Common Troubleshooting

1. The watch cannot be turned on: the time to press the power button is too short, more than 3 seconds: the battery is too low, please use the charging cable to charge.
2. The watch cannot be charged normally: whether the charging touchpoint is in normal contact with the watch, and whether the charger is normal;
3. First of all, wearable devices monitor human activity through electronic sensors, which are consumer grade. It

is normal for the product to have certain errors, please treat the data with observation;

4. If the mobile phone has a safety management or cleaning acceleration wind application installed, please send "DaFit" is set to a whitelist (trust list):
5. Some software sudden minor problems when the watch is running can be restored to normal by restoring the factory settings.

Know Your Equipment

This product supports waterproof wear for life. Special attention should be paid to the fact that hot showers or saunas should not be worn to prevent water vapor. Soak in seawater, etc., wipe it clean and blow dry in time. If water enters due to not using as instructed, our company does not make a free warranty. After soaking in water, the speaker hole will accumulate water. Please throw the water out so that the sound can return to normal.

Product Configuration

- One packing box

FCC STATEMENT

Warning

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment on and off, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by the manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 0cm between the radiator and your body.

FAQ

How do I connect my watch to my phone?

Download the "DaFit" app, enable Bluetooth, and follow the instructions to pair the devices.

How can I charge my smartwatch?

Use the provided magnetic charging cable and ensure the contacts are aligned correctly.

Can I wear the watch while swimming?

The watch is water-resistant with an IP68 rating, but it is recommended to avoid hot water.
