth Projector

Product Descriptions

Projector 5G Wi-Fi 4K 1080P Bluetooth

1. Fulfills every criterion you have for a premium home video projector.
2. Excellent projection picture with native 1080P, great brightness, and 1000:1 contrast ratio.
3. Lag-free video performance is made possible by the most recent 5G/2.4G Wi-Fi and Bluetooth technologies, which is also more easier to use.
4. It has Bluetooth capabilities, saving you money on additional speakers. Obtain a Bluetooth signal more than 50 feet away.
5. A 4K video projector with a sealed optical engine will last longer and maintain image quality by preventing dust from entering the device.

Business multimedia projector

The machine's sealed optical engine guards against dust entry and maintains image quality. To display crisp images and movies, this projector uses a lens with a very translucent coating. Tens of thousands of reflecting lenses make up the projector chip, which can fast flip between them each second to produce a 1080p full HD image.

It offers a bright huge screen, good image clarity, excellent color accuracy, and amazingly clear image details for households and businesses. With the newest high-tech smart screen capability, iOS/Android devices may quickly connect to Wi-Fi and Bluetooth without the need for any additional adapters. It will be more convenient to live and work with a huge screen, high brightness, and ultra-high configuration.

Connection through Bluetooth

As a low-energy commercial business projector that is more reliable and effective than other devices, the projector features the most recent Bluetooth 5.0 transmission codec. When Bluetooth 5.0 and wifi are combined, the inside location can be more accurately pinpointed, the transmission speed is increased, and the working range is extended.

An amazing sound bubble is produced by the integrated dual stereo surround sound system, which also gives you an immersive viewing experience. It is compatible with Bluetooth soundbars, Bluetooth speakers, and Bluetooth headsets. You can enjoy perfect sound quality wherever you are thanks to the variety of connection choices.

Objectivity and keystone adjustment

Up to 8m of projection distance is supported with the HSWBYTDNX projector. With the focus rotation button, it may quickly fix the issue with the image focus. You may alter the focus rotation button to obtain a high-definition image regardless of how close or far.

Due to its focus adjustment and keystone correction capabilities, the projector significantly lessens eye strain brought on by blurry pictures. It supports the installation of the front table, real table, front ceiling, and real ceiling. The easy-to-use installation process and the projection's angle are more suitable for daily business and living.

Numerous Compatibilities

Pro V7 connects to devices like TV boxes, Amazon Fire TV Sticks, Chromecasts, PCs, laptops, tablets, external speakers, Xboxes, DVD players, card readers, USB sticks, media players, iPads, iPhones, and Android smartphones with ease thanks to its two HDMI ports, two USB ports, two AV ports, and a 3.5mm headphone jack.

PC/Laptop

Audio Dvice

PS4/Xbox

Smartphone

DVD Player

USB Disk

TV BOX

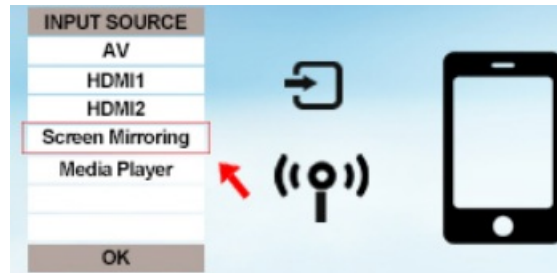

Camera

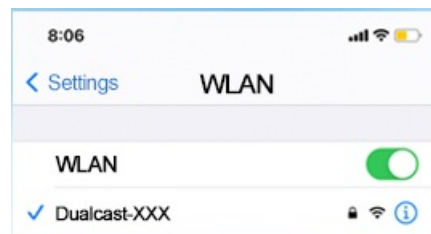

Built-in the most recent Bluetooth 5.0 chip, which can wirelessly connect your Bluetooth speaker at any time without restriction

Wireless Screen Mirroring

Press source then choose screen mirroring (loading time 5-10s)

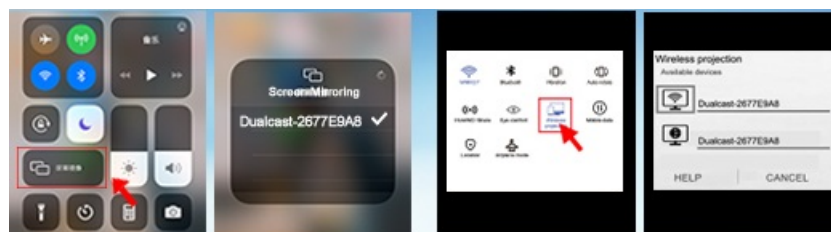

Choose the S SID (Dualcast-XXX) as the WALN to connect on your phone

Scan the QR code or directly enter the link: <http://192.168.203.1>

Features

WIFI PROJECTOR 2.4G/5G:

In order to sync your smartphone screen, you may use both 2.4G and 5G WiFi on the HSWBYTDNX C55. The ultra-fast 5G WiFi provides a considerably smoother and lag-free online video streaming experience.

A premium projector engine and a high-quality Bluetooth speaker system are combined in the BLUETOOTH PROJECTOR: HSWBYTDNX C55 to produce room-immersive sound. You only need one key to activate the Bluetooth function's user mode, making it simple to pair this projector with wireless speakers at home. Additionally, you can simply activate the Bluetooth receiver mode to turn this projector into a Bluetooth speaker and stream music from your smartphone.

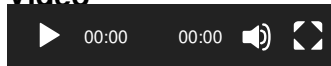

PROJECTOR WITH HIGHER BRIGHTNESS 1080P

Projector we have Our C55 is unquestionably superior in terms of brightness when compared to other 1080p projectors available on the market. The brightness was increased by 30% to 9500 L, and with a brightness of 9500 L and a contrast ratio of 12000:1, it is currently the brightest projector with native 1080P resolution available.

ZOOM Function & 4-Point Keystone Correction

This movie projector greatly reduces eye strain from blurry images and keeps the screen centered from a viewing angle thanks to the focus adjustment function and 4-Point keystone correction. It is the perfect choice for late-night binge-watching in your bedroom as well as outdoor movie nights because it can project up to 300".

[FAQ's manuals.plus/wp-content/uploads/2022/11/Hswbytdnx-5G-WIFI-4K-Bluetooth-projector.mp4](https://www.faq's-manuals.plus/wp-content/uploads/2022/11/Hswbytdnx-5G-WIFI-4K-Bluetooth-projector.mp4)

How can I obtain a clearer picture while matching the music from a Bluetooth speaker?

If the picture quality you are seeing is not high enough definition, please check to see if your video material is high definition. You may check the manual. Our product is a 1080P projector.

Can this be mounted to something?

To attach the mount, the product has dowel holes at the bottom.

Can I turn off this system from another location?

You may operate the projector directly or with the remote control.

Given that my room is small and this projector weighs 7 pounds, is it short-throw?

Our projector weights 1.9kg (4.2lb) or 6 lb. when the packaging is added. Suitable for screens 22" to 300"

If so, how long can it stay outside during the winter?

It could, but if you do, it probably won't persist for very long. It's an electronic, and only gadgets that are meant for outdoor use should be placed outside (it. Outdoor camera)

Is a manual downloadable?

The enclosed instruction manual for our projector

How do I remove the lens cap? It is immovable.

The lens may be shifted in and out. The lens should easily come off if you simply move it slightly outward.

What size does the projector have?

The size of the projector is 25.5*20*11cm.

What advantages can a Wi-Fi projector offer?

The size of the projector is 25.5*20*11cm.

What advantages can a Wi-Fi projector offer?

One benefit of wireless projectors on your network is that they enable multiple PC connections to a single projector or the usage of numerous projectors by one or more PCs. The enhanced PC-based collaboration activities made possible by wireless projectors further increase projector ROI.

What may a Wi-Fi projector be used for?

You can easily connect your laptop, tablet, or smartphone to an Epson wireless projector using Wi-Fi and Miracast technology and stream or reflect Full HD material, including movies, videos, images, and music, all without using a single cable.

What does a projector with Bluetooth do?

The HDMI port or audio jack on your projector is where you connect Bluetooth adapters. They are then associated with more Bluetooth devices. They take in audio and visual information and send them to your projector. Additionally, the adapters allow your projector to broadcast audio signals to other Bluetooth devices.

Are there smart features on projectors?

Everything a smart TV can do, smart projectors can too, but on a much larger screen. These projectors' portability, lamp-free technology, voice control, app integration, and streaming capabilities set them apart. The term "smart projector" is used by many projectors.
